

## ING Bank N.V.

*(Incorporated in The Netherlands with its statutory seat in Amsterdam)*

**€40,000,000,000**

## Global Issuance Programme

### Base Prospectus for the issuance of Index Linked Notes

This Base Prospectus for the issuance of Index Linked Notes (this "**Base Prospectus**") constitutes a base prospectus for the purposes of Article 5.4 of the Prospectus Directive (Directive 2003/71/EC), as amended, to the extent that such amendments have been implemented in the relevant Member State of the European Economic Area (the "**Prospectus Directive**"), and is one of a number of prospectuses which relate to the €40,000,000,000 Global Issuance Programme (the "**Programme**").

Under this Base Prospectus, ING Bank N.V. (the "**Issuer**", which expression shall include any Substituted Debtor (as defined in Condition 17 of the General Conditions of the Notes), "**ING Bank**" or the "**Bank**") may from time to time issue notes (the "**Notes**" as more fully defined herein).

This Base Prospectus was approved by the Netherlands Authority for the Financial Markets (the "**AFM**") for the purposes of the Prospectus Directive on 22 June 2018 in respect of the issue by the Issuer of PD Notes (as defined below). The AFM has provided the competent authorities in each of Belgium, France, Luxembourg and Poland with a certificate of approval attesting that this Base Prospectus has been drawn up in accordance with the Prospectus Directive.

Notes to be issued under this Base Prospectus during the period of twelve months from the date of this Base Prospectus, which are:

(a) offered to the public in the European Economic Area in circumstances which require the publication of a prospectus under the Prospectus Directive, whether or not such Notes are listed and admitted to trading on any market; or

(b) (i) admitted to trading on Euronext in Amsterdam, a regulated market of Euronext Amsterdam N.V. ("**Euronext Amsterdam**"); (ii) admitted to the official list of the Luxembourg Stock Exchange (the "**Official List**"); (iii) admitted to trading on the regulated market of the Luxembourg Stock Exchange (the "**Luxembourg Stock Exchange**"); (iv) admitted to trading on the parallel market of the Warsaw Stock Exchange (*Giełda Papierów Wartościowych w Warszawie S.A.*) ("**Warsaw Stock Exchange**"); (v) admitted to trading on the regulated market of Euronext Paris S.A. ("**Euronext Paris**"); (vi) admitted to trading on a regulated market of Borsa Italiana S.p.A. (the "**Italian Stock Exchange**"); (vii) admitted to trading on another regulated market within the European Economic Area; or (viii) admitted to trading on an unregulated market as defined under Directive 2014/65/EU of the European Parliament and of the Council on markets in financial instruments, as amended from time to time ("**MiFID II**"),

are hereinafter referred to as "**PD Notes**". PD Notes may be issued in any denomination as agreed between the Issuer and the relevant Dealer(s) (as defined herein), and any PD Notes which have a denomination of less than €100,000 (or its equivalent in any other currency) are referred to hereinafter as "**Non-Exempt PD Notes**" and any PD Notes which have a denomination of at least €100,000 (or its equivalent in any other currency at the date of issue of the Notes) are referred to hereinafter as "**Exempt PD Notes**".

The Issuer may also issue unlisted Notes and/or Notes not admitted to trading on any regulated market within the European Economic Area and, where such Notes are, in addition, issued with a minimum denomination of at least €100,000 (or its equivalent in any other currency at the date of issue of the Notes) or otherwise fall within an exemption from the requirement to publish a prospectus under the Prospectus Directive, such Notes are hereinafter referred to as "**Exempt Notes**".

The Issuer may from time to time issue PD Notes (which may be Non-Exempt PD Notes or Exempt PD Notes) and Exempt Notes.

*The AFM has neither approved nor reviewed information contained in this Base Prospectus in connection with the issue of any Exempt Notes.*

Prospective investors should have regard to the factors described under the section headed "Risk Factors" of this Base Prospectus.

