|         |       | [insert percentage]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |              |                       |
|         |       | <p><i>[If the type of redemption is Reverse Convertible Redemption and the Notes are Basket Index Linked Notes, the following will be applicable:]</i></p> <p>[Reverse Convertible Redemption]</p> <p><i>[If “Worst Of” does not apply:]</i></p> <p>[The Final Redemption Amount applicable to each Note will be calculated as: (i) if the Basket Final Level is <i>[if “Excess” applies]</i>[greater than]/<i>[if “Excess/Equal” applies]</i>[greater than or equal to] the Basket Strike Level, the product of: (a) the Calculation Amount; (b) the CA Factor; and (c) 100%; or (ii) if the Basket Final Level is not <i>[if “Excess” applies]</i>[greater than]/<i>[if “Excess/Equal” applies]</i>[greater than or equal to] the Basket Strike Level, the product of: (a) the Calculation Amount; (b) the CA Factor; and (c) the sum of (1) 100% and (2) the product of the Leverage Put and the Basket Performance.</p> <p>The CA Factor will be <i>[if the Notes are not issued in unitised form]</i>[the factor by which the Calculation Amount must be multiplied to reach the Specified Denomination of such Note without any further rounding]<i>[if the notes are issued in unitised form]</i>[one].</p> <p>The Basket Performance will be calculated as the quotient of: (i) (a) the Basket Final Level less (b) the Basket Strike Level; and (ii) the Basket Initial Level, as multiplied by 100%. The Basket Final Level represents the sum of the quotient of: (i) the Final Index Level(k) in respect of each Basket Component, and (ii) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Final Index Level(k) represents, in respect of each Basket Component, the level of such Basket Component at the Valuation Time on the Valuation Date, as determined by the Calculation Agent. The Initial Index Level(k) represents, in respect of a Basket Component, the level of such Basket Component at the Valuation Time on the Strike Date. Weighting(k) represents, in respect of each Basket Component, the weight specified in the table below as the weighting in respect of such Basket Component. The Basket Strike Level represents the product of: (i) the Strike Level Percentage; and (ii) the Basket Initial Level. The Basket Initial Level will be one.]</p> <p><i>[If “Worst Of” applies:]</i></p> |              |                       |

| <p>[The Final Redemption Amount applicable to each Note will be calculated as: (i) if no Redemption Barrier Event has occurred in respect of the Basket or if an Upper Barrier Event has occurred in respect of the Basket, the product of: (a) the Calculation Amount; (b) the CA Factor; and (c) 100%; or (ii) if no Upper Barrier Event has occurred in respect of the Basket and if a Redemption Barrier Event has occurred in respect of the Basket: (a) if the Basket Final Level is <i>[if “Excess” applies][greater than][if “Excess/Equal” applies][greater than or equal to]</i> the Basket Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; and (3) 100%; or (b) if the Basket Final Level is not <i>[if “Excess” applies][greater than][if</i></p> |       |                                                                                                                                         |                                                |                                                |                                     |

| Element | Title |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         |       | <p><i>“Excess/Equal” applies</i>][greater than or equal to] the Basket Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; and (3) the sum of (I) 100% and (II) the product of the Leverage Put and the Basket Performance.</p> <p>A Redemption Barrier Event will occur in respect of the Basket if the Calculation Agent determines that, on any Redemption Barrier Event Determination Day, the Basket Level(t) is [less than][less than or equal to] the Basket Redemption Barrier(knock-in). A Redemption Barrier Event Determination Day will be <i>[if “Final Monitoring” applies]</i>[each day specified below as a Redemption Barrier Event Determination Day]<i>[if “Continuous Monitoring” applies]</i>[each day during the Redemption Barrier Observation Period]. The Basket Level(t) represents the sum of the quotient of (i) the level of each Basket Component on such Redemption Barrier Event Determination Day at the Specified Time, as determined by the Calculation Agent, and (b) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Basket Redemption Barrier(knock-in) represents the product of (i) the Basket Redemption Barrier(knock-in) Percentage and (ii) the Basket Initial Level.</p> <p>An Upper Barrier Event will occur in respect of the Basket if the Calculation Agent determines that, on any Upper Barrier Event Determination Day, the Basket Level(t) is <i>[if “Excess” applies]</i>[greater than] <i>[if “Excess/Equal” applies]</i>[greater than or equal to] the Basket Upper Barrier. An Upper Barrier Event Determination Day will be <i>[if “Final Monitoring” applies]</i>[each day specified below as an Upper Barrier Event Determination Day]<i>[if “Continuous Monitoring” applies]</i>[each day during the Upper Barrier Observation Period]. The Basket Level(t) represents the sum of the quotient of (i) the level of each Basket Component on such Upper Barrier Event Determination Day at the Specified Time, as determined by the Calculation Agent, and (b) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Basket Upper Barrier represents the product of (i) the Basket Upper Barrier Percentage and (ii) the Basket Initial Level.</p> <p>The CA Factor will be <i>[if the Notes are not issued in unitised form]</i>[the factor by which the Calculation Amount must be multiplied to reach the Specified Denomination of such Note without any further rounding]<i>[if the notes are issued in unitised form]</i>[one].</p> <p>The Basket Performance will be calculated as the quotient of: (i) (a) the Basket Final Level less (b) the Basket Strike Level; and (ii) the Basket Initial Level, as multiplied by 100%. The Basket Final Level represents the sum of the quotient of: (i) the Final Index Level(k) in respect of each Basket Component, and (ii) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Final Index Level(k) represents, in respect of each Basket Component, the level of such Basket Component at the Valuation Time on the Valuation Date, as</p> |

|         |       | <p>[If “Upside Redemption” is “Basket level basis” and “Downside Redemption” is “Basket level basis”:]</p> <p>[The Final Redemption Amount applicable to each Note will be calculated as: (i) if no Redemption Barrier Event has occurred in respect of the Basket, the product of: (a) the Calculation Amount; (b) the CA Factor; [and] (c) the sum of (1) 100% and (2) the higher of (I) the Bonus and (II) the product of the Participation and the Basket Performance(1); [and <i>if Flexo applies</i>] (d) the Performance XRate;] or (ii) if a Redemption Barrier Event has occurred in respect of the Basket: (a) if the Basket Final Level is <i>[if “Excess” applies][greater than][if “Excess/Equal” applies][greater than or equal to]</i> the Basket Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; [and] (3) the sum of (I) 100% [and] (II) the product of the Participation and the Basket Performance(1); [and] <i>if Flexo applies</i> (4) the Performance XRate;] or (b) if the Basket Final Level is not <i>[if “Excess” applies][greater than][if “Excess/Equal” applies][greater than or equal to]</i> the Basket Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; and (3) the sum of (I) 100% and (II) the product of the Leverage Put and the Basket Performance(2).</p> <p>A Redemption Barrier Event will occur in respect of the Basket if the Calculation Agent determines that on any Redemption Barrier Event Determination Day the Basket Level(t) is [less than][less than or equal to] the Basket Redemption Barrier(knock-in). A Redemption Barrier Event Determination Day will be <i>[if Final Monitoring applies][each day specified below as a Redemption Barrier Event Determination Day][if Continuous Monitoring applies][each day during the Redemption Barrier Observation Period]</i>. The Basket Level(t) represents the sum of the quotient of (i) the level of each Basket Component on such Redemption Barrier Event Determination Day at the Specified Time, as determined by the Calculation Agent, and (b) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Basket Redemption Barrier(knock-in) represents the product of (i) the Basket Redemption Barrier(knock-in) Percentage and (ii) Basket Initial Level.</p> <p>The Basket Initial Level represents <i>[if “Asian-in” in respect of the Basket Initial Level and “Lookback-in” do not apply][will be one.][if “Asian-in” in respect of the Basket Initial Level applies][represents the arithmetic mean of the Basket Level(t) in respect of each Asian-in Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-in Averaging Dates; and (ii) the sum of the value of the Basket Level(t) on each Asian-in Averaging Date, as determined by the Calculation Agent.][If “Lookback-in” applies][represents the higher of: (i) the lowest Basket Level(t) in respect of all Lookback-in Observation Dates; and (ii) a value equal to the product of (a) the Lookback-in Floor Percentage and (b) the Basket Level(t) at the Valuation Time on the Strike Date, as determined by the Calculation Agent.]</i> [The Basket Level(t) represents the sum of the quotient of (i) the level of each Basket Component</p> |

|         |       | <p><i>[If the type of redemption is Twin-Win Redemption and the Notes are Single Index Linked Notes, the following will be applicable:]</i></p> <p><i>[Twin-Win Redemption]</i></p> <p>The Final Redemption Amount applicable to each Note will be calculated as: (i) if no Redemption Barrier Event has occurred: (a) if the Final Index Level is <i>[if “Excess” applies]</i> greater than <i>[if “Excess/Equal” applies]</i> greater than or equal to the Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; [and] (3) the sum of (I) 100% and (II) the product of the Participation Call and the lower of (A) the Cap and (B) the Performance(1); [and <i>[if Flexo applies]</i> (4) the Performance XRate;] or (b) if the Final Index Level is not <i>[if “Excess” applies]</i> greater than <i>[if “Excess/Equal” applies]</i> greater than or equal to the Strike Level, the product of: (1) the Calculation Amount; (2) the CA Factor; [and] (3) the sum of (I) 100% and (II) the product of the Participation Put and the absolute value of the Performance(2) [and <i>[if Flexo applies]</i> (4) the Performance XRate;] or (ii) if a Redemption Barrier Event has occurred, the product of: (a) the Calculation Amount; (b) the CA Factor; (c) the sum of 100% and the Performance(2).</p> <p>A Redemption Barrier Event will occur if the Calculation Agent determines that on any Redemption Barrier Event Determination Day the level of the Index at the Specified Time is [less than][less than or equal to] the Redemption Barrier(knock-in). A Redemption Barrier Event Determination Day will be <i>[if Final Monitoring applies]</i> each day specified below as a Redemption Barrier Event Determination Day <i>[if Continuous Monitoring applies]</i> each day during the Redemption Barrier Observation Period]. The Redemption Barrier(knock-in) represents the product of (i) the Redemption Barrier(knock-in) Percentage and (ii) the Initial Index Level.</p> <p>The Initial Index Level represents <i>[if “Asian-in” and “Lookback-in” do not apply]</i> the level of the Index at the Valuation Time on the Strike Date. <i>[if “Asian-in” applies]</i> the arithmetic mean of the level of the Index at the Valuation Time in respect of each Asian-in Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-in Averaging Dates; and (ii) the sum of the level of the Index at the Valuation Time on each Asian-in Averaging Date, as determined by the Calculation Agent. <i>[If “Lookback-in” applies]</i> the higher of: (i) the lowest of the levels of the Index at the Valuation Time on the Lookback-in Observation Dates; and (ii) a value equal to the product of (a) the Lookback-in Floor Percentage and (b) the level of the Index at the Valuation Time on the Strike Date, as determined by the Calculation Agent.</p> <p>The Strike Level represents the product of: (i) the Strike Level Percentage; and (ii) the Initial Index Level.</p> <p>The CA Factor will be <i>[if the Notes are not issued in unitised form]</i> the factor by which the Calculation Amount must be multiplied to reach the</p> |

|         |       | <p>represents the sum of the quotient of: (i) the Final Index Level(k) in respect of each Basket Component, and (ii) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). The Final Index Level(k) represents, in respect of each Basket Component, the level of such Basket Component at the Valuation Time on the Valuation Date, as determined by the Calculation Agent. Weighting(k) represents, in respect of each Basket Component, the weight specified in the table below as the weighting in respect of such Basket Component.]</p> <p><i>[If “Asian-out” applies]</i>[The Average Basket Performance represents the arithmetic mean of the Basket Level(t) in respect of each Asian-out Averaging Date and will be calculated as the product of: (i) the quotient of (a) one and (b) the total number of Asian-out Averaging Dates; and (ii) the sum of the value of the Basket Level(t) on each Asian-out Averaging Date. The Basket Level(t), in respect of each Asian-out Averaging Date, represents the sum of the quotient of (i) the level of each Basket Component on such Asian-out Averaging Date at the Specified Time, as determined by the Calculation Agent, and (ii) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). Weighting(k) represents, in respect of each Basket Component, the weight specified in the table below as the weighting in respect of such Basket Component.]</p> <p><i>[if “Lookback-out” applies]</i>[The Max Basket Performance represents the highest of the Basket Levels on the Lookback-out Observation Dates. The Basket Level(t), in respect of each Lookback-out Observation Date, represents the sum of the quotient of (i) the level of each Basket Component on such Lookback-out Observation Date at the Specified Time, as determined by the Calculation Agent, and (ii) the Initial Index Level(k) in respect of such Basket Component, multiplied by its Weighting(k). Weighting(k) represents, in respect of each Basket Component, the weight specified in the table below as the weighting in respect of such Basket Component.]</p> <p>The Basket Strike Level represents the product of: (i) the Strike Level Percentage; and (ii) the Basket Initial Level. | <p><i>[If the type of redemption is Knock-Out Warrant Redemption and the Notes are Single Index Linked Notes, the following will be applicable:]</i></p> <p><b>[Knock-Out Warrant Redemption]</b></p> <p>The Final Redemption Amount applicable to each Note will be calculated as: (i) if no Redemption Barrier Event has occurred, the product of: (a) the Calculation Amount; (b) the CA Factor; [and] (c) the product of the Participation and the greater of (1) 0% and (2) the Performance[; and <i>[if Flexo applies]</i> (d) the Performance XRate]; or (ii) if a Redemption Barrier Event has occurred, the product of: (a) the Calculation Amount; (b) the CA Factor; [and] (c) the Rebate.</p> <p>A Redemption Barrier Event will occur if the Calculation Agent determines that on any Redemption Barrier Event Determination Day the level of the Index at the Specified Time is [greater than][greater than or equal to] the Redemption Barrier(knock-out). A Redemption Barrier Event Determination Day will be <i>[if Final Monitoring applies]</i>[each day specified below as a Redemption Barrier Event Determination Day]<i>[if Continuous Monitoring applies]</i>[each day during the Redemption Barrier Observation Period]. The Redemption Barrier(knock-out) represents the product of (i) the Redemption Barrier(knock-out) Percentage and (ii) the Initial Index Level.</p> <p>The CA Factor will be <i>[if the Notes are not issued in unitised form]</i>[the factor by which the Calculation Amount must be multiplied to reach the Specified Denomination of such Note without any further rounding]<i>[if the Notes are issued in unitised form]</i>[one].</p> |       |                                      |                                      |                                      |                                      |

| <b>D.3</b> | Key information on the key risks that are specific to the Notes | <p><i>Programme summary</i></p> <p>The following key risks may arise in relation to the Index Linked Notes:</p> <p>(a) the value of the Notes and any interest or principal repayment in relation to them may be affected by, but may not necessarily correlate to, movements and fluctuations in market interest rates, the performance of any inflation index and/or the level of an underlying index or component in an underlying basket of indices; (b) the Issuer may enter into activities that present conflicts of interest and adversely affect the value of the Notes; (c) Notes connected to emerging market indices or indices comprised of emerging market securities are likely to be particularly volatile; (d) the timing of changes in index levels may impact the yield on the Notes; and (e) the Issuer may have the option to redeem the Notes early, which may affect their value in the secondary market.</p> <p>In addition, the following key risks may arise which may adversely affect the interest amount and/or redemption amount payable or deliverable in relation to the Notes (as applicable): (a) specified interest rate or periodic increase in the interest rate may not keep pace with prevailing market rates; (b) application of a multiplier or participation factor may magnify the impact of any element having a negative effect, or reduce the impact of any element having a positive effect, on the applicable interest rate and/or redemption amount; (c) interest amounts and redemption amounts may be capped; (d) the Notes may not be principal protected; and (e) any amortised yield may be lower than the market rate (f) the Issuer may convert the applicable interest rate from floating to fixed or vice versa and (g) any element that negatively impacts an interest rate applicable on one date may be reflected in subsequent interest rates determined by reference to such interest rate.</p> <p>Furthermore, the terms of the Notes may provide that: (a) interest may only be payable in respect of the number of days in an interest period on which a specified precondition or preconditions have been met; (b) the interest</p> |

## **RISK FACTORS**

### **General Risk Factors**

#### **Introduction**

This Base Prospectus identifies in a general way the information that a prospective investor should consider prior to making an investment in the Notes. However, a prospective investor should conduct its own thorough analysis (including its own accounting, legal and tax analysis) prior to deciding whether to invest in the Notes as any evaluation of the suitability for an investor of an investment in the Notes depends upon a prospective investor's particular financial and other circumstances, as well as on specific terms of the Notes. This Base Prospectus is not, and does not purport to be, investment advice or an investment recommendation to purchase the Notes. The Issuer, including its branches and any group company, is acting solely in the capacity of an arm's length contractual counterparty and not as a purchaser's financial adviser or fiduciary in any transaction unless the Issuer has agreed to do so in writing. If a prospective investor does not have experience in financial, business and investment matters sufficient to permit it to make such a determination, the investor should consult with its financial adviser prior to deciding to make an investment on the suitability of the Notes. Investors risk losing their entire investment or part of it.