*This Base Prospectus should be read and construed in conjunction with the Base Prospectus for the issuance of Medium Term Notes and Inflation Linked Notes in respect of the €40,000,000,000 Global Issuance Programme of ING Bank N.V. and ING Bank N.V., Sydney Branch dated 22 June 2018 (the "**Level 1 Programme Prospectus**") and the Issuer Registration Document (as defined herein).*

## SUMMARY RELATING TO NON-EXEMPT PD NOTES

*This summary applies only to Non-Exempt PD Notes issued by ING Bank N.V. (the “**Issuer**”).*

Summaries are made up of disclosure requirements known as “Elements”. These Elements are numbered in Sections A to E (A.1 to E.7). This summary contains all the Elements required to be included in a summary for the Notes and the Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in a summary because of the nature of the Notes and the Issuer, it is possible that no relevant information can be given regarding the Element. In this case, a short description of the Element should be included in the summary with the mention of “Not Applicable”.

### Section A – Introduction and warnings

| Element |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|         | <p>in square brackets duly completed with the relevant information):</p> <p><i>“We, [specify legal name of financial intermediary], refer to the offer of [specify title of relevant Notes] (the “Notes”) described in the Final Terms dated [specify date] (the “<b>Final Terms</b>”) published by ING Bank N.V. (the “<b>Issuer</b>”). In consideration of the Issuer offering to grant its consent to our use of the Base Prospectus (as defined in the Final Terms) in connection with the offer of the Notes in [Belgium, France, Luxembourg, Poland and The Netherlands] during the Offer Period in accordance with the Authorised Offeror Terms (as specified in the Base Prospectus), we accept the offer by the Issuer. We confirm that we are authorised under MiFID II to make, and are using the Base Prospectus in connection with, the Public Offer accordingly. Terms used herein and otherwise not defined shall have the same meaning as given to such terms in the Base Prospectus.”</i></p> <p>A “<b>Public Offer</b>” of Notes is an offer of Notes (other than pursuant to Article 3(2) of the Prospectus Directive) in [Belgium, France, Luxembourg, Poland and The Netherlands] during the Offer Period specified below. Those persons to whom the Issuer gives its consent in accordance with the foregoing provisions are the “<b>Authorised Offerors</b>” for such Public Offer.</p> <p><i>Offer Period:</i> The Issuer’s consent referred to above is given for Public Offers of Notes during the period from [●] to [●] (the “<b>Offer Period</b>”).</p> <p><i>Conditions to consent:</i> The conditions to the Issuer’s consents [(in addition to the conditions referred to above)] are such that consent: (a) is only valid in respect of the relevant Tranche of Notes; (b) is only valid during the Offer Period; [and] (c) only extends to the use of the Base Prospectus to make Public Offers of the relevant Tranche of Notes in [Belgium, France, Luxembourg, Poland and The Netherlands] [; and (d) [●]].</p> <p>An investor intending to acquire or acquiring Notes in a Public Offer from an Authorised Offeror other than the Issuer will do so, and offers and sales of such Notes to an investor by such Authorised Offeror will be made, in accordance with any terms and other arrangements in place between such Authorised Offeror and such investor, including as to price, allocations, expenses and settlement arrangements.</p> <p><b>Each investor must look to the relevant Authorised Offeror at the time of any such Public Offer for the provision of information regarding the terms and conditions of the Public Offer and the Authorised Offeror will be solely responsible for such information.]</b></p> |

## Section B – Issuer

| Element     | Title                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>B.4b</b> | A description of any known trends affecting the Issuer and the industries in which it operates                              | <p>The results of operations of the Issuer are affected by demographics and by a variety of market conditions, including economic cycles, banking industry cycles and fluctuations in stock markets, interest and foreign exchange rates, political developments and client behaviour changes.</p> <p><i>Financial environment</i></p> <p>The following highlights several trends in the regulatory landscape and continuing uncertainty that have a major impact on the Issuer’s own operating environment, as well as on that of its competitors. This includes the economy and current low interest-rate environment; increasing regulatory scrutiny and costs; digitalisation and changing customer behaviour; and what the Issuer’s stakeholders expect of it.</p> <p><i>Increased global economic momentum</i></p> <p>Economic momentum picked up further in 2017, outpacing the global economic growth seen in 2016. In the United States, growth has remained strong. This is now the second-longest economic expansion since the end of World War II. At the same time inflation has stayed low, allowing the Federal Reserve to follow a very gradual path of interest rate increases.</p> <p>In the euro area, all member states’ economies are growing. The eurozone’s economic performance was particularly positive, as the area recorded its lowest unemployment rate in nine years and economic confidence reached pre-crisis levels.</p> <p>In the United Kingdom, economic growth has slowed, against a background of continued uncertainty about the future relationship with the European Union. The economy in Asia remained strong with growth rates of the advanced economies in that region generally accelerating. Growth in major emerging-market economies has improved overall, helped by a rebound in some commodity producers that experienced recessions in 2015–16.</p> <p>Rates increase, but remain low</p> <p>Longer-term government bond yields firmed somewhat compared to their 2016 lows on the back of a strengthening global economy, the Federal Reserve’s U.S. rate increases and the anticipated end to exceptionally easy monetary policy elsewhere.</p> |

| Element | Title |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         |       | <p>However, with inflation in most developed economies staying low, longer-term yields remained modest while equity markets in advanced economies performed well and corporate credit spreads were at, or close to, their tightest levels since the beginning of 2008. Volatility was subdued despite increased geopolitical tensions around North Korea.</p> <p><i>Euro on the rise</i></p> <p>The euro rose against the U.S. dollar in 2017, propelled by the strengthening economic outlook in the euro area, diminishing political uncertainty and expectations about the tapering of quantitative easing in the euro area.</p> <p><i>Regulatory landscape and continuing uncertainty</i></p> <p>Continued delays around the Basel ‘IV’ discussions (i.e. the revisions to Basel III) addressing the variability of banks’ internal models, which were not finalised until December 2017, led to ongoing international uncertainty. This had an impact on strategic planning and business decisions for many banks. At a European level, the Single Supervisory Mechanism continued to strengthen its supervisory role through the European Central Bank (“ECB”). This was reflected in the priorities it set for 2017: business models and profitability drivers; credit risk, with a focus on non-performing loans and risk concentrations; and risk management.</p> <p>The Single Resolution Board adopted its first resolution decisions for banks from Italy and Spain. Meanwhile the resolvability of banks has been further improved by building up loss-absorption buffers. European global systemically important banks are advancing their bail-in issuances and will likely meet the internationally agreed total loss-absorbing capacity (“TLAC”) standards per 2022. Resolution authorities have provided European banks with initial targets for minimum requirement for own funds and eligible liabilities (“MREL”). These targets will be reviewed once the ongoing discussions on the bank recovery and resolution directive (“BRRD”) and the review of capital requirements regulations (“CRR”) have been finalised.</p> <p>The Single Resolution Fund is also showing a steady increase. The size of the fund is now almost EUR 18 billion, aiming to meet the target requirement of EUR 55 billion in 2023. Despite the fact that the discussion on the European Deposit Insurance Scheme (“EDIS”) didn’t show much progress throughout 2017, the completion of the Banking Union gained political momentum. In the course of 2018, further steps are expected to ensure its completion by 2019. The Issuer would also welcome a deepening of the Economic and Monetary Union, which would help to enhance economic and financial stability in the eurozone.</p> <p>The range and complexity of non-prudential regulation (regarding other things than financial strength) continues to increase. Regulation is becoming more stringent in areas like customer due diligence, and transaction monitoring to detect and report money laundering (“AML”), terrorist financing and fraud. Individual country laws and specific regulations often prevent cross-border information sharing, between public and private</p> |