Each prospective investor of Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes (i) is fully consistent with its (or, if it is acquiring the Notes in a fiduciary capacity, the beneficiary's) financial needs, objectives and condition, (ii) complies and is fully consistent with any investment policies, guidelines and restrictions applicable to it (whether acquiring the Notes as principal or in a fiduciary capacity) and (iii) is a fit, proper and suitable investment for it (or, if it is acquiring the Notes in a fiduciary capacity, for the beneficiary). In particular, investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each prospective investor should therefore consult its legal advisers to determine whether and to what extent (i) the Notes are legal investments for it, (ii) the Notes can be used as underlying securities for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Notes.

Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

***Each prospective investor in Notes should refer to the section headed "Risk Factors" in the Issuer Registration Document for a description of those factors which could affect the financial performance of the Issuer and thereby affect the Issuer's ability to fulfil its obligations in respect of Notes issued under this Base Prospectus.***

#### **The Notes may not be a suitable investment for all investors**

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Base Prospectus, any applicable supplement or Final Terms;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;

- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and/or financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate, inflation, equity price and other factors that may affect its investment and its ability to bear the applicable risks.

Notes can be relatively complex financial instruments. Sophisticated institutional investors generally do not purchase financial instruments of this nature as stand-alone investments. They purchase them as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. A potential investor should not invest in such Notes unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

### **Limited liquidity of the Notes**

Even if application is made to list Notes on a stock exchange, there can be no assurance that a secondary market for any of the Notes will develop, or, if a secondary market does develop, that it will provide the holders of the Notes with liquidity or that it will continue for the life of the Notes. A decrease in the liquidity of an issue of Notes may cause, in turn, an increase in the volatility associated with the price of such issue of Notes. Any investor in the Notes must be prepared to hold such Notes for an indefinite period of time or until redemption of the Notes. If any person begins making a market for the Notes, it is under no obligation to continue to do so and may stop making a market at any time. Illiquidity may have a severely adverse effect on the market value of Notes.

### **Counterparty risk exposure**

The ability of the Issuer to make payments under the Notes is subject to general credit risks, including credit risks of borrowers. Third parties that owe the Issuer money, securities or other assets may fail to pay or perform under their obligations. These parties include borrowers under loans granted, trading counterparties, counterparties under swaps and credit and other derivative contracts, agents and other financial intermediaries. These parties may default on their obligations to the Issuer due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons.

### **Credit ratings may not reflect all risks**

The Issuer has a senior debt rating from Standard & Poor's, Moody's and Fitch, details of which are contained in the Issuer Registration Document.

Tranches of Notes issued under this Base Prospectus may be rated or unrated and one or more independent credit rating agencies may assign additional credit ratings to the Notes or the Issuer. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the ratings assigned to the Issuer, the Programme or any Notes already issued.

The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above and other factors that may affect the value of the Notes and the ability of the Issuer to

make payments under the Notes (including, but not limited to, market conditions and funding-related and operational risks inherent to the business of the Issuer). A credit rating is not a recommendation to buy, sell or hold securities. There is no assurance that a rating will remain for any given period of time or that a rating will not be suspended, lowered or withdrawn by the relevant rating agency if, in its judgement, circumstances in the future so warrant.

In the event that a rating assigned to the Notes or the Issuer is subsequently suspended, lowered or withdrawn for any reason, no person or entity is obliged to provide any additional support or credit enhancement with respect to the Notes or the Issuer may be adversely affected, the market value of the Notes is likely to be adversely affected and the ability of the Issuer to make payments under the Notes may be adversely affected.

In addition, the Issuer's bank assets are risk weighted. Downgrades of these assets could result in a higher risk weighting which may result in higher capital requirements and thus a need to deleverage. This may impact net earnings and the return on capital, and may have an adverse impact on the Issuer's financial position and ability to make payments under the Notes.

### **Actions taken by the Calculation Agent may affect the value of Notes**

The Calculation Agent for an issue of Notes is the agent of the Issuer and not the agent of the holders of the Notes. The Calculation Agent is not acting as a fiduciary to any Noteholder. It is possible that the Issuer will itself be the Calculation Agent for certain issues of Notes. The Calculation Agent will make such determinations and adjustments as it deems appropriate, in accordance with the terms and conditions of the specific issue of Notes. In making its determinations and adjustments, the Calculation Agent will be entitled to exercise substantial discretion and may be subject to conflicts of interest in exercising this discretion.

### **Certain considerations regarding hedging**

Prospective purchasers intending to purchase Notes to hedge against the market risk associated with investing in an index (or basket of indices) should recognise the complexities of utilising Notes in this manner. For example, the value of the Notes may not exactly correlate with the value of the index (or basket of indices). Due to fluctuating supply and demand for the Notes, there is no assurance that their value will correlate with movements of the index (or basket of indices).

### **Over-issuance**

As part of its issuing, market-making and/or trading arrangements, the Issuer may issue more Notes than those which are to be subscribed or purchased by third party investors. The Issuer (or any of its affiliates) may hold such Notes for the purpose of meeting any investor interest in the future. Prospective investors in the Notes should therefore not regard the issue size of any Series as indicative of the depth or liquidity of the market for such Series, or of the demand for such Series.

### **The return on an investment in Notes will be affected by charges incurred by investors**

An investor's total return on an investment in Notes will be affected by the level of fees charged to the investor, including fees charged to the investor as a result of the Notes being held in a clearing system. Such fees may include charges for opening accounts, transfers of securities, custody services and fees for payment of principal, interest or other sums due under the terms of the Notes. Investors should carefully investigate these fees before making their investment decision.

### **Potential conflicts of interest; information and past performance**

The Issuer has no fiduciary duties to Noteholders and may take such action or make such determinations under the Notes as it determines appropriate. The Issuer is not under any obligation to hedge its obligations under the Notes or to hedge itself in any particular manner. If the Issuer does decide to hedge

its obligations under the Notes, it is not required to hedge itself in a manner that would (or may be expected to) result in the lowest unwind costs, losses and expenses. For the avoidance of doubt, the Issuer is not obliged at any time to hold any constituent securities of an index to which the Notes may be linked. With respect to any hedging arrangement entered into by the Issuer (or by any affiliate of the Issuer on its behalf), the Issuer will act as principal for its own account and the Issuer's obligations in respect of the Notes exist regardless of the existence or amount of the Issuer's and/or any of its affiliates' exposure to or receipt of any return on any index (or its constituent securities) to which the Notes may be linked. The Issuer and its affiliates may engage in trading activities (including hedging activities) related to any index (or its constituent securities) underlying any Notes and other instruments or derivative products based on or related to any index (or its constituent securities) underlying any Notes for their proprietary accounts or for other accounts under their management. The Issuer and its affiliates may also issue other derivative instruments in respect of any index (or its constituent securities) underlying any Notes. The Issuer and its affiliates may also act as underwriter in connection with future offerings of securities comprised in an index related to an issue of Notes or may act as financial adviser to companies whose securities impact the return on Notes. Such activities could present certain conflicts of interest, could influence the levels of such indices or prices of their constituent securities and could adversely affect the value of such Notes.

The Issuer may have acquired, or during the term of Notes may acquire, non-public information with respect to an index or its constituent securities (or their issuers) underlying Notes which will not be provided to holders of such Notes. The Issuer makes no representation or warranty about, and gives no guarantee of, the performance of an index (or its constituent securities) underlying Notes. Past performance of an index (or its constituent securities) cannot be considered to be a guarantee of, or guide to, future performance.

### **Tax risk**

This Base Prospectus includes general summaries of certain Belgian, Dutch, French, Luxembourg, Polish and United Kingdom tax considerations relating to an investment in the Notes issued by the Issuer and of certain U.S. federal income tax considerations relating to an investment in the Notes issued by the Issuer (see "Taxation"). Such summaries may not apply to a particular holder of Notes or to a particular issue and do not cover all possible tax considerations. In addition, the tax treatment may change before the maturity, exercise or termination date of Notes. Any potential investor should consult its own independent tax adviser for more information about the tax consequences of acquiring, owning and disposing of Notes in its particular circumstances.

### **The proposed financial transactions tax ("FTT")**

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**participating Member States**"). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should, however, be exempt.

Under the Commission's Proposal, the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional Member States may decide to participate.

Prospective holders of Notes are advised to seek their own professional advice in relation to the FTT.

### **Recently announced tax initiatives of newly elected Dutch government**

On 10 October 2017, the four parties that have formed the new Dutch government released their coalition agreement (*regeerakkoord*) 2017-2021 (the “**Coalition Agreement**”). The Coalition Agreement does not include concrete legislative proposals, but instead sets out a large number of policy intentions of the new Dutch government. On 23 February 2018, the Dutch State Secretary for Finance published a letter with an annex containing further details on the government's policy intentions against tax avoidance and tax evasion.

One of the policy intentions described in the Coalition Agreement and the annex to the letter is the introduction of a withholding tax on interest payments made to beneficiaries in low-tax jurisdictions or non-cooperative jurisdictions as of 2021. The coalition agreement and the annex to the letter together suggest that this interest withholding tax would apply to certain payments made by a Dutch entity directly or indirectly to a group entity in a low tax or non-cooperative jurisdiction. Although unlikely, it cannot be ruled out completely that it will have a wider application and, as such, it could potentially be applicable to payments under the Notes. However, many aspects of this policy intention remain unclear. As at the date of this Prospectus, no definition has been provided of what is considered to be a low-tax jurisdiction and it is not clear whether the withholding tax obligation will extend to publicly listed bonds.

### **Insolvency risk**

In the event that the Issuer becomes insolvent, insolvency proceedings will be generally governed by the insolvency laws of the Issuer's place of incorporation, which is The Netherlands. The insolvency laws of the Issuer's place of incorporation may be different from the insolvency laws of an investor's home jurisdiction and the treatment and ranking of holders of Notes issued by the Issuer and the Issuer's other creditors and shareholders under the insolvency laws of the Issuer's place of incorporation may be different from the treatment and ranking of holders of those Notes and the Issuer's other creditors and shareholders if the Issuer was subject to the insolvency laws of the investor's home jurisdiction.

### **Changes in law**

The conditions of the Notes and the ratings which may be assigned to them are based on the law of the jurisdiction governing such Notes in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to the law in such jurisdiction or administrative practice in such jurisdiction after the date of this Base Prospectus.

### **Bail-In**

As more fully described in the section entitled “Risk Factors” in the Issuer Registration Document which is incorporated by reference into this Base Prospectus, including without limitation under the heading “Bank Recovery and Resolution Regimes”, Notes that may be issued under the Programme may become subject to actions that can be taken or measures that can be applied by resolution authorities if a bank or insurer experiences serious financial problems or if the stability of the financial system is in serious and immediate danger as a result of the situation of a Dutch financial institution (for the purpose hereof including a relevant holding company).

In certain circumstances, competent authorities have the power to, *inter alia*, transfer liabilities of an entity to third parties or to a bridge bank and expropriate securities issued by failing financial institutions. Holders of debt securities of a bank subject to resolution could also be affected by issuer substitution or replacement, transfer of debt, expropriation, modification of terms and/or suspension or termination of listings. In addition, in certain circumstances, competent authorities also have the power to convert relevant capital instruments or eligible liabilities into shares and cancel all or a portion of the principal amount of, or interest on, certain unsecured liabilities (which could include certain securities that have been or will be issued by the Issuer) of a failing financial institution and/or to convert certain debt claims (which could include certain securities that have been or will be issued by the Issuer) into another security, including ordinary shares. Relevant capital instruments may also be written down or converted (whether at the point of non-viability when the resolution authority determines that otherwise the bank will no longer be viable, or as taken together with a resolution action). None of these actions would be expected to constitute an event of default under those securities entitling holders to seek repayment. Other powers of the competent authorities may be to amend the maturity date and/or any interest payment date of debt instruments or other eligible liabilities of the relevant financial institution, including by suspending payment for a temporary period, or to amend the interest amount payable under such instruments. None of these actions would be expected to constitute an event of default under those debt instruments or other eligible liabilities entitling holders to seek repayment. The application of actions, measures or powers as meant in this section may adversely affect the value of the relevant Notes or result in an investor in the relevant Notes losing all or some of his investment. Each prospective investor in Notes should refer to the section headed “Risk Factors” in the Issuer Registration Document, including without limitation under the heading “Bank Recovery and Resolution Regimes” in the Issuer Registration Document.

On 23 November 2016, the European Commission published legislative proposals to amend and supplement certain provisions of, *inter alia*, the Capital Requirements Directive, the Capital Requirements Regulation, the Bank Recovery and Resolution Directive and the Single Resolution Mechanism Regulation. The proposals are wide-ranging and may have significant effects on the Issuer (including with regard to the total loss absorbing capacity – TLAC – or the minimum requirement own funds and eligible liabilities – MREL – it must maintain) and for the Notes (including with regard to their redeemability, their ranking in insolvency and their being at risk of being bailed-in). The proposals also contemplate that member states adopt legislation to create a new class of so-called non-preferred senior debt. Such debt would be bail-inable during resolution only after capital instruments but before other senior liabilities. It is uncertain whether the proposals will come into effect, and if so, whether that will be in their current form. On 5 December 2017, a public consultation was launched by the Dutch Ministry of Finance for a draft legislative proposal on the Dutch implementation of Directive (EU) 2017/2399 on the ranking of unsecured debt instruments in insolvency hierarchy. The consultation closed on 9 January 2018. According to the draft legislative proposal and the draft explanatory notes thereto, it is contemplated that a new provision is added to the Dutch Bankruptcy Act (*Faillissementswet*) introducing a new category of “non-preferred” senior debt obligations. During the legislative process, the proposal may be amended. Until the proposal has become law, it is uncertain how this will affect the Issuer or holders of its securities including the Notes.