|---------|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         |       | <p>authorities and between private parties. This restricts the effectiveness of bank systems and is most evident when large financial institutions operate a global compliance model.</p> <p>The Issuer will participate in a public/private sector partnership initiated by Europol and the Institute of International Finance. This high-level forum aims to find better ways to share information within existing laws.</p> <p>In general, the Issuer continues to favour a more harmonised European approach to regulations. This would help to align the customer experience across borders and could accelerate the digitalisation of the Issuer's banking services.</p> <p>The Issuer's regulatory costs increased to EUR 901 million from the already elevated level of EUR 845 million in 2016. This was due to the Issuer's contribution to local deposit guarantee schemes, the European resolution fund and bank taxes.</p> <p>2017 marked the kick-off of Brexit negotiations. The Issuer is monitoring these closely to make Britain's exit from the EU as smooth as possible for its business and customers.</p> <p><i>Competitive landscape</i></p> <p>Technology is removing a number of the barriers to entry that once insulated the Issuer's business. The Issuer faces competition from many different directions, with relatively new players providing more segmented offers to its customers. Technology giants, payment specialists, retailers, telecommunication companies, crowd-funding initiatives and aggregators are all entering the market for traditional banking services. The Issuer's customers, in turn, are more willing to consider these offers.</p> <p>Safe banking requires specific knowledge of financial services, in-depth knowledge of customers, and rigorous risk-management systems. As competition from outside the banking sector continues to increase, the Issuer has to become faster, more agile and more innovative.</p> <p>With its long track record and strong brand, the Issuer believes it is well placed to seize these opportunities and become a better company for all of its stakeholders. The Issuer is a leader in digital banking, and it has scale combined with local market expertise. It is investing in building profitable, mutually beneficial relationships with its customers based on the quality of its service and the differentiating experience the Issuer offers them. The Issuer continues to work hard to win their hearts and minds, demonstrating its concern for them and all its stakeholders. The Issuer aims to be even clearer about the strategic choices it makes.</p> <p><i>Societal challenges</i></p> <p>In the Issuer's view, both climate change and the so-called fourth industrial revolution can lead to societal changes.</p> <p>The effects of climate change, including the growing scarcity of water, food, energy and other material resources, pose daunting social and environmental challenges. The causes and the solutions to these challenges are complex, but the Issuer already knows that they will change traditional business</p> |

|         |       | <p>(In respect of (i) any Interest Period for which “Fixed Interest Period” is specified as “Not Applicable” in the applicable Final Terms, and (ii) any Variable Rate Interest Period)</p> <p>[In respect of each Interest Period thereafter, each] [Each] Note bears interest on its outstanding nominal amount at a variable rate calculated as follows:</p> <p>1. First, (i) the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) is greater than [or equal to] the Range Accrual Floor(t) [and]/[or] less than [or equal to] the Range Accrual Cap(t) (“n”), is divided by (ii) the total number of Range Accrual Observation Dates in the Range Accrual Observation Period (“N”), (the resulting fraction being the “<b>Range Accrual Fraction</b>”).</p> <p>The Range Accrual Observation Period in respect of an Interest Payment Date(t) is the period [from (and including) two business days before the previous Interest Payment Date to (and including) three business days before such Interest Payment Date(t)][<i>specify other period</i>].</p> <p>The Range Accrual Observation Dates are [●].</p> <p>2. Secondly, (i) the sum of (1) the product of (A) the Multiplier1(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin1(t), is multiplied by (ii) the Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Range Accrual Rate</b>”.</p> <p>3. Thirdly, (i) the difference when n is subtracted from N, is divided by (ii) N (the resulting fraction being the “<b>Inverse Range Accrual Fraction</b>”).</p> <p>4. Fourthly, (i) the sum of (1) the product of (A) the Multiplier2(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin2(t), is multiplied by (ii) the Inverse Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Inverse Range Accrual Rate</b>”.</p> <p>5. The Rate of Interest payable by the Issuer in respect of the relevant Interest Period will be the sum of the Range Accrual Rate and Inverse Range Accrual Rate, subject to a maximum rate of interest equal to Cap(t) and a minimum rate of interest equal to Floor(t).</p> <p>Interest will be paid [annually/semi-annually/quarterly/monthly] in arrear at this rate on each Interest Payment Date from (and including) [●] [to (and including) [●]/[the Maturity Date]][, subject to adjustment for non-business days].</p> <p>The Interest Periods, Interest Payment Dates, Multiplier1, Multiplier2, Underlying Margin1, Underlying Margin2, Range Accrual Reference Rate, Range Accrual Floor, Range Accrual Cap, Cap and Floor for each Interest</p> |                                     |                                                     |

|                               |                                     | <p>adjustment for non-business days].</p> <p>The Fixed Rate Interest Periods, Fixed Rate Interest Payment Dates and the Rate of Interest(Fixed) for each Fixed Rate Interest Period are specified in the table below:</p> <table border="1"> <tr> <th>Fixed Rate Interest Period(t)</th><th>Fixed Rate Interest Payment Date(t)</th><th>Rate of Interest(Fixed)(t)</th></tr> <tr> <td>(Insert Period)</td><td>(Insert Date)</td><td>(Insert percentage in respect of each Interest Period(t))</td></tr> <tr> <td></td><td></td><td></td></tr> </table> <p>(In respect of (i) any Interest Period for which “Fixed Interest Period” is specified as “Not Applicable” in the applicable Final Terms, and (ii) any Variable Rate Interest Period)</p> <p>[In respect of each Interest Period thereafter, each] [Each] Note bears interest on its outstanding nominal amount at a variable rate calculated as follows:</p> <p>1. First, (i) the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Spread(t) is greater than [or equal to] the Range Accrual Floor(t) [and]/[or] less than [or equal to] the Range Accrual Cap(t) (“n”), is divided by (ii) the total number of Range Accrual Observation Dates in the Range Accrual Observation Period (“N”), (the resulting fraction being the “<b>Range Accrual Fraction</b>”).</p> <p>The Range Accrual Observation Period in respect of an Interest Payment Date(t) is the period [from (and including) two business days before the previous Interest Payment Date to (and including) three business days before such Interest Payment Date(t)][specify other period].</p> <p>The Range Accrual Observation Dates are [●].</p> <p>The “<b>Range Accrual Reference Spread</b>” represents the difference when the Range Accrual Reference Rate2(t) is subtracted from the Range Accrual Reference Rate1(t).</p> <p>2. Secondly, (i) the sum of (1) the product of (A) the Multiplier1(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin1(t), is multiplied by (ii) the Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Range Accrual Rate</b>”.</p> <p>3. Thirdly, (i) the difference when n is subtracted from N, is divided by (ii) N (the resulting fraction being the “<b>Inverse Range Accrual Fraction</b>”).</p> <p>4. Fourthly, (i) the sum of (1) the product of (A) the Multiplier2(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin2(t), is multiplied by (ii) the Inverse Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Inverse Range Accrual Rate</b>”.</p> <p>5. The Rate of Interest payable by the Issuer in respect of the relevant Interest Period will be the sum of the Range Accrual Rate and Inverse Range Accrual Rate, subject to a maximum rate of interest equal to Cap(t)</p> | Fixed Rate Interest Period(t) | Fixed Rate Interest Payment Date(t) | Rate of Interest(Fixed)(t) | (Insert Period) | (Insert Date) | (Insert percentage in respect of each Interest Period(t)) |  |  |  |
| Fixed Rate Interest Period(t) | Fixed Rate Interest Payment Date(t) | Rate of Interest(Fixed)(t)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                               |                                     |                            |                 |               |                                                           |  |  |  |