### **Risk Factors relating to the Notes**

***In addition to the risks identified in “Risk Factors - General Risk Factors” above and the Issuer Registration Document, potential investors in Notes should consider the following:***

## **Risks relating to the structure of a particular issue of Notes**

A wide range of Notes may be issued under this Base Prospectus. A number of these Notes may have features which contain particular risks for potential investors. Set out below is a description of the most common such features:

### ***Notes subject to optional redemption by the Issuer***

An optional redemption feature in any Notes may negatively impact their market value. During any period when the Issuer may elect to redeem Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

### ***General risks relating to the Index Linked Notes***

Principal and/or interest on the Notes will be determined by reference to the level of a particular index (in the case of Single Index Linked Notes) or the levels of indices in a basket of indices (in the case of Basket Index Linked Notes). Potential investors should be aware of the following risks:

1. *Volatility*

The market price of the Notes may be very volatile. The market price of the Notes at any time is likely to be affected primarily by changes in the level of the Index to which the Notes are linked. It is impossible to predict how the level of the Index will vary over time.

2. *Interest rate risks*

The Notes may also involve interest rate risk, including the risk of Noteholders receiving no interest.

3. *Currency and time expectation*

Payment of principal or interest may occur at a different time or in a different currency than expected.

4. *Loss of principal*

Investors may lose all or a substantial portion of their principal.

5. *Non-correlation*

The level of an Index may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities, indices or funds, resulting in principal or interest payable that also may not correlate with such changes.

6. *Emerging Markets*

An Index connected to emerging markets may be subject to significant fluctuations attributable to, among other things, nationalisation, expropriation or taxation, currency devaluation, foreign exchange control, political, social or diplomatic instability or governmental restrictions. The capital markets in emerging market countries have substantially less volume, and are generally less liquid and more volatile, than those in more developed markets. As a result, an investor in Notes with an Index connected to emerging markets should be prepared to hold such Notes for an indefinite period and to experience potentially sharp changes in the value of such Notes throughout that period. Disclosure and

regulatory requirements could be less stringent than in other markets, with a low level of monitoring and limited and uneven enforcement of existing regulations. An investor in Notes with an Index connected to emerging markets may therefore experience a decrease in the value of such Notes as a result of market or other developments that are less likely in more stringently regulated markets.

7. *Multipliers and leverage factors*

If the level of an Index is applied to Notes in conjunction with a multiplier greater than one or contains some other leverage factor, the effect of changes in the level of an Index on principal or interest payable likely will be magnified.

8. *Impact of changes in yield*

The timing of changes in the level of an Index may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in the level of an Index, the greater the effect on yield.

9. *Limited maturity*

Notes are of limited maturity and, unlike direct investments in the securities comprised in an index, investors are not able to hold them beyond the Maturity Date in the expectation of a recovery in the level of the underlying.

10. *Discount to market value*

The level at which an investor will be able to sell Notes prior to the Maturity Date may be at a substantial discount to the market value of the Notes at the time they are issued depending on the performance of the Index.

11. *Market risks*

There are market risks associated with an actual investment in the constituents of an index and though the Notes do not create an actual interest in such constituents, the return on the Notes generally involve many of the same associated risks as an actual investment in such constituents. Potential investors in the Notes should understand that the Issuer has not purported and does not purport to be a source of information concerning the market risks associated with such constituents.

12. *Conflicts of Interest*

The Issuer may invest in the constituents of an index for its own account, and may exercise its discretion in respect of matters concerning its holdings of such interests as it sees fit, without regard to the interests of any investor in the Notes.

13. *Factors affecting the performance of Indices may adversely affect the value of the Notes*

Indices are comprised of a synthetic portfolio of shares or other assets, and as such, the performance of an Index is dependent upon the macroeconomic factors relating to the shares or other components that comprise such Index, which may include interest and price levels on the capital markets, currency developments, political factors and (in the case of shares) company-specific factors such as earnings position, market position, risk situation, ability to innovate, ability to retain key personnel, shareholder structure and dividend distribution policy.

14. *Actions by the sponsor of an Index may adversely affect the Notes*

The sponsor of an Index will have no involvement in the offer and sale of the Notes and will have no obligation to any purchaser of such Notes. The sponsor of an Index may take any actions in respect of

such Index without regard to the interests of the purchasers of the Notes, and any of these actions could adversely affect the market value of the Notes.

15. *Returns on Notes will not be the same as a direct investment in futures or options on the Index or in the underlying components of the Index*

An investment in the Notes is not the same as a direct investment in futures or option contracts on the Index nor any or all of the constituents included in each Index. In particular, investors may not benefit directly from any positive movements in an Index nor will investors benefit from any profits made as a direct result of an investment in the components of an Index. Accordingly, changes in the performance of an Index may not result in comparable changes in the market value of the Notes. Further, Noteholders may not receive dividends issued by companies included in an Index.

16. *Loss of return of dividends in respect of Notes linked to Indices*

The rules of an Index might stipulate that dividends distributed on its components do not lead to a rise in the index level, for example, if it is a "price" index. As a result, Noteholders of Notes linked to such Index would lose the benefit of any dividends paid by the components of the Index and would underperform a position where they invested directly in such components or where they invested in a "total return" version of such Index. Even if the rules of the relevant underlying Index provide that distributed dividends or other distributions of the components are reinvested in the Index and therefore result in raising its level, in some circumstances the dividends or other distributions may not be fully reinvested in such Index (for example, where the relevant Index is calculated based on the maximum withholding tax rates applicable to dividends received by institutional investors who are not resident in the same country as the remitting company and who do not benefit from double taxation treaties).

17. *A change in the composition or discontinuance of an Index could have a negative impact on the value of the Notes*

The sponsor of an Index can add, delete or substitute the components of such Index or make other methodological changes that could change the level of one or more components. The changing of the components of an Index may affect the level of such Index as a newly added component may perform significantly worse or better than the component it replaces, which in turn may adversely affect the value of the Notes. The sponsor of an Index may also alter, discontinue or suspend calculation or dissemination of such Index. The sponsor of an Index will have no involvement in the offer and sale of the Notes and will have no obligation to any investor in such Notes. The sponsor of an Index may take any actions in respect of such Index without regard to the interests of the investor in the Notes, and any of these actions could have an adverse effect on the value of the Notes.

18. *Occurrence of Index adjustment events*

Upon the Calculation Agent determining that one or more adjustment events has occurred in relation to an Index, the Issuer has the discretion to make certain determinations and adjustments to account for such event including to (a) make adjustments to the terms of the Notes, and/or (b) cause an early termination of the Notes, any of which determinations may have an adverse effect on the value of the Notes.

#### ***Variable Interest Rate Notes with a multiplier or other leverage factor***

The Issuer may issue Notes with variable interest rates. Such Notes can be volatile investments. If they are structured to include multipliers or other leverage factors, or caps or floors, or any combination of those features, their market values may be even more volatile than those for securities that do not include those features.

***Fixed Rate Notes***

The Issuer may issue Fixed Rate Notes. Such Notes will bear interest at a fixed Rate of Interest, which remains constant during the life of the Notes. Any investors holding these Notes will be subject to the risk that any subsequent increases in market interest rates may adversely affect the real return on the Notes (and the value of the Notes).

***Floating Rate Notes***

The Issuer may issue Floating Rate Notes. Such Notes will bear interest at a floating Rate of Interest, which will be subject to market fluctuations in interest rates. In addition, the floating Rate of Interest at any time may be lower than the rates on other Notes.

***Zero Coupon Notes***

The Issuer may issue Zero Coupon Notes. Such Notes will bear no interest and an investor will receive no return on the Notes until redemption. Any investors holding these Notes will be subject to the risk that the amortised yield in respect of the Notes may be less than market rates.

***Tailor-Made Interest Notes***

The Issuer may issue Tailor-Made Interest Notes. Such Notes will bear interest at a variable Rate of Interest based upon an Underlying Rate(t), which will be subject to market fluctuations, and an Underlying Margin(t) as set out in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

In calculating the Rate of Interest payable, a Multiplier(t) is applied to the Underlying Rate(t). The Multiplier(t) will be specified in the applicable Final Terms. If the Multiplier(t) is higher than 100%, the investor will participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

Following negative performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

Finally, the Rate of Interest will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of (i) the product of (1) the Multiplier(t) and (2) the Underlying Rate(t) and (ii) the Underlying Margin(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

***Step-Up Interest Notes***

The Issuer may issue Step-Up Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, which increases periodically during the life of the Notes by the Step-Up(t), as specified in the applicable Final Terms (other than if such Variable Rate Interest Period is the first Interest Period, for which the Notes will bear interest at a fixed Rate of Interest). Any investors holding these Notes will be subject to the risk that any periodic increases in the Rate of Interest for the Notes may not keep pace with any increase in market interest rates, with the consequence that the real return on the Notes (and the value of the Notes) will fall.

### ***Floater Interest Notes***

The Issuer may issue Floater Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based upon an Underlying Rate(t), which will be subject to market fluctuations, and an Underlying Margin(t), as set out in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

In calculating the Rate of Interest in respect of any Variable Rate Interest Period, a Multiplier(t) is applied to the Underlying Rate(t). The Multiplier(t) will be specified in the applicable Final Terms. If the Multiplier(t) is higher than 100%, the investor will participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

Following negative performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of (i) the product of (1) the Multiplier(t) and (2) the Underlying Rate(t) and (ii) the Underlying Margin(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***Floater with Lock-In Interest Notes***

The Issuer may issue Floater with Lock-In Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based (subject to the Underlying Rate(t) for an Interest Payment Date(t) meeting the Lock-In Criterion with respect to the Lock-In(t)) upon an Underlying Rate(t), which will be subject to market fluctuations, and an Underlying Margin(t), as specified in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

In calculating the Rate of Interest in respect of any Variable Rate Interest Period (i) in respect of which the Underlying Rate(t) does not meet the Lock-In Criterion with respect to the Lock-In(t) (each as specified in the applicable Final Terms) and (ii) where no previous Underlying Rate(t) has met the Lock-In Criterion with respect to the Lock-In(t), a Multiplier(t) is applied to the Underlying Rate(t) and such Rate of Interest is capped at the Cap(t). Both the Multiplier(t) and the Cap(t) will be specified in the applicable Final Terms. If the Multiplier(t) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). To the extent the sum of (i) the product of (1) the Multiplier(t) and (2) the Underlying Rate(t) and (ii) the Underlying Margin(t) is greater

than the Cap(t), investors will not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

Following negative performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

If the Underlying Rate(t) meets the Lock-In Criterion with respect to the Lock-In(t), then the Rate of Interest payable in respect of such Interest Payment Date(t) and all subsequent Interest Payment Dates, regardless of the Underlying Rate(t) on such subsequent Interest Payment Dates, will be the Rate of Interest(Lock-In)(t), as set out in the applicable Final Terms. Such Rate of Interest(Lock-In)(t) may be less than the rate that would have been payable in respect of the Notes had the Underlying Rate(t) not met the Lock-In Criterion.

### ***Reverse Floater Interest Notes***

The Issuer may issue Reverse Floater Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, equal to the Fix(t), as specified in the applicable Final Terms, minus the Underlying Rate(t) (multiplied by a Multiplier(t) specified in the applicable Final Terms), which will be subject to market fluctuations. The market values of those Notes typically are more volatile than market values of other conventional floating rate debt securities based on the same reference rate (and with otherwise comparable terms) as the Underlying Rate(t). Reverse Floater Interest Notes are more volatile because an increase in the Underlying Rate(t) not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

As a Multiplier(t) is applied to the Underlying Rate(t), if the Multiplier(t) is higher than 100%, the positive performance of the Underlying Rate(t) will be magnified, thereby reducing the interest rate of the Notes even further. If the Multiplier(t) is less than 100%, any negative performance of the Underlying Rate(t) will be scaled down.

Following positive performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the difference when the Underlying Rate(t) (multiplied by the Multiplier(t)) is subtracted from the Fix(t) is greater than the Cap(t), investors may not benefit from the full extent of any negative performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***Ratchet Floater Interest Notes***

The Issuer may issue Ratchet Floater Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed Rate of Interest(Fixed)(t) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

#### ***“Ratchet Floor without Cap”***

If the Final Terms specify that “Ratchet Floor without Cap” will be applicable, the Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period. The Rate of Interest in respect of an Interest Payment Date(t) will be the greater of (i) the sum of (1) the product of (a) the Multiplier1(t) and

(b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t) (each as specified in the applicable Final Terms) and (ii) the sum of (1) the product of (a) the Multiplier2(t) and (b) the Underlying Rate(t) and (2) the Underlying Margin(t) (each as specified in the applicable Final Terms).

If the Multiplier1(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period. This will be the case where the amount of the Ratchet in the current Interest Period is less than the product of (x) 100% minus Multiplier1(t) and (y) the Rate of Interest in respect of the previous Interest Payment Date(t) and the Underlying Rate and/or the Underlying Margin has fallen. Multiplier1(t) may even be zero.

If the Multiplier2(t) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier2(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). Multiplier2(t) may even be zero.

In addition, the Underlying Margin(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

Any investors holding these Notes will be subject to the risk that any periodic increases in the Rate of Interest for the Notes may not keep pace with any increase in market interest rates, with the consequence that the real return on the Notes (and the value of the Notes) will fall.

*“Ratchet Floor with Cap”*

If the Final Terms specify that “Ratchet Floor with Cap” will be applicable, the Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period. The Rate of Interest in respect of an Interest Payment Date(t) will be the greater of (i) the sum of (1) the product of (a) the Multiplier1(t) and (b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t) (each as specified in the applicable Final Terms) and (ii) the sum of (1) the product of (a) the Multiplier2(t) and (b) the Underlying Rate(t) and (2) the Underlying Margin(t) (each as specified in the applicable Final Terms). Such variable Rate of Interest will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent that (i) or (ii) above is greater than the Cap(t), investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

If the Multiplier1(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period. This will be the case where the amount of the Ratchet in the current Interest Period is less than the product of (x) 100% minus the Multiplier1(t) and (y) the Rate of Interest in respect of the previous Interest Payment Date(t) and the Underlying Rate and/or the Underlying Margin has fallen. Multiplier1(t) may even be zero.

If the Multiplier2(t) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier2(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). Multiplier2(t) may even be zero.

In addition, the Underlying Margin(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

Any investors holding these Notes will be subject to the risk that any periodic increases in the Rate of Interest for the Notes may not keep pace with any increase in market interest rates, with the consequence that the real return on the Notes (and the value of the Notes) will fall.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. Investors may therefore not benefit from the full extent of any positive performance in the Underlying Rate(t) as the Rate of Interest will be capped.

*“Ratchet Cap without Floor”*

If the Final Terms specify that “Ratchet Cap without Floor” will be applicable, the Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period.

The Rate of Interest in respect of the first Interest Payment Date(t) will be based upon an Underlying Rate(t) (multiplied by a Multiplier2(t) specified in the applicable Final Terms), which will be subject to market fluctuations, and an Underlying Margin(t), as set out in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

The Rate of Interest in respect of all subsequent Interest Payment Dates will be the lesser of (i) the sum of (1) the product of (a) the Multiplier1(t) and (b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t) (each as specified in the applicable Final Terms) and (ii) the sum of (1) the product of (a) the Multiplier2(t) and (b) the Underlying Rate(t) and (2) the Underlying Margin(t) (each as specified in the applicable Final Terms). As a result, the Rate of Interest in respect of the second and all subsequent Variable Rate Interest Periods will be capped at the sum of (i) the product of (1) the Multiplier1(t) and (2) the Rate of Interest in respect of the previous Interest Payment Date(t) and (ii) the Ratchet(t).

Investors will therefore not benefit from any increase in the Underlying Rate (as multiplied by the Multiplier2(t)) and the Underlying Margin to the extent that these exceed the sum of (1) the product of (a) Multiplier1(t) and (b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t).

If the Multiplier1(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period. This will be the case where the amount of the Ratchet in the current Interest Period is less than the product of (x) 100% minus the Multiplier1(t) and (y) the Rate of Interest in respect of the previous Interest Payment Date(t) or where the value of the Underlying Rate (as multiplied by the Multiplier2(t)) and the Underlying Margin(t) has fallen as compared with the previous Interest Period. Multiplier1(t) may even be zero.

If the Multiplier2(t) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier2(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). Multiplier2(t) may even be zero.

In addition, the Underlying Margin(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

Any investors holding these Notes will be subject to the risk that any periodic increases in the Rate of Interest for the Notes may not keep pace with any increase in market interest rates, with the consequence that the real return on the Notes (and the value of the Notes) will fall.

*“Ratchet Cap with Floor”*

If the Final Terms specify that “Ratchet Cap with Floor” will be applicable, the Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period.

The Rate of Interest in respect of the first Interest Payment Date(t) will be based upon an Underlying Rate(t) (multiplied by a Multiplier2(t) specified in the applicable Final Terms), which will be subject to market fluctuations, and an Underlying Margin(t), as set out in the applicable Final Terms, which may be less

favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

The Rate of Interest in respect of all subsequent Interest Payment Date(t) will be the lesser of (i) the sum of (1) the product of (a) the Multiplier1(t) and (b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t) (each as specified in the applicable Final Terms) and (ii) the sum of (1) the product of (a) the Multiplier2(t) and (b) the Underlying Rate(t) and (2) the Underlying Margin(t) (each as specified in the applicable Final Terms). As a result, the Rate of Interest in respect of the second and all subsequent Variable Rate Interest Periods will be capped at the sum of (i) the product of (1) the Multiplier1(t) and (2) the Rate of Interest in respect of the previous Interest Payment Date(t) and (ii) the Ratchet(t).

Investors will therefore not benefit from any increase in the Underlying Rate (as multiplied by Multiplier2(t)) and the Underlying Margin to the extent that these exceed the sum of (1) the product of (a) the Multiplier1(t) and (b) the Rate of Interest in respect of the previous Interest Payment Date(t) and (2) the Ratchet(t).

If the Multiplier1(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period. This will be the case where the amount of the Ratchet in the current Interest Period is less than the product of (x) 100% minus the Multiplier1(t) and (y) the Rate of Interest in respect of the previous Interest Payment Date(t) or where the value of the Underlying Rate (as multiplied by the Multiplier2(t)) and the Underlying Margin(t) has fallen as compared with the previous Interest Period. Multiplier1(t) may even be zero.

If the Multiplier2(t) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier2(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). Multiplier2(t) may even be zero.

In addition, the Underlying Margin(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

Any investors holding these Notes will be subject to the risk that any periodic increases in the Rate of Interest for the Notes may not keep pace with any increase in market interest rates, with the consequence that the real return on the Notes (and the value of the Notes) will fall.

Following negative performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

### ***Switchable (Fixed to Floating) Interest Notes***

The Issuer may issue Switchable (Fixed to Floating) Interest Notes. Such Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate. The Issuer's ability to convert the interest rate will affect the secondary market trading and the market value generally of the Notes, since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the margin on the Switchable (Fixed to Floating) Interest Notes may be less favourable than then prevailing margins on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes.

Where the Issuer has elected to convert from a fixed rate to a floating rate, the Notes will bear interest at a variable Rate of Interest(Floating)(t) in respect of any Interest Period commencing on and including the Interest Payment Date specified in the election notice or, if no date is specified, in respect of the Interest Period commencing on and including the Interest Payment Date following the exercise by the Issuer of such election, and for each subsequent Interest Period thereafter up to and including the Interest Period ending on

(but excluding) the final Interest Payment Date. During such Variable Rate Interest Period, the Notes will bear interest at a variable Rate of Interest(Floating)(t) based upon an Underlying Rate(t) (multiplied by a Multiplier(t) specified in the applicable Final Terms), which will be subject to market fluctuations, and an Underlying Margin(t), as set out in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

Where the Issuer has not elected to convert from a fixed rate to a floating rate, the Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)). During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

If the Multiplier(t) is higher than 100%, the investor will participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

Following negative performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the product of the Underlying Rate(t) (multiplied by the Multiplier(t)) and the Underlying Margin(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

#### ***Switchable (Floating to Fixed) Interest Notes***

The Issuer may issue Switchable (Floating to Fixed) Interest Notes. Such Notes may bear interest at a rate that the Issuer may elect to convert from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market trading and the market value generally of the Notes, since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing market rates.

Where the Issuer has elected to convert from a floating rate to a fixed rate, the Notes will bear interest at a fixed Rate of Interest(Fixed)(t) in respect of any Interest Period commencing on and including the Interest Payment Date specified in the election notice or, if no date is specified, in respect of the Interest Period commencing on and including the Interest Payment Date following the exercise by the Issuer of such election, and for each subsequent Interest Period thereafter up to and including the Interest Period ending on (but excluding) the final Interest Payment Date. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

Where the Issuer has not elected to convert from a floating rate to a fixed rate, the Notes will bear interest at a variable Rate of Interest(Floating)(t). The Notes will bear interest at a variable Rate of Interest(Floating)(t), during any Variable Rate Interest Period, based upon an Underlying Rate(t) (multiplied by a Multiplier(t) specified in the applicable Final Terms), which will be subject to market fluctuations, and an Underlying Margin(t), as set out in the applicable Final Terms, which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the Multiplier(t) is higher than 100%, the investor will participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the

Multiplier(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

Finally, the Rate of Interest(Floating)(t) in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the product of the Underlying Rate(t) (multiplied by the Multiplier(t)) and the Underlying Margin(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

#### ***Steepener Interest Notes***

The Issuer may issue Steepener Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based upon a Spread(t) (multiplied by a Multiplier(t) specified in the applicable Final Terms), which is calculated as the difference when the Underlying Rate2(t) is subtracted from the Underlying Rate1(t). As the Rate of Interest is determined by reference to a spread, such Rate of Interest may not reflect increases in market interest rates.

In the case of a positive performance by both Underlying Rate2(t) and Underlying Rate1(t), the Spread(t) will decrease between Interest Payment Dates if Underlying Rate2(t) performs more favourably than Underlying Rate1(t). If there is a positive performance by Underlying Rate2(t) and a negative performance by Underlying Rate1(t), then such decrease in the Spread(t) will be more pronounced and not simply proportionate to any negative performance of Underlying Rate1(t).

If the Multiplier(t) is higher than 100%, the investor may participate disproportionately in any increase in the Spread(t), but any decrease in the Spread(t) will also be magnified. If the Multiplier(t) is less than 100%, any decrease in the Spread(t) will be scaled down, but investors will not benefit from the full extent of any increase in the Spread(t). Following negative performance of the Underlying Rate1(t) compared to Underlying Rate2(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t).

Finally, the Rate of Interest calculated in accordance with the above will be capped at the Cap(t). To the extent the product of the Multiplier(t) and the Spread(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate1(t) compared to Underlying Rate2(t) as the Rate of Interest will be capped.

#### ***Steepener with Lock-In Interest Notes***

The Issuer may issue Steepener Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, at the Reference Rate(t) (subject to the Reference Rate(t) for an Interest Payment Date(t) meeting the Lock-In Criterion with respect to the Lock-In(t)). The Reference Rate(t) is based upon a Spread(t) (multiplied by a Multiplier(t) specified in the applicable Final Terms), calculated as the difference when the Underlying Rate2(t) is subtracted from the Underlying Rate1(t). As the Rate of Interest is determined by reference to a spread, such Rate of Interest may not reflect increases in market interest rates. In the case of a positive performance by both Underlying Rate2(t) and Underlying Rate1(t), the Spread(t) will decrease between Interest Payment Dates if Underlying Rate2(t) performs more favourably than Underlying Rate1(t). If there is

a positive performance by Underlying Rate2(t) and a negative performance by Underlying Rate1(t), then such decrease in the Spread(t) will be more pronounced and not simply proportionate to any negative performance of Underlying Rate1(t).

In calculating the Rate of Interest in respect of any Variable Rate Interest Period (i) in respect of which the Reference Rate(t) does not meet the Lock-In Criterion with respect to the Lock-In(t) (each as specified in the applicable Final Terms) and (ii) where no previous Reference Rate(t) has met the Lock-In Criterion with respect to the Lock-In(t), a Multiplier(t) is applied to the Spread(t). If the Multiplier(t) is higher than 100%, the investor will participate disproportionately in any increase in the Spread(t), but any decrease in the Spread(t) will also be magnified. If the Multiplier(t) is less than 100%, any decrease in the Spread(t) will be scaled down, but investors will not benefit from the full extent of any increase in the Spread(t). Following negative performance of the Underlying Rate1(t) compared to Underlying Rate2(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t).

The Rate of Interest calculated in accordance with the above will be capped at the Cap(t). To the extent the product of the Multiplier(t) and the Spread(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate1(t) compared to Underlying Rate2(t) as the Rate of Interest will be capped.

If the Reference Rate(t) meets the Lock-In Criterion with respect to the Lock-In(t), then the Rate of Interest payable in respect of such Interest Payment Date(t) and all subsequent Interest Payment Dates, regardless of the Underlying Rate1(t) and Underlying Rate2(t) on such subsequent Interest Payment Dates, will be the Rate of Interest(Lock-In)(t), as set out in the applicable Final Terms. Such Rate of Interest(Lock-In)(t) may be less than the rate that would have been payable in respect of the Notes, had the Reference Rate(t) not met the Lock-In Criterion.

#### ***Range Accrual(Rates) Interest Notes***

The Issuer may issue Range Accrual(Rates) Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed Rate of Interest during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) meets the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier1(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin1(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Range Accrual Rate”.

The total number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) or does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms) is then divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a

Multiplier2(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin2(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Inverse Range Accrual Rate”.

The Rate of Interest applicable to any Variable Rate Interest Period will be the sum of the Range Accrual Rate and the Inverse Range Accrual Rate.

The Underlying Rate(t) and the Range Accrual Reference Rate(t) will be subject to market fluctuations. The Underlying Margin1(t) and Underlying Margin2(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the relevant multiplier (being either “Multiplier1(t)” or “Multiplier2(t)”) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). The relevant multiplier may even be zero.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of Range Accrual Rate and the Inverse Range Accrual Rate is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

#### ***Range Accrual(Spread) Interest Notes***

The Issuer may issue Range Accrual(Spread) Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed Rate of Interest during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Spread(t) meets the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier1(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin1(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Range Accrual Rate”.

The Range Accrual Reference Spread(t) is calculated as the difference when the Range Accrual Reference Rate2(t) is subtracted from Range Accrual Reference Rate1(t).

The total number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Spread(t) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) or does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms) is then divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier2(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin2(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Inverse Range Accrual Rate”.

The Rate of Interest applicable to any Variable Rate Interest Period will be the sum of the Range Accrual Rate and the Inverse Range Accrual Rate.

As the Rate of Interest is determined by reference to a spread, such Rate of Interest may not reflect increases in market interest rates.

In the case of a positive performance by both Range Accrual Reference Rate2(t) and Range Accrual Reference Rate1(t), the Range Accrual Reference Spread(t) will decrease between Interest Payment Dates if Range Accrual Reference Rate2(t) performs more favourably than Range Accrual Reference Rate1(t). If there is a positive performance by Range Accrual Reference Rate2(t) and a negative performance by Range Accrual Reference Rate1(t), then such decrease in the Range Accrual Reference Spread(t) will be more pronounced and not simply proportionate to any negative performance of Range Accrual Reference Rate1(t). As a result, the Range Accrual Reference Spread(t) may not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms). Conversely, if there is a positive performance by Range Accrual Reference Rate1(t) and a negative performance by Range Accrual Reference Rate2(t), then such increase in the Range Accrual Reference Spread(t) will be more pronounced and not simply proportionate to any positive performance of Range Accrual Reference Rate1(t), resulting in the Range Accrual Reference Spread(t) not meeting the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms).

The Underlying Rate(t), Range Accrual Reference Rate1(t) and Range Accrual Reference Rate2(t) will be subject to market fluctuations. The Underlying Margin1(t) and Underlying Margin2(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the relevant multiplier (being either “Multiplier1(t)” or “Multiplier2(t)”) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). The relevant multiplier may even be zero.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of that Range Accrual Rate and the Inverse Range Accrual Rate is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***Inverse Range Accrual Interest Notes***

The Issuer may issue Inverse Range Accrual Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed Rate of Interest during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) or does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier1(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin1(t), as

specified in the applicable Final Terms. The resultant rate is referred to here as the “Inverse Range Accrual Rate”.

The total number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) meets the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms) is then divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier2(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin2(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Range Accrual Rate”.

The Rate of Interest applicable to any Variable Rate Interest Period will be the sum of the Inverse Range Accrual Rate and the Range Accrual Rate.

The Underlying Rate(t) and the Range Accrual Reference Rate(t) will be subject to market fluctuations. The Underlying Margin1(t) and Underlying Margin2(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the relevant multiplier (being either Multiplier1(t) or Multiplier2(t)) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). The relevant multiplier may even be zero.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of the Inverse Range Accrual Rate and the Range Accrual Rate is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***KO Range Accrual Interest Notes***

The Issuer may issue KO Range Accrual Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period depends on whether the Range Accrual Reference Rate(t) met the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and met the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms) on every Range Accrual Observation Date during the Range Accrual Observation Period.

Where on all the Range Accrual Observation Dates in the Range Accrual Observation Period the Range Accrual Reference Rate(t) met the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and met the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms), the Rate of Interest applicable to the Notes during the relevant Variable Rate Interest Period will be the sum of (i) the Underlying Rate(t) (multiplied by a

Multiplier1(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin1(t), as specified in the applicable Final Terms.

If the Range Accrual Reference Rate(t) does not fall within the designated range on all days in the relevant Range Accrual Observation Period, the Range Accrual Rate for the relevant Interest Period will be zero.

If the Range Accrual Reference Rate(t) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) or does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms), on every Range Accrual Observation Date during the Range Accrual Observation Period, the Rate of Interest applicable to the Notes during the relevant Variable Rate Interest Period will be the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier2(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin2(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Inverse Range Accrual Rate”.