| Element                                                   | Title                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                    |                          |                 |               |  |  |                |                |                                                           |                                                           |  |  |                       |                       |                                                           |                                                           |  |  |
|-----------------------------------------------------------|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------|-----------------|---------------|--|--|----------------|----------------|-----------------------------------------------------------|-----------------------------------------------------------|--|--|-----------------------|-----------------------|-----------------------------------------------------------|-----------------------------------------------------------|--|--|
|                                                           |                                                           | <p>Date(t) is the period [from (and including) two business days before the previous Interest Payment Date to (and including) three business days before such Interest Payment Date(t)][<i>specify other period</i>].</p> <p>The Range Accrual Observation Dates are [●].</p> <p>2. Secondly, (i) the sum of (1) the product of (A) the Multiplier1(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin1(t), is multiplied by (ii) the Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Range Accrual Rate</b>”.</p> <p>3. Thirdly, (i) the difference when n is subtracted from N, is divided by (ii) N (the resulting fraction being the “<b>Inverse Range Accrual Fraction</b>”).</p> <p>4. Fourthly, (i) the sum of (1) the product of (A) the Multiplier2(t) and (B) the Underlying Rate(t) and (2) the Underlying Margin2(t), is multiplied by (ii) the Inverse Range Accrual Fraction. The resulting Rate of Interest is referred to here as the “<b>Inverse Range Accrual Rate</b>”.</p> <p>5. The Rate of Interest payable by the Issuer in respect of the relevant Interest Period will be the sum of the Range Accrual Rate and Inverse Range Accrual Rate, subject to a maximum rate of interest equal to Cap(t) and a minimum rate of interest equal to Floor(t).</p> <p>Interest will be paid [annually/semi-annually/quarterly/monthly] in arrear at this rate on each Interest Payment Date from (and including) [●] [to (and including) [●]/[the Maturity Date]], subject to adjustment for non-business days].</p> <p>The Interest Periods, Interest Payment Dates, Multiplier1, Multiplier2, Underlying Margin1, Underlying Margin2, Range Accrual Reference Rate, Range Accrual Floor, Range Accrual Cap, Cap and Floor for each Interest Period are specified in the table below:</p> <table><tr><th>Interest Period(t)</th><th>Interest Payment Date(t)</th></tr><tr><td>(Insert Period)</td><td>(Insert Date)</td></tr><tr><td></td><td></td></tr></table><br><table><tr><th>Multiplier1(t)</th><th>Multiplier2(t)</th></tr><tr><td>(Insert percentage in respect of each Interest Period(t))</td><td>(Insert percentage in respect of each Interest Period(t))</td></tr><tr><td></td><td></td></tr><tr><th>Underlying Margin1(t)</th><th>Underlying Margin2(t)</th></tr><tr><td>(Insert percentage in respect of each Interest Period(t))</td><td>(Insert percentage in respect of each Interest Period(t))</td></tr><tr><td></td><td></td></tr></table> | Interest Period(t) | Interest Payment Date(t) | (Insert Period) | (Insert Date) |  |  | Multiplier1(t) | Multiplier2(t) | (Insert percentage in respect of each Interest Period(t)) | (Insert percentage in respect of each Interest Period(t)) |  |  | Underlying Margin1(t) | Underlying Margin2(t) | (Insert percentage in respect of each Interest Period(t)) | (Insert percentage in respect of each Interest Period(t)) |  |  |

|         |       | [insert date]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | [insert date(s)]          | [insert date(s)]            | [insert percentage]      |
|         |       | <p><i>[If the type of interest is One Touch Lock-In(Index) Interest, the following will apply:]</i></p> <p>[The Notes will bear interest from their date of issue at a variable rate calculated as: (i) if a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, the higher of the Lock-In(t) and <i>[if the Notes are Single Index Linked Notes]</i>[the Performance(t)]<i>[if the Notes are Basket Index Linked Notes]</i>[the Basket Performance(t)]; or (ii) if no Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, the higher of zero% and <i>[if the Notes are Single Index Linked Notes]</i>[the Performance(t)]<i>[If the Notes are Basket Index Linked Notes]</i>[the Basket Performance(t)].</p> <p>A Coupon Barrier Event will occur if the Calculation Agent determines that on any single Coupon Barrier Event Determination Day <i>[if the Notes are Single Index Linked Notes]</i>[the level of the Index at the Specified Time]<i>[if the Notes are Basket Index Linked Notes]</i>[, in respect of a Basket Component, the level of such Basket Component at the Specified Time] is <i>[if “Excess” applies]</i>[greater than]<i>[if “Excess/Equal” applies]</i>[greater than or equal to] <i>[if “Equal/Lower” applies]</i>[equal to or lower than] <i>[if “Lower” applies]</i>[lower than] the Coupon Barrier(t). A Coupon Barrier Event Determination Day will be each day during each Coupon Barrier Observation Period. The Coupon Barrier Observation Period will be, in respect of any Interest Period(t), the period from [and including][but excluding] <i>[if “Initial Day” applies]</i>[the first day of such Interest Period(t)]<i>[if “Initial Day” does not apply]</i>[the Specified Number (Start)(t) of business days (i) following the first day of such Interest Period(t), if such Specified Number (Start)(t) is zero or positive, or (ii) preceding the first day of such Interest Period(t), if such Specified Number (Start)(t) is negative] to [and including][but excluding] <i>[if “Final Day” applies]</i>[the last day of such Interest Period(t)]<i>[if “Final Day” does not apply]</i>[the Specified Number (End)(t) of business days preceding the last day of such Interest Period(t)].</p> <p><i>[If the Notes are Single Index Linked Notes]</i>[The Performance(t) will be calculated as the higher of (i) the Coupon Index Floor and (ii) the lower of (a) the product of the Observation Performance(t) and 100% and (b) the Coupon Index Cap. Observation Performance(t) will be calculated as the quotient of (i) the Observation Index Level(t) less the Strike Level and (ii) the Initial Index Level. The Observation Index Level(t) represents, in respect of the Index and an Interest Payment Date(t), the level of the Index at the Specified Time on the relevant Coupon Observation Date(t). The Initial Index Level represents <i>[if “Asian-in” and “Lookback-in” do not</i></p> |                           |                             |                          |