The Underlying Rate(t) and the Range Accrual Reference Rate(t) will be subject to market fluctuations. The Underlying Margin1(t) and Underlying Margin2(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the relevant multiplier (being either Multiplier1(t) or Multiplier2(t)) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). The relevant multiplier may even be zero.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the applicable Rate of Interest (being either the Range Accrual Rate or the Inverse Range Accrual Rate) is greater than the Cap(t), investors will not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***Dual Range Accrual Interest Notes***

The Issuer may issue Dual Range Accrual Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which (i) the Range Accrual Reference Factor1(t) meets the Range Accrual Floor Criterion1 with respect to the Range Accrual Floor1(t) (if “Range Accrual Floor1(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion1 with respect to the Range Accrual Cap1(t) (if “Range Accrual Cap1(t)” is specified as applicable in the applicable Final Terms) and (ii) Range Accrual Reference Factor2(t) meets the Range Accrual Floor Criterion2 with respect to the Range Accrual Floor2(t) (if “Range Accrual Floor 2(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion2 with respect to the Range Accrual Cap2(t) (if “Range Accrual Cap2(t)” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier1(t), as

specified in the applicable Final Terms), and (ii) an Underlying Margin1(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Range Accrual Rate”.

The total number of Range Accrual Observation Dates in the Range Accrual Observation Period on which (i) the Range Accrual Reference Factor1(t) does not meet the Range Accrual Floor Criterion1 with respect to the Range Accrual Floor1(t) (if “Range Accrual Floor1(t)” is specified as applicable in the applicable Final Terms) and does not meet the Range Accrual Cap Criterion1 with respect to the Range Accrual Cap1(t) (if “Range Accrual Cap1(t)” is specified as applicable in the applicable Final Terms) or (ii) Range Accrual Reference Factor2(t) does not meet the Range Accrual Floor Criterion2 with respect to the Range Accrual Floor2(t) (if “Range Accrual Floor2(t)” is specified as applicable in the applicable Final Terms) and does not meet the Range Accrual Cap Criterion2 with respect to the Range Accrual Cap2(t) (if “Range Accrual Cap2(t)” is specified as applicable in the applicable Final Terms) is then divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period and the resultant figure is multiplied by a rate calculated as the sum of (i) the Underlying Rate(t) (multiplied by a Multiplier2(t), as specified in the applicable Final Terms), and (ii) an Underlying Margin2(t), as specified in the applicable Final Terms. The resultant rate is referred to here as the “Inverse Range Accrual Rate”.

The Rate of Interest applicable to any Variable Rate Interest Period will be the sum of the Range Accrual Rate and the Inverse Range Accrual Rate.

The Range Accrual Reference Factor1(t) will be the Range Accrual Reference Rate1(t) or the Range Accrual Reference Spread1(t) (as specified in the applicable Final Terms), where the Range Accrual Reference Spread1(t) is calculated as the difference when the Range Accrual Reference RateB(t) is subtracted from the Range Accrual Reference RateA(t). The Range Accrual Reference Factor2(t) will be either the Range Accrual Reference Rate2(t) or the Range Accrual Reference Spread2(t) (as specified in the applicable Final Terms), where the Range Accrual Reference Spread2(t) is calculated as the difference when the Range Accrual Reference RateD(t) is subtracted from the Range Accrual Reference RateC(t).

Where the Rate of Interest is determined by reference to a spread, such Rate of Interest may not reflect increases in market interest rates.

Where the Range Accrual Reference Factor1(t) is the Range Accrual Reference Spread1(t), in the case of a positive performance by both Range Accrual Reference RateB(t) and Range Accrual Reference RateA(t), the Range Accrual Reference Spread1(t) will decrease between Interest Payment Dates if Range Accrual Reference RateB(t) performs more favourably than Range Accrual Reference RateA(t). If there is a positive performance by Range Accrual Reference RateB(t) and a negative performance by Range Accrual Reference RateA(t), then such decrease in the Range Accrual Reference Spread1(t) will be more pronounced and not simply proportionate to any negative performance of Range Accrual Reference RateA(t). As a result, the Range Accrual Reference Spread1(t) may not meet the Range Accrual Floor Criterion1 with respect to the Range Accrual Floor1(t) (if “Range Accrual Floor1(t)” is specified as applicable in the applicable Final Terms). Conversely, if there is a positive performance by Range Accrual Reference RateA(t) and a negative performance by Range Accrual Reference RateB(t), then such increase in the Range Accrual Reference Spread1(t) will be more pronounced and not simply proportionate to any positive performance of Range Accrual Reference RateA(t), resulting in the Range Accrual Reference Spread1(t) not meeting the Range Accrual Cap Criterion1 with respect to the Range Accrual Cap1(t) (if “Range Accrual Cap1(t)” is specified as applicable in the applicable Final Terms).

Where the Range Accrual Reference Factor2(t) is the Range Accrual Reference Spread2(t), in the case of a positive performance by both Range Accrual Reference RateD(t) and Range Accrual Reference RateC(t), the Range Accrual Reference Spread2(t) will decrease between Interest Payment Dates if Range Accrual Reference RateD(t) performs more favourably than Range Accrual Reference RateC(t). If there is a positive

performance by Range Accrual Reference RateD(t) and a negative performance by Range Accrual Reference RateC(t), then such decrease in the Range Accrual Reference Spread2(t) will be more pronounced and not simply proportionate to any negative performance of Range Accrual Reference RateC(t). As a result, the Range Accrual Reference Spread2(t) may not meet the Range Accrual Floor Criterion2 with respect to the Range Accrual Floor2(t) (if “Range Accrual Floor2(t)” is specified as applicable in the applicable Final Terms). Conversely, if there is a positive performance by Range Accrual Reference RateC(t) and a negative performance by Range Accrual Reference RateD(t), then such increase in the Range Accrual Reference Spread2(t) will be more pronounced and not simply proportionate to any positive performance of Range Accrual Reference RateC(t), resulting in the Range Accrual Reference Spread2(t) not meeting the Range Accrual Cap Criterion2 with respect to the Range Accrual Cap2(t) (if “Range Accrual Cap2(t)” is specified as applicable in the applicable Final Terms).

The Underlying Rate(t), Range Accrual Reference Rate1(t), Range Accrual Reference Rate2(t), Range Accrual Reference RateA(t), Range Accrual Reference RateB(t), Range Accrual Reference RateC(t) and Range Accrual Reference RateD(t) will be subject to market fluctuations. The Underlying Margin1(t) and Underlying Margin2(t) may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t).

If the relevant multiplier (being either “Multiplier1(t)” or “Multiplier2(t)”) is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t). The relevant multiplier may even be zero.

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of the Range Accrual Rate and the Inverse Range Accrual Rate is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***Snowball Interest Notes***

The Issuer may issue Snowball Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, or if there is no Fixed Rate Period, in the case of the first Interest Period such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)). During any Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, equal to the sum of (i) the Rate of Interest in respect of the previous Interest Payment Date(t) (multiplied by a Multiplier1(t) specified in the applicable Final Terms) and (ii) the difference when the Underlying Rate(t) (multiplied by a Multiplier2(t) specified in the applicable Final Terms) is subtracted from the Fix(t) (as specified in the applicable Final Terms) (other than if such Variable Rate Interest Period is the first Interest Period, for which the Notes will bear interest at a fixed Rate of Interest(Fixed)(t)). The Underlying Rate(t) will be subject to market fluctuations. The market values of those Notes typically are more volatile than market values of other conventional floating rate debt securities based on the same reference rate (and with otherwise comparable terms) as the Underlying Rate(t). Snowball Interest Notes are more volatile because an increase in the Underlying Rate(t) not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

If the Multiplier1(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period.

As Multiplier2(t) is applied to the Underlying Rate(t), if the Multiplier2(t) is higher than 100%, the positive performance of the Underlying Rate(t) will be magnified, thereby reducing the interest rate of the

Notes even further. If the Multiplier2(t) is less than 100%, any positive performance of the Underlying Rate(t) will be scaled down. In addition, as the Rate of Interest in respect of the Notes is also dependent on the Rate of Interest in respect of the previous Interest Payment Date, a positive performance of the Underlying Rate(t) in respect of an Interest Payment Date(t) will be reflected inversely in the Rate of Interest in respect of each subsequent Interest Payment Date.

Following positive performance of the Underlying Rate(t), it is possible that investors will only receive a Rate of Interest equal to the Floor(t).

Finally, the Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the sum of (i) the Rate of Interest in respect of the previous Interest Payment Date(t) (multiplied by the Multiplier1(t)) and (ii) the difference when the Underlying Rate(t) (multiplied by the Multiplier2(t)) is subtracted from the Fix(t) is greater than the Cap(t), investors may not benefit from the full extent of any negative performance of the Underlying Rate(t) as the Rate of Interest will be capped.

### ***SnowRanger Interest Notes***

The Issuer may issue SnowRanger Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed Rate of Interest(Fixed)(t) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Rate of Interest applicable to the Notes during any Variable Rate Interest Period is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period on which the Range Accrual Reference Rate(t) meets the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) and meets the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates (“n”) is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period (“N”) and the resultant figure is multiplied (i) if such Variable Rate Interest Period is the first Interest Period, by a rate based upon the Underlying Rate(t) (multiplied by a Multiplier1(t)) and an Underlying Margin(t), each as set out in the applicable Final Terms or (ii) if such Variable Rate Interest Period is an Interest Period(t) other than the first Interest Period, a rate based on the Rate of Interest in respect of the previous Interest Payment Date (multiplied by the Multiplier2(t) specified in the applicable Final Terms) and an Underlying Margin(t) (multiplied by a Multiplier1(t)), each as set out in the applicable Final Terms.

The Underlying Rate(t) and the Range Accrual Reference Rate(t) will be subject to market fluctuations. Market fluctuations during the Range Accrual Observation Period will affect the value of “n” used in the aforementioned calculations. If the first Interest Period(t) is a Variable Rate Interest Period, then the Underlying Rate(t) in respect of the first Interest Payment Date(t) will determine the Rate of Interest payable on such date. Furthermore, as the Rate of Interest in respect of the Notes is also dependent on the Rate of Interest in respect of the previous Interest Payment Date, a negative performance of the Underlying Rate(t) in respect of the first Interest Payment Date(t) (if the related Variable Rate Interest Period is the first Interest Period) and any negative performance of the Underlying Rate(t) over each Range Accrual Period will be reflected in the Rate of Interest in respect of each subsequent Interest Payment Date.

The Rate of Interest in respect of any Variable Rate Interest Period will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent that (i) if the relevant Variable Rate Interest Period is the first Interest Period, the sum of the Underlying Rate(t) (multiplied by a Multiplier1(t)) and the Underlying Margin(t) or (ii) if the relevant Variable Rate Interest Period is not the first Interest Period, the Rate of Interest in respect of the previous Interest Payment Date(t) (multiplied by the Multiplier2(t)) and the

Underlying Margin(t) and, in each case, as multiplied by the quotient of n divided by N, is greater than the Cap(t), investors will not benefit from the full extent of any positive performance of the Underlying Rate(t) as the Rate of Interest will be capped.

If the Multiplier1(t) is higher than 100%, the investor will participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the Multiplier1(t) is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

If the Multiplier2(t) is less than 100%, the Rate of Interest payable on the Notes in respect of any Interest Period could be lower than the Rate of Interest payable on the Notes in the previous Interest Period.

If the Range Accrual Reference Rate(t) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor(t) (if “Range Accrual Floor(t)” is specified as applicable in the applicable Final Terms) or does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap(t) (if “Range Accrual Cap(t)” is specified as applicable in the applicable Final Terms) on enough days during the Range Accrual Observation Period, investors will only receive a Rate of Interest equal to the Floor(t) in respect of the relevant Variable Rate Interest Period.

### ***Barrier(Rates) Interest Notes***

The Issuer may issue Barrier(Rates) Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based upon an Underlying Rate(t), which will be subject to market fluctuations, and a margin (being either Underlying Margin1(t), Underlying Margin2(t) or Underlying Margin3(t)), which may be less favourable than the margin on floating rate securities issued by the Issuer that are linked to the same reference rate as the Underlying Rate(t). The applicable margin will depend on the Underlying Rate(t). If the Underlying Rate(t) does not meet the Upper Barrier Criterion with respect to the Upper Barrier(t), such margin will be the Underlying Margin1(t), as specified in the applicable Final Terms. If the Underlying Rate(t) (i) meets the Upper Barrier Criterion with respect to the Upper Barrier(t) and (ii) meets the Lower Barrier Criterion with respect to the Lower Barrier(t), such margin will be the Underlying Margin2(t), as specified in the applicable Final Terms. Finally, if the Underlying Rate(t) does not meet the Lower Barrier Criterion with respect to the Lower Barrier(t), such margin will be the Underlying Margin3(t), as specified in the applicable Final Terms.

In calculating the Rate of Interest in respect of any Variable Rate Interest Period, a multiplier is applied to the Underlying Rate(t). The applicable multiplier will depend on the Underlying Rate(t). If the Underlying Rate(t) does not meet the Upper Barrier Criterion with respect to the Upper Barrier(t), such multiplier will be the Multiplier(Upper Barrier)(t), as specified in the applicable Final Terms. If the Underlying Rate(t) (i) meets the Upper Barrier Criterion with respect to the Upper Barrier(t) and (ii) meets the Lower Barrier Criterion with respect to the Lower Barrier(t), such multiplier will be the Multiplier(Barrier)(t), as specified in the applicable Final Terms. Finally, if the Underlying Rate(t) does not meet the Lower Barrier Criterion with respect to the Lower Barrier(t), such multiplier will be the Multiplier(Lower Barrier)(t), as specified in the applicable Final Terms.

If the relevant multiplier is higher than 100%, the investor may participate disproportionately in any positive performance of the Underlying Rate(t), but any negative performance will also be magnified. If the relevant multiplier is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Underlying Rate(t).

### ***Reference Item(Inflation) Performance Linked Interest Notes***

The Issuer may issue Reference Item(Inflation) Performance Linked Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based on the sum of (i) the product of (1) the percentage change in the level of the inflation index (the “**Inflation Index**”) between the level of the Inflation Index in respect of Reference Month (t-1) (or if the Interest Period(t) is the first Interest Period, the Initial Reference Month) and the level of the Inflation Index in respect of the Reference Month(t) and (2) the Participation(t), (ii) the Underlying Margin1(t) and (iii) the Underlying Margin2(t), each as specified in the applicable Final Terms.

As the variable Rate of Interest during any Variable Rate Interest Period depends on the performance of the Inflation Index, a fall in the level of the Inflation Index may result in investors only receiving a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable) plus the Underlying Margin2(t).

If the Participation is higher than 100%, the investor will participate disproportionately in any positive performance of the Inflation Index, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance of the Inflation Index.

Finally, the Rate of Interest will be capped at the Cap(t) plus the Underlying Margin2(t), which is specified in the applicable Final Terms. To the extent the sum of (i) the product of (1) the percentage change in the level of the Inflation Index between the level of the Inflation Index in respect of Reference Month (t-1) (or if the Interest Period(t) is the first Interest Period, the Initial Reference Month) and the level of the Inflation Index in respect of the Reference Month(t) and (2) the Participation(t), and (ii) the Underlying Margin1(t) is greater than the Cap(t), investors may not benefit from the full extent of any positive performance of the Inflation Index as the Rate of Interest will be capped.

### ***Reference Item(Inflation) Indexed Interest Notes***

The Issuer may issue Reference Item(Inflation) Indexed Interest Notes. If “Fixed Rate Period” is specified to apply in the applicable Final Terms, such Notes will bear interest at a fixed rate of interest (being Rate of Interest(Fixed)(t)) during any Interest Period(t) falling within the Fixed Rate Interest Period. During such Fixed Rate Interest Period, any increases in market interest rates may adversely affect the value of the Notes.

The Notes will bear interest at a variable Rate of Interest during any Variable Rate Interest Period, based on a fixed Rate of Interest(Fixed)(t) which is adjusted to take into account changes in the level of the Inflation Index between the level of the Inflation Index in respect of the Initial Reference Month and the level of the Inflation Index in respect of the Reference Month(t), each as specified in the applicable Final Terms.

As the variable Rate of Interest during any Variable Rate Interest Period depends on the performance of the Inflation Index, a fall in the level of the Inflation Index may result in investors only receiving a Rate of Interest equal to the Floor(t) (to the extent that a Floor is applicable).

Finally, the Rate of Interest will be capped at the Cap(t), which is specified in the applicable Final Terms. To the extent the Rate of Interest(Fixed)(t), adjusted to take into account changes in the level of the Inflation Index between the level of the Inflation Index in respect of the Initial Reference Month and the level of the Inflation Index in respect of the Reference Month(t), is greater than the Cap(t), investors may not

benefit from the full extent of any positive performance of the Inflation Index as the Rate of Interest will be capped.

### ***Step-Up Barrier Interest Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Step-Up Barrier Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether the relevant Observation Index Level(t) meets the Coupon Barrier Criterion and (ii) the Step-Up.

If in respect of an Interest Payment Date(t) the Observation Index Level(t) meets the Coupon Barrier Criterion, then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Step-Up and (2) the number of Interest Payment Date(t)s from and including the date of issue to and including such Interest Payment Date(t) (unless such Interest Payment Date(t) is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)). If, however, in respect of an Interest Payment Date(t) the Observation Index Level(t) does not meet the Coupon Barrier Criterion, no interest will be payable on the Notes on such Interest Payment Date(t).

#### **Basket Index Linked Notes**

If the Final Terms specify that the “Step-Up Barrier Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether the relevant Observation Index Level(k,t) of each and every Basket Component meets the Coupon Barrier Criterion, (ii) if “Basket Level Determination” applies, whether the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Coupon Barrier Criterion and (iii) the Step-Up.

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of each and every Basket Component meets the Coupon Barrier Criterion (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Coupon Barrier Criterion (if “Basket Level Determination” applies), then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Step-Up and (2) the number of Interest Payment Date(t)s from and including the date of issue to and including such Interest Payment Date(t) (unless such Interest Payment Date(t) is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)). If, however, in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of one or more Basket Component does not meet the Coupon Barrier Criterion (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) does not meet the Coupon Barrier Criterion (if “Basket Level Determination” applies), no interest will be payable on the Notes on such Interest Payment Date(t).

### ***Memory Interest Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Memory Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether the relevant Observation Index Level(t) meets the Coupon Barrier Criterion, (ii) the Rate of Interest in respect of each previous Interest Payment Date (or, if such Interest Payment Date is the first Interest Payment Date, the Rate of Interest(1)) and (iii) the Memory.

If in respect of an Interest Payment Date the relevant Observation Index Level(t) does not meet the Coupon Barrier Criterion, no interest will be payable on the Notes on such Interest Payment Date.

If in respect of an Interest Payment Date(t) the relevant Observation Index Level(t) meets the Coupon Barrier Criterion, then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Memory and (2) the number of Interest Payment Dates from the Issue Date to such Interest Payment Date, less the sum of the Rates of Interest in respect of each previous Interest Payment Date (unless such Interest Payment Date is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)).

Furthermore, if in respect of every Interest Payment Date(t) the Observation Index Level(t) does not meet the Coupon Barrier Criterion, the investor will receive no interest on the Notes.

#### **Basket Index Linked Notes**

If the Final Terms specify that the “Memory Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether the relevant Observation Index Level(k,t) of each and every Basket Component meets the Coupon Barrier Criterion, (ii) if “Basket Level Determination” applies, whether the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Coupon Barrier Criterion, (iii) the Rate of Interest in respect of each previous Interest Payment Date (or, if such Interest Payment Date is the first Interest Payment Date, the Rate of Interest(1)) and (iv) the Memory.

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of one or more Basket Component does not meet the Coupon Barrier Criterion (if “Basket Level Determination” does not apply) or Basket Level(t) on the relevant Coupon Observation Date(t) does not meet the Coupon Barrier Criterion (if “Basket Level Determination” applies), no interest will be payable on the Notes on such Interest Payment Date(t).

If in respect of an Interest Payment Date(t) the relevant Observation Index Level(k,t) of each and every Basket Component meets the Coupon Barrier Criterion (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Coupon Barrier Criterion (if “Basket Level Determination” applies), then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Memory and (2) the number of Interest Payment Dates from the Issue Date to such Interest Payment Date(t), less the sum of the Rates of Interest in respect of each previous Interest Payment Date (unless such Interest Payment Date is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)).

Furthermore, if in respect of every Interest Payment Date(t) the Observation Index Level(k,t) of one or more Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) in respect of every Coupon Observation Date(t) (if “Basket Level Determination” applies) does not meet the Coupon Barrier Criterion, the investor will receive no interest on the Notes.

#### ***One Touch Memory Interest Notes***

##### **Single Index Linked Notes**

If the Final Terms specify that the “One Touch Memory Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, (ii) the Rate of Interest in respect of each previous Interest Payment Date (or, if such Interest Payment Date is the first Interest Payment Date, the Rate of Interest(1)) and (iii) the Memory.

If in respect of an Interest Payment Date(t) no Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, no interest will be payable on the Notes on such Interest Payment Date(t).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Memory and (2) the number of Interest Payment Date(t)s from and including the date of issue to and including such Interest Payment Date; less the sum of the Rates of Interest in respect of each previous Interest Payment Date (unless such Interest Payment Date(t) is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)).

Furthermore, if in respect of every Interest Payment Date(t) no Coupon Barrier Event occurs during the relevant Coupon Barrier Observation Period, the investor will receive no interest on the Notes.

#### **Basket Index Linked Notes**

If the Final Terms specify that the “One Touch Memory Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether a Coupon Barrier Event has occurred in respect of each and every Basket Component during the relevant Coupon Barrier Observation Period, (ii) if “Basket Level Determination” applies, whether a Coupon Barrier Event has occurred in respect of the Basket during the relevant Coupon Barrier Observation Period, (iii) the Rate of Interest in respect of each previous Interest Payment Date (or, if such Interest Payment Date is the first Interest Payment Date, the Rate of Interest(1)) and (iv) the Memory.

If in respect of an Interest Payment Date(t) no Coupon Barrier Event has occurred in respect of every Basket Component (if “Basket Level Determination” does not apply) or the Basket (if “Basket Level Determination” applies) during the relevant Coupon Barrier Observation Period, no interest will be payable on the Notes on such Interest Payment Date(t).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred in respect of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket (if “Basket Level Determination” applies) during the relevant Coupon Barrier Observation Period, then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the product of (1) the Memory and (2) the number of Interest Payment Date(t)s from and including the date of issue to and including such Interest Payment Date; less the sum of the Rates of Interest in respect of each previous Interest Payment Date (unless such Interest Payment Date(t) is the first Interest Payment Date, in which case the Rate of Interest will be the Rate of Interest(1)).

Furthermore, if in respect of every Interest Payment Date(t) no Coupon Barrier Event occurs during the relevant Coupon Barrier Observation Period, the investor will receive no interest on the Notes.

#### ***Range Accrual(Index) Interest Notes***

##### **Single Index Linked Notes**

If the Final Terms specify that the “Range Accrual(Index) Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) the Coupon Valuation Level over a series of Range Accrual Observation Dates and (ii) the Rate of Interest(Range Accrual).

The Rate of Interest applicable to the Notes on an Interest Payment Date is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period that the Coupon Valuation Level met the Range Accrual Floor Criterion with respect to the Range Accrual Floor (if “Range Accrual Floor” is specified as applicable in the applicable Final Terms) and met the Range Accrual Cap Criterion with respect to the Range Accrual Cap (if “Range Accrual Cap” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates (n) is divided by the total number of Range Accrual

Observation Dates in the Range Accrual Observation Period (N) and the resultant figure is multiplied by the Rate of Interest(Range Accrual) to give the Rate of Interest.

If the Coupon Valuation Level did not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor (if “Range Accrual Floor” is specified as applicable in the applicable Final Terms) or did not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap (if “Range Accrual Cap” is specified as applicable in the applicable Final Terms) on each Range Accrual Observation Date during the Range Accrual Observation Period, n will be zero. Consequently, the Interest Amount for that Interest Payment Date will be zero.

#### **Basket Index Linked Notes**

If the Final Terms specify that the “Range Accrual(Index) Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, the Coupon Valuation Level(k) of the Basket Component over a series of Range Accrual Observation Dates, (ii) if “Basket Level Determination” applies, the Basket Level(t) over a series of Range Accrual Observation Dates and (iii) the Rate of Interest(Range Accrual).

The Rate of Interest applicable to the Notes on an Interest Payment Date is linked to the number of Range Accrual Observation Dates in the Range Accrual Observation Period that the Coupon Valuation Level(k) in respect of each Basket Component (if “Basket Level Determination” does not apply) or Basket Level(t) (if “Basket Level Determination” applies) met the Range Accrual Floor Criterion with respect to the Range Accrual Floor (if “Range Accrual Floor” is specified as applicable in the applicable Final Terms) and met the Range Accrual Cap Criterion with respect to the Range Accrual Cap (if “Range Accrual Cap” is specified as applicable in the applicable Final Terms). Such number of Range Accrual Observation Dates (n) is divided by the total number of Range Accrual Observation Dates in the Range Accrual Observation Period (N) and the resultant figure is multiplied by the Rate of Interest(Range Accrual) to give the Rate of Interest.

If the Coupon Valuation Level(k) of one or more Basket Component (if “Basket Level Determination” does not apply) or Basket Level(t) (if “Basket Level Determination” applies) does not meet the Range Accrual Floor Criterion with respect to the Range Accrual Floor (if “Range Accrual Floor” is specified as applicable in the applicable Final Terms) and does not meet the Range Accrual Cap Criterion with respect to the Range Accrual Cap (if “Range Accrual Cap” is specified as applicable in the applicable Final Terms) on each Range Accrual Observation Date during the Range Accrual Observation Period, n will be zero. Consequently, the Interest Amount for that Interest Payment Date will be zero.

#### ***Barrier(Index) Interest Notes***

##### **Single Index Linked Notes**

If the Final Terms specify that the “Barrier(Index) Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether the relevant Observation Index Level(t) meets the Coupon Barrier Criterion and (ii) the Rate of Interest(1).

If in respect of an Interest Payment Date(t) the Observation Index Level(t) meets the Coupon Barrier Criterion, then the Rate of Interest in respect of such Interest Payment Date(t) will be the Rate of Interest(1).

If in respect of an Interest Payment Date(t) the Observation Index Level(t) does not meet the Coupon Barrier Criterion, no interest will be payable on the Notes on such Interest Payment Date(t).

Furthermore, even if the Observation Index Level(t) in respect of each Interest Payment Date meets the Coupon Barrier Criterion, any investors holding the Notes will be subject to the risk that subsequent changes in market interest rates may adversely affect the value of the Barrier(Index) Interest Notes.

#### Basket Index Linked Notes

If the Final Terms specify that the “Barrier(Index) Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether the relevant Observation Index Level(k,t) of each and every Basket Component meets the Coupon Barrier Criterion, (ii) if “Basket Level Determination” applies, whether the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Coupon Barrier Criterion and (iii) the Rate of Interest(1).

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) meets the Coupon Barrier Criterion, then the Rate of Interest in respect of such Interest Payment Date(t) will be the Rate of Interest(1).

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of one or more Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) does not meet the Coupon Barrier Criterion, no interest will be payable on the Notes on such Interest Payment Date(t).

Furthermore, even if the Observation Index Level(k,t) of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on each relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) in respect of each Interest Payment Date meets the Coupon Barrier Criterion, any investors holding the Notes will be subject to the risk that subsequent changes in market interest rates may adversely affect the value of the Barrier(Index) Interest Notes.

#### ***One Touch Barrier(Index) Interest Notes***

##### Single Index Linked Notes

If the Final Terms specify that the “One Touch Barrier(Index) Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period and (ii) the Rate of Interest(1).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the Rate of Interest(1)).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has not occurred during the relevant Coupon Barrier Observation Period, no interest will be payable on the Notes on such Interest Payment Date(t).

Furthermore, even if a Coupon Barrier Event occurs during the relevant Coupon Barrier Observation Period, any investors holding the Notes will be subject to the risk that subsequent changes in market interest rates may adversely affect the value of the One Touch Barrier(Index) Interest Notes.

##### Basket Index Linked Notes

If the Final Terms specify that the “One Touch Barrier(Index) Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether a Coupon Barrier Event has occurred in respect of each and every Basket Component during the relevant Coupon Barrier Observation

Period, (ii) if “Basket Level Determination” applies, whether a Coupon Barrier Event has occurred in respect of the Basket during the relevant Coupon Barrier Observation Period and (iii) the Rate of Interest(1).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred in respect of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket (if “Basket Level Determination” applies) during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the Rate of Interest(1)).

If in respect of an Interest Payment Date(t) no Coupon Barrier Event has occurred in respect of every Basket Component (if “Basket Level Determination” does not apply) or the Basket (if “Basket Level Determination” applies) during the relevant Coupon Barrier Observation Period, no interest will be payable on the Notes on such Interest Payment Date(t).

Furthermore, even if a Coupon Barrier Event occurs in respect of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket (if “Basket Level Determination” applies) during the relevant Coupon Barrier Observation Period, any investors holding the Notes will be subject to the risk that subsequent changes in market interest rates may adversely affect the value of the One Touch Barrier(Index) Interest Notes.

### ***Reference Item(Index) Performance Linked Interest Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Reference Item(Index) Performance Linked Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on the Reference Rate(t), which is determined by reference to the performance of the Index.

How the value of the Interest Amount is calculated depends upon whether in respect of an Interest Payment Date(t) the Reference Rate(t) (i) does not meet the Reference Cap Criterion with respect to the Reference Cap(t), (ii) (1) meets the Reference Cap Criterion with respect to the Reference Cap(t) and (2) meets the Reference Floor Criterion with respect to the Reference Floor(t) or (iii) does not meet the Reference Floor Criterion with respect to the Reference Floor(t).

The Reference Rate(t) in respect of an Interest Payment Date(t) will be the higher of (i) Min Coupon(t) and (ii) Performance(t).

Min Coupon(t) will be: (i) if “Memory Coupon” does not apply, the Min Reference Rate; or (ii) if “Memory Coupon” applies, for the first Interest Payment Date(t), the Rate of Interest(1) and for all subsequent Interest Payment Date(t)s, the higher of (1) the rate of interest payable on the Notes in respect of the previous Interest Payment Date(t) and (2) the Rate of Interest(1).

If “ICAP” applies, Performance(t) will reflect the performance of the Index over the period from the Strike Date to the Coupon Observation Date(t), capped at the Coupon Index Cap (if applicable) and floored at the Coupon Index Floor. Consequently, in calculating the Reference Rate(t) the effects of any negative performance of the Index will be limited by the Coupon Index Floor but investors will not benefit from the full extent of any positive performance of the Index as the Rate of Interest will be capped.