| Element | Title |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|         |       | <p>Level(t)] on the relevant Coupon Observation Date is <i>[if “Excess” applies][greater than] [if “Excess/Equal” applies][greater than or equal to]</i> the Lock-In Barrier(t).</p> <p><i>[If the Notes are Single Index Linked Notes]</i> Lock-In Performance(t) will be calculated as the product of (i) the quotient of (a) the Observation Index Level(t) less the Strike Level and (b) the Initial Index Level; and 100%. The Observation Index Level(t) represents, in respect of the Index and an Interest Payment Date(t), the level of the Index at the Specified Time on the relevant Coupon Observation Date(t). The Initial Index Level represents <i>[if “Asian-in” and “Lookback-in” do not apply]</i> the level of the Index at the Valuation Time on the Strike Date.<i>[if “Asian-in” applies]</i> the arithmetic mean of the level of the Index at the Valuation Time in respect of each Asian-in Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-in Averaging Dates; and (ii) the sum of the level of the Index at the Valuation Time on each Asian-in Averaging Date, as determined by the Calculation Agent.<i>[If “Lookback-in” applies]</i> the higher of: (i) the lowest of the levels of the Index at the Valuation Time on the Lookback-in Observation Dates; and (ii) a value equal to the product of (a) the Lookback-in Floor Percentage and (b) the level of the Index at the Valuation Time on the Strike Date, as determined by the Calculation Agent.]]</p> <p><i>[If the Notes are Basket Index Linked Notes]</i> Lock-In Basket Performance(t) will be calculated as the product of: (i) the weighted average of the quotient of (a) the Observation Index Level(k,t) in respect of each Basket Component less the Strike Level(k) and (b) the Initial Index Level(k) of such Basket Component; and (ii) 100%. The Observation Index Level(k,t) represents, in respect of a Basket Component and an Interest Payment Date(t), the level of such Basket Component at the Specified Time on the relevant Coupon Observation Date(t). The Strike Level(k) represents the product of: (i) the Strike Level Percentage; and (ii) the Initial Index Level(k). The Initial Index Level(k) represents, in respect of a Basket Component, <i>[if “Asian-in” in respect of the Initial Index Level(k) and “Lookback-in” do not apply]</i> the level of such Basket Component at the Valuation Time on the Strike Date.<i>[If “Asian-in” in respect of the Initial Index Level(k) applies]</i> the arithmetic mean of the level of such Basket Component at the Valuation Time in respect of each Asian-in Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-in Averaging Dates; and (ii) the sum of the level of such Basket Component at the Valuation Time on each Asian-in Averaging Date, as determined by the Calculation Agent.<i>[If “Lookback-in” applies]</i> the higher of: (i) the lowest of the levels of such Basket Component at the Valuation Time on the Lookback-in Observation Dates; and (ii) a value equal to the product of (a) the Lookback-in Floor Percentage and (b) the level of such Basket Component at the Valuation Time on the Strike Date, as determined by the Calculation Agent.]</p> |

The Strike Level Down represents the product of: (i) the Strike Level Percentage Down; and (ii) the Initial Index Level. The Initial Index Level represents [if “Asian-in” and “Lookback-in” do not apply][the level of the Index at the Valuation Time on the Strike Date.][if “Asian-in” applies][the arithmetic mean of the level of the Index at the Valuation Time in respect of each Asian-in Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-in Averaging Dates; and (ii) the sum of the level of the Index at the Valuation Time on each Asian-in Averaging Date, as determined by the Calculation Agent.][If “Lookback-in” applies][the higher of: (i) the lowest of the levels of the Index at the Valuation Time on the Lookback-in Observation Dates; and (ii) a value equal to the product of (a) the Lookback-in Floor Percentage and (b) the level of the Index at the Valuation Time on the Strike Date, as determined by the Calculation Agent.]</p> |