If “MAGNET” applies, then Performance(t) will depend on the performance of the Index over the period from the Strike Date to the Coupon Observation Date(t). If the performance of the Index during such period is equal to or greater than zero, then Performance(t) will be the higher of the Coupon Index Floor and the Coupon Index Cap. Consequently, if the performance of the Index is greater than the Coupon Index Cap, investors will not benefit from the full extent of any positive performance of the Index. If the performance of

the Index during such period is less than zero, then Performance(t) will reflect the performance of the Index during such period, capped at zero and floored at the Coupon Index Floor.

If the Reference Rate(t) does not meet the Reference Floor Criterion with respect to the Reference Floor(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(Floor)(t). If the Reference Rate(Floor)(t) is greater than zero%, then investors will receive a Rate of Interest of at least the Reference Rate(Floor)(t) throughout the life of the Notes.

If the Reference Rate(t) (i) meets the Reference Cap Criterion with respect to the Reference Cap(t) and (ii) meets the Reference Floor Criterion with respect to the Reference Floor(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(t).

If the Reference Rate(t) does not meet the Reference Cap Criterion with respect to the Reference Cap(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(Cap)(t). To the extent the Performance(t) of the Index is greater than the Cap, investors will not benefit from the full extent of any positive performance of the Index as the Rate of Interest will be capped.

#### Basket Index Linked Notes

If the Final Terms specify that the “Reference Item(Index) Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on the Reference Rate(t), which is determined by reference to the performance of the Basket Component.

How the value of the Interest Amount is calculated depends upon whether in respect of an Interest Payment Date(t) the Reference Rate(t) (i) does not meet the Reference Cap Criterion with respect to the Reference Cap(t), (ii) (1) meets the Reference Cap Criterion with respect to the Reference Cap(t) and (2) meets the Reference Floor Criterion with respect to the Reference Floor(t) or (iii) does not meet the Reference Floor Criterion with respect to the Reference Floor(t).

The Reference Rate(t) in respect of an Interest Payment Date(t) will be: (i) if “FIXED BEST” does not apply, the higher of (a) Min Coupon(t) and (b) the arithmetic average of the Performance(k,t) of each Basket Component; or (ii) if “FIXED BEST” applies, the higher of (a) Min Coupon(t) and (b) the lower of the Coupon Index Cap and the Fixed Best Basket Performance.

Min Coupon(t) will be: (i) if “Memory Coupon” does not apply, the Min Reference Rate; or (ii) if “Memory Coupon” applies, for the first Interest Payment Date(t), the Rate of Interest(1) and for all subsequent Interest Payment Date(t)s, the higher of (1) the rate of interest payable on the Notes in respect of the previous Interest Payment Date(t) and (2) the Rate of Interest(1).

If “ICAP” applies, the Performance(k,t) of a Basket Component is a measure of its performance over the period from the Strike Date to the Coupon Observation Date(t), capped at the Coupon Index Cap (if applicable) and floored at the Coupon Index Floor. Consequently, in calculating the Reference Rate(t) the effects of any negative performance of individual Basket Components will be limited by the Coupon Index Floor but investors will not benefit from the full extent of any positive performance of the Basket Components as the Rate of Interest will be capped.

If “MAGNET” applies, then Performance(k,t) will depend on the performance of each Basket Component over the period from the Strike Date to the Coupon Observation Date(t). If the performance of any Basket Component during such period is equal to or greater than zero, then Performance(k,t) in respect of such Basket Component will be the higher of (i) the Coupon Index Floor and (ii) the Coupon Index Cap. Consequently, if the performance of such Basket Component is greater than the Coupon Index Cap, investors will not benefit from the full extent of any positive performance of such Basket Component. If the performance of any Basket Component during such period is less than zero, then Performance(k,t) in respect

of such Basket Component will reflect the performance of such Basket Component during such period, capped at zero and floored at the Coupon Index Floor. If “FIXED BEST” applies, then Performance(k,t) will depend on the performance of each Basket Component over the period from the Strike Date to the Coupon Observation Date(t) floored at the Coupon Index Floor.

If the Reference Rate(t) does not meet the Reference Floor Criterion with respect to the Reference Floor(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(Floor)(t). If the Reference Rate(Floor)(t) is greater than zero%, then investors will receive a Rate of Interest of at least the Reference Rate(Floor)(t) throughout the life of the Notes.

If the Reference Rate(t) (i) meets the Reference Cap Criterion with respect to the Reference Cap(t) and (ii) meets the Reference Floor Criterion with respect to the Reference Cap(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(t).

If the Reference Rate(t) does not meet the Reference Cap Criterion with respect to the Reference Cap(t), the Rate of Interest(t) in respect of Interest Payment Date(t) will be the Reference Rate(Cap)(t). To the extent the Performance(t) of the Index is greater than the Cap, investors will not benefit from the full extent of any positive performance of the Basket Components as the Rate of Interest will be capped.

### ***Best Of Interest Notes***

If the Final Terms specify that the “Best Of Interest Note Provisions” apply, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) if “Basket Level Determination” does not apply, whether the relevant Observation Index Level(k,t) of each and every Basket Component meets the Best Of Coupon Barrier Criterion, (ii) if “Basket Level Determination” applies, whether the Basket Level(t) on the relevant Coupon Observation Date(t) meets the Best Of Coupon Barrier Criterion, (iii) the Rate of Interest(1)(t) and (iv) the Basket Performance.

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) meets the Best Of Coupon Barrier Criterion, then the Rate of Interest in respect of such Interest Payment Date(t) will be equal to the higher of (a) the Rate of Interest(1)(t) and (b) the Basket Performance(t).

If in respect of an Interest Payment Date(t) the Observation Index Level(k,t) of one or more Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) does not meet the Best Of Coupon Barrier Criterion, no interest will be payable on the Notes on such Interest Payment Date(t).

Furthermore, if the Observation Index Level(k,t) of each and every Basket Component (if “Basket Level Determination” does not apply) or the Basket Level(t) on the relevant Coupon Observation Date(t) (if “Basket Level Determination” applies) in respect of each Interest Payment Date meets the Best Of Coupon Barrier Criterion, any investors holding the Notes will be subject to the risk that subsequent changes in market interest rates and the market in respect of each Basket Component may adversely affect the value of the Best Of Interest Notes.

### ***One Touch Lock-In(Index) Interest Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “One Touch Barrier(Index) Interest Note Provisions” apply and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, (ii) the Lock-In(t) and (iii) the Performance(t).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the higher of the Lock-In(t) and the Performance(t).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has not occurred during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the higher of zero% and the Performance(t).

Performance(t) will depend on the performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Coupon Observation Date(t), capped at the Coupon Index Cap and floored at the Coupon Index Floor. Consequently, if the performance of the Index is greater than the Coupon Index Cap, investors will not benefit from the full extent of any positive performance of the Index.

#### **Basket Index Linked Notes**

If the Final Terms specify that the “One Touch Barrier(Index) Interest Note Provisions” apply and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date will depend on (i) whether a Coupon Barrier Event has occurred in respect of each and every Basket Component during the relevant Coupon Barrier Observation Period, (ii) the Lock-In(t) and (iii) the Basket Performance(t).

If in respect of an Interest Payment Date(t) a Coupon Barrier Event has occurred in respect of each and every Basket Component during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the higher of the Lock-In(t) and the Basket Performance(t).

If in respect of an Interest Payment Date(t) no Coupon Barrier Event has occurred in respect of every Basket Component during the relevant Coupon Barrier Observation Period, then the Rate of Interest will be the higher of zero% and the Basket Performance(t).

Basket Performance(t) will depend on the performance of the Basket over the period from the Strike Date to the Coupon Observation Date(t), capped at the Coupon Index Cap and floored at the Coupon Index Floor. Consequently, if the performance of the Basket is greater than the Coupon Index Cap, investors will not benefit from the full extent of any positive performance of the Basket.

#### ***Annual Coupon Interest Notes***

If the Final Terms specify that the “Annual Coupon Interest Provisions” apply, the Rate of Interest in respect of the Notes on any Interest Payment Date will be a multiple of the Observation Index Level(t) of the Index on the relevant Coupon Observation Date(t) in respect of that Interest Period. The Rate of Interest payable during the term of the Notes will therefor depend on the performance of the Index, Noteholders will receive a lower Rate of Interest if the level of the Index falls.

#### ***Coupon Knock-Out***

If the Final Terms specify that “Coupon Knock-Out” is applicable and the Notes are Single Index Linked Notes, interest shall cease to be payable for the remaining term of the Notes in the event that a Coupon Barrier Event has occurred during any Coupon Barrier Observation Period.

#### ***Inflation Indexed Redemption Notes***

If the Final Terms specify that the “Inflation Indexed Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on the percentage change in the level of the Inflation Index

between the level of the Inflation Index in respect of the Initial Reference Month and the level of the Inflation Index in respect of the Final Reference Month, each as specified in the applicable Final Terms.

If the level of the Inflation Index has fallen, the Final Redemption Amount of the Notes will be lower than the denomination of the Notes and investors may therefore lose some or all of their investment in the Notes.

#### ***Inflation Indexed with Floor Redemption Notes***

If the Final Terms specify that the “Inflation Indexed with Floor Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on the (i) the percentage change in the level of the Inflation Index between the level of the Inflation Index in respect of the Initial Reference Month and the level of the Inflation Index in respect of the Final Reference Month, (ii) the Inflation Cap, (iii) the Inflation Floor, (iv) the Redemption Margin1 and (v) the Redemption Margin2, each as specified in the applicable Final Terms.

If the level of the Inflation Index has fallen, the Final Redemption Amount of the Notes will be equal to the denomination of the Notes multiplied by the sum of (i) 100%, (ii) the Inflation Floor and (iii) the Redemption Margin2. An investor’s investment in the Notes will therefore only be protected to the extent that the sum of the Inflation Floor and the Redemption Margin2 is at least zero.

Moreover, the Final Redemption Amount of the Notes will be subject to a cap equal to the denomination of the Notes multiplied by the sum of (i) 100%, (ii) the Inflation Cap and (iii) the Redemption Margin2. Accordingly, investors will not benefit from any percentage increase in the level of the Inflation Index to the extent that such increase (together with Redemption Margin1) exceeds the Inflation Cap.

#### ***Uncapped (Partial) Capital Protection Redemption Notes***

##### Single Index Linked Notes

If the Final Terms specify that the “Uncapped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the Index, (iii) the Participation Up, and (iv) the Participation Down.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level and (b) the Initial Index Level is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level. In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index.

Save where “Fixed Best” applies, different participation factors (the “Participation Up” and the “Participation Down”) may apply to the positive performance and the negative performance of the Index.

Higher participation factors will magnify the investors' exposure to the positive and the negative performance of the Index. Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Index. Participation factors higher than 100% will magnify the investors' exposure to the positive performance and/or the negative performance of the Index (as the case may be). Participation factors lower than 100% will scale down the investors' exposure to the positive performance and/or the negative performance of the Index (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Index.

Furthermore, if "Flexo" applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### Basket Index Linked Notes – "Best Of", "Fixed Best" and "Worst Of": "Not Applicable"

If the Final Terms specify that the "Uncapped (Partial) Capital Protection Redemption Note Provisions" apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the Basket, (iii) the Participation Up and (iv) the Participation Down.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Basket Performance over the period from the Strike Date (or, (i) if "Asian-in" applies, the Asian-in Averaging Dates or (ii) if "Lookback-in" applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if "Asian-out" applies or the Lookback-out Observation Dates if "Lookback-out" applies).

If the quotient of (a) the difference between the Basket Final Level (or, (i) if "Asian-out" applies, the Average Basket Performance or (ii) if "Lookback-out" applies, the Max Basket Performance) and the Basket Strike Level and (b) the Basket Initial Level is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. Different participation factors (the "Participation Up" and the "Participation Down") may apply to the positive performance and the negative performance of the Basket, respectively. Participation factors higher than 100% will magnify the investors' exposure to the positive performance and/or the negative performance of the Basket (as the case may be). Participation factors lower than 100% will scale down the investors' exposure to the positive performance and/or the negative performance of the Basket (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Basket.

Furthermore, if "Flexo" applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a

currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

**Basket Index Linked Notes – “Fixed Best”: “Applicable”; “Best Of” and “Worst Of”: “Not Applicable”**

If the Final Terms specify that the “Uncapped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of a specified number of Basket Components that have the lowest performance amongst all the Basket Components in the Basket, (iii) the Fixed Return and (iv) the Participation.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon: (a) weighted average of the Performance(k) of a specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies) and (b) a weighted average of a Fixed Return percentage in respect of each Basket Component other than the specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket. The Performance(k) for each Basket Component comprising the specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket will be a negative value if the Basket Level of such Basket Component on the Valuation Date (or, (i) if “Asian-out” applies, the Average Index Level(k) of the Basket Component or (ii) if “Lookback-out” applies, the Max Index Level(k) of the Basket Component) is lower than the Strike Level(k). If the sum of (a) the weighted average of the Performance(k) of the specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket and (b) the weighted average of the Fixed Return percentage in respect of each Basket Component other than the specified number of Basket Components that have the lowest performance amongst all the Basket Components in the Basket is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance of the Basket. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

**Basket Index Linked Notes – “Worst Of”: Applicable; “Best Of” and “Fixed Best”: “Not Applicable”**

If the Final Terms specify that the “Uncapped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the worst performing Basket Component within the Basket, (iii) the Participation Up and (iv) the Participation Down.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Performance(k) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) of the worst performing Basket Component and the Strike Level(k) and (b) the Initial Index Level(k) of the worst performing Basket Component is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. Different participation factors (the “Participation Up” and the “Participation Down”) may apply to the positive performance and the negative performance of each Index, respectively. Participation factors higher than 100% will magnify the investors’ exposure to the positive performance and/or the negative performance of each Index (as the case may be). Participation factors lower than 100% will scale down the investors’ exposure to the positive performance and/or the negative performance of each Index (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of each Index.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

**Basket Index Linked Notes – “Best Of”: Applicable; “Worst Of” and “Fixed Best”: “Not Applicable”**

If the Final Terms specify that the “Uncapped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the best performing Basket Component within the Basket, (iii) the Participation Up and (iv) the Participation Down.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Performance(k) of the best performing Basket Component over the

period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) of the best performing Basket Component and the Strike Level(k) and (b) the Initial Index Level(k) of the best performing Basket Component is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. Different participation factors (the “Participation Up” and the “Participation Down”) may apply to the positive performance and the negative performance of each Index, respectively. Participation factors higher than 100% will magnify the investors’ exposure to the positive performance and/or the negative performance of each Index (as the case may be). Participation factors lower than 100% will scale down the investors’ exposure to the positive performance and/or the negative performance of each Index (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of each Index.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### ***Capped (Partial) Capital Protection Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Capped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the Index, (iii) the Participation Up, (iv) the Participation Down and (v) the Cap.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level and (b) the Initial Index Level is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. Different participation factors (the “Participation Up” and the “Participation Down”) may apply to the positive performance and the negative performance of the Index. Higher participation factors will magnify the investors’ exposure to the positive and the negative performance of the Index. Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Index. Participation factors higher than 100% will magnify the investors’ exposure to the positive performance and/or the negative performance of the Index (as the case may be). Participation factors lower than 100% will scale down the investors’ exposure to the positive performance and/or the negative performance of the Index (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Index.

For the purposes of calculating the Final Redemption Amount the Performance of the Index will be capped at a percentage equal to the Cap, which is specified in the applicable Final Terms. To the extent the Performance of the Index is greater than the Cap, investors will not benefit from the full extent of any positive performance of the Index as the Final Redemption Amount will be capped.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### Basket Index Linked Notes

If the Final Terms specify that the “Capped (Partial) Capital Protection Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the Basket, (iii) the Participation and (iv) the Cap.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

The right of an investor to receive any amount in excess of the Protection Level by way of Final Redemption Amount depends upon the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) of the Basket and the Basket Strike Level and (b) the Basket Initial Level is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. Different participation factors (the “Participation Up” and the “Participation Down”) may apply to the positive performance and the negative performance of the Basket, respectively. Participation factors higher than 100% will magnify the investors’ exposure to the positive performance and/or the negative performance of the Basket (as the case may be). Participation factors lower than 100% will scale down the investors’ exposure to the positive

performance and/or the negative performance of the Basket (as the case may be). Where the Participation Down is higher than the Participation Up, investors will be disproportionately exposed to the negative performance of the Basket.

For the purposes of calculating the Final Redemption Amount the Basket Performance will be capped at a percentage equal to the Cap, which is specified in the applicable Final Terms. To the extent the Basket Performance is greater than the Cap, investors will not benefit from the full extent of any positive performance of the Basket as the Final Redemption Amount will be capped.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### ***(Partial) Capital Protection With Knock-Out Redemption Notes***

If the Final Terms specify that the “(Partial) Capital Protection With Knock-out Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on (i) the Protection Level, (ii) the performance of the Index and (iii)(a) if a Redemption Barrier Event has occurred, the Rebate or (b) if a Redemption Barrier Event has not occurred, the Participation.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors may therefore lose some or (if the Protection Level is zero) all of their investment in the Notes.

How the value of any amount in excess of the Protection Level payable to an investor by way of Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is greater than, or greater than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-out), which is determined by multiplying the Initial Index Level of the Index by the Redemption Barrier(knock-out) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has not occurred, the excess payable above the Protection Level will be an amount equal to the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging-Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). If the quotient of (a) the difference between the Final Index Level (or, if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level and (b) the Initial Index Level is less than or equal to zero, investors will only receive the Protection Level by way of redemption amount and will not be entitled to any amount in excess of the Protection Level.

In calculating the Final Redemption Amount when a Redemption Barrier Event has not occurred, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

If a Redemption Barrier Event has occurred, the excess payable above the Protection Level will be the Rebate specified in the applicable Final Terms.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### ***(Partial) Capital Protection (Vanilla) Redemption Notes***

If the Final Terms specify that the “(Partial) Capital Protection (Vanilla) Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on the Protection Level.

The Protection Level will be specified in the applicable Final Terms. If the Protection Level is lower than 100%, the Notes are not principal protected and investors will lose some or (if the Protection Level is zero) all of their investment in the Notes.

As the Final Redemption Amount is not calculated by reference to the performance of the Index, investors will not be disadvantaged by any negative performance of the Index on redemption but also will not benefit from any positive performance.

#### ***Reverse Convertible Redemption Notes***

##### **Single Index Linked Notes**

If the Final Terms specify that the “Reverse Convertible Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance of the Index over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Performance of the Index in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If the Final Index Level of the Index on the Valuation Date meets the Strike Level Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive performance of the Index.

##### **Basket Index Linked Notes – “Worst Of”: “Not Applicable”**

If the Final Terms specify that the “Reverse Convertible Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes but “Worst Of” does not apply, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only receive a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date. In such circumstances, the Basket Performance will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, if the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, investors will only receive a return of 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive Basket Performance.

#### Basket Index Linked Notes – “Worst Of”: “Applicable”

If the Final Terms specify that the “Reverse Convertible Redemption Note Provisions” apply, the Notes are Basket Index Linked Notes and “Worst Of” applies, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes. If the Final Index Level(k) of one or more of the Basket Components on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance(k) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) and the Strike Level(k) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where the Final Index Level(k) of one or more of the Basket Components on the Valuation Date does not meet the Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If the Final Index Level(k) of one or more of the Basket Components on the Valuation Date meets the Strike Level(k) Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive performance of the Basket Components.

## ***Barrier Reverse Convertible Redemption Notes***

### **Single Index Linked Notes**

If the Final Terms specify that the “Barrier Reverse Convertible Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in), which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred and the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance of the Index over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred and the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Performance of the Index in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred or (ii) a Redemption Barrier Event has occurred but the Final Index Level of the Index on the Valuation Date meets the Strike Level Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive performance of the Index.

### **Basket Index Linked Notes – “Worst Of”: “Not Applicable”**

If the Final Terms specify that the “Barrier Reverse Convertible Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes but “Worst Of” does not apply, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Initial Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only receive a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date. In such circumstances, the Basket Performance will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred in respect of the Basket or (ii) a Redemption Barrier Event has occurred in respect of the Basket but the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive Basket Performance.

#### Basket Index Linked Notes – “Worst Of”: “Applicable”

If the Final Terms specify that the “Reverse Convertible Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes and “Worst Of” applies, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of one or more of the Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance(k) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) and the Strike Level(k) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date in calculating the Final Redemption Amount. The Leverage Put will be specified in the

applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred in respect of each and every Basket Component or (ii) a Redemption Barrier Event has occurred in respect of one or more Basket Component but the Final Index Level(k) of one or more of the Basket Components on the Valuation Date meets the Strike Level(k) Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting the positive performance of the Basket Components.

### ***Capped Outperformance Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Capped Outperformance Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index, (ii) where the Final Index Level meets the Strike Level Criterion, (1) the Participation and (2) the Cap and (iii) where the Final Index Level does not meet the Strike Level Criterion with respect to the Strike Level, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance of the Index over the period from the Strike Date (or, (a) if “Asian-in” applies, the Asian-in Averaging Dates or (b) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date. In such circumstances, the Performance of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes. Furthermore, where the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Performance of the Index in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If the Final Index Level meets the Strike Level Criterion with respect to the Strike Level, a participation factor is applied to the Performance of the Index in calculating the Final Redemption Amount. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100% investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100% any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Finally, where the Final Index Level meets the Strike Level Criterion, the Performance will be capped at the Cap, which is specified in the applicable Final Terms. To the extent that the Performance of the Index is greater than the Cap, investors will not benefit from any positive performance of the Index in excess of the Cap.

#### **Basket Index Linked Notes**

If the Final Terms specify that the “Capped Outperformance Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket, (ii) where the Basket Final Level of the Basket meets the Basket Strike Level

Criterion, (1) the Participation and (2) the Cap and (iii) where the Basket Final Level of the Basket does not meet the Basket Strike Level Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date. In such circumstances, the Basket Performance will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes. Furthermore, where the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If the Basket Final Level of the Basket meets the Basket Strike Level Criterion, a participation factor is applied to the Basket Performance in calculating the Final Redemption Amount. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Finally, where the Basket Final Level meets the Basket Strike Level Criterion, the Basket Performance will be capped at the Cap, which is specified in the applicable Final Terms. To the extent that the Basket Performance of the Basket is greater than the Cap, investors will not benefit from any positive performance of the Basket in excess of the Cap.

### ***Capped Bonus Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Capped Bonus Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index, (ii) if no Redemption Barrier Event has occurred, the Bonus and the Participation and (iii) if no Redemption Barrier Event has occurred or a Redemption Barrier Event has occurred but the Final Index Level meets the Strike Level Criterion, the Cap.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in) (which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms).

If a Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance of the Index over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If a Redemption Barrier Event has occurred and the Final Index Level meets the Strike Level Criterion, the Final Redemption Amount will be calculated on the basis of the Performance of the Index over the period from the Strike Date to the Valuation Date (subject to the Cap specified in the applicable Final Terms).

If no Redemption Barrier Event has occurred, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Performance of the Index (subject to the Cap specified in the applicable Final Terms).

Where a Cap is applied to the Performance of the Index, to the extent that the Performance of the Index is greater than the Cap, investors will not benefit from any positive performance of the Index in excess of the Cap.

In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Basket Index Linked Notes –: “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Capped Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of each Basket Component, (ii) if no Redemption Barrier Event has occurred in respect of each and every Basket Component, the Bonus and the Participation and (iii) if no Redemption Barrier Event has occurred in respect of each and every Basket Component or if a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of each and every Basket Component meets the Strike Level(k) Criterion, the Cap.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component.

A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which in respect of such Basket Component is determined by multiplying the Initial Index Level(k) of such Basket Component by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of one or more Basket Component does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date. In such circumstances, the

Performance(k) of such of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) of such Basket Component and the Strike Level(k) and (b) the Initial Index Level(k) being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of each and every Basket Component meets the Strike Level(k) Criterion, the Final Redemption Amount will be calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date (subject to the Cap specified in the applicable Final Terms).

If no Redemption Barrier Event has occurred in respect of any Basket Component, investors will receive a redemption amount equal to the denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Basket Performance (subject to the Cap specified in the applicable Final Terms).

Where a Cap is applied to the Basket Performance, to the extent that the Basket Performance is greater than the Cap, investors will not benefit from any positive performance of the Basket in excess of the Cap.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Basket Index Linked Notes –: “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Basket level basis”

If the Final Terms specify that the “Capped Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket, (ii) if no Redemption Barrier Event has occurred in respect of the Basket, the Bonus and the Participation and (iii) if no Redemption Barrier Event has occurred in respect of the Basket or if a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level meets the Basket Strike Level Criterion, the Cap.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Initial Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only receive a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date. In such circumstances, the Basket Performance will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If a Redemption Barrier Event has occurred in respect of the Basket but the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, investors will receive a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date (subject to the Cap specified in the applicable Final Terms).

If no Redemption Barrier Event has occurred in respect of the Basket, investors will receive a redemption amount equal to the denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Basket Performance (subject to the Cap specified in the applicable Final Terms).

Where a Cap is applied to the Basket Performance, to the extent that the Basket Performance is greater than the Cap, investors will not benefit from any positive performance of the Basket in excess of the Cap.

In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Basket Index Linked Notes –: “Upside Redemption” specified as “Worst of basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Capped Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component within the Basket, (ii) if no Redemption Barrier Event has occurred, the Bonus and the Participation and (iii) if no Redemption Barrier Event has occurred in respect of each and every Basket Component or if a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of each and every Basket Component meets the Strike Level(k) Criterion, the Cap.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which in respect of such Basket Component is determined by multiplying the Initial Index Level(k) of such Basket Component by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of one or more Basket Component does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance(k) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) of the worst performing Basket Component and the Strike Level(k) and (b) the Initial Index Level(k) being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of each and every Basket Component meets the Strike Level(k) Criterion, the Final Redemption Amount will be calculated on the basis of the Performance(k) of the worst performing Basket

Component over the period from the Strike Date to the Valuation Date (subject to the Cap specified in the applicable Final Terms).

If no Redemption Barrier Event has occurred in respect of any Basket Component, investors will receive a redemption amount equal to the denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date (subject to the Cap specified in the applicable Final Terms).

Where a Cap is applied to the Basket Performance, to the extent that the Basket Performance is greater than the Cap, investors will not benefit from any positive performance of the worst performing Basket Component in excess of the Cap.

In calculating the Final Redemption Amount, a participation factor is applied to the worst performing Basket Component. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

### ***Express Redemption***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Express Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event or an Upper Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in), which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms. An Upper Barrier Event will occur if the Index Level of the Index on the on the Valuation Date (if “Final Monitoring” applies) or any day during the Upper Barrier Observation Period (if “Continuous Monitoring” applies) is greater than, or greater than or equal to (as specified in the applicable Final Terms), the Upper Barrier, which is determined by multiplying the Initial Index Level by the Upper Barrier Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred, no Upper Barrier Event has occurred and the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance of the Index over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where no Upper Barrier Event has occurred, a Redemption Barrier Event has occurred and the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion with respect to the Strike Level, a leverage factor (being the Leverage Put) is applied to the Performance of the Index in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final

Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred or an Upper Barrier Event has occurred; or (ii) no Upper Barrier Event has occurred and a Redemption Barrier Event has occurred but the Final Index Level of the Index on the Valuation Date meets the Strike Level Criterion with respect to the Strike Level, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting any positive performance of the Index.

Basket Index Linked Notes – “Worst Of”: “Not Applicable”

If the Final Terms specify that the “Express Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes but “Worst Of” does not apply, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event or an Upper Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Initial Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms. An Upper Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Upper Barrier Observation Period (if “Continuous Monitoring” applies) is greater than, or greater than or equal to (as specified in the applicable Final Terms), the Basket Upper Barrier, which is determined by multiplying the Basket Initial Level by the Basket Upper Barrier Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket, no Upper Barrier Event has occurred in respect of the Basket and the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only receive a cash return that is calculated on the basis of the Basket Performance over the period from the Strike Date to the Valuation Date. In such circumstances, the Basket Performance will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where no Upper Barrier Event has occurred in respect of the Basket, a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred in respect of the Basket or if an Upper Barrier Event has occurred in respect of the Basket; or (ii) no Upper Barrier Event has occurred in respect of the Basket and a Redemption Barrier Event has occurred in respect of the Basket but the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting any positive Basket Performance.

#### Basket Index Linked Notes – “Worst Of”: “Applicable”

If the Final Terms specify that the “Express Note Provisions” apply and the Notes are Basket Index Linked Notes and “Worst Of” applies, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component and (ii) the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event or an Upper Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Index Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms. An Upper Barrier Event will occur in respect of a Basket Component if the Index Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is greater than, or greater than or equal to (as specified in the applicable Final Terms), the Upper Barrier(k), which is determined by multiplying the Initial Index Level(k) by the Upper Barrier Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component, no Upper Barrier Event has occurred in respect of any Basket Component and the Final Index Level(k) of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date. In such circumstances, the Performance(k) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) and the Strike Level(k) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where no Upper Barrier Event has occurred in respect of any Basket Component, a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(k) of the worst performing Basket Component over the period from the Strike Date to the Valuation Date in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If either (i) no Redemption Barrier Event has occurred in respect of each and every Basket Component or if an Upper Barrier Event has occurred in respect of one or more Basket Component; or (ii) no Upper Barrier Event has occurred in respect of any Basket Component and a Redemption Barrier Event has occurred in respect of one or more Basket Component but the Final Index Level(k) of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will only receive 100% of the specified denomination of the Notes. Investors will not receive any amount in excess of the specified denomination of the Notes reflecting any positive performance of the Basket Components.

## ***Tracker Redemption Notes***

### **Single Index Linked Notes**

If the Final Terms specify that the “Tracker Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) the Participation.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

Investors will only be entitled to a return that is calculated on the basis of the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level and (b) the Initial Index Level is equal to or less than zero, investors will receive less than 100% of the specified denomination of the Notes and may lose all of their investment in the Notes.

In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

### **Basket Index Linked Notes**

If the Final Terms specify that the “Tracker Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) the Participation.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

Investors will only be entitled to a return that is calculated on the basis of the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If the quotient of (a) the difference between the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) of the Basket and the Basket Strike Level and (b) the Basket Initial Level is equal to or less than zero, investors will receive less than 100% of the specified denomination of the Notes and may lose all of their investment in the Notes.

In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

## ***Outperformance Redemption***

### **Single Index Linked Notes**

If the Final Terms specify that the “Outperformance Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) where the Final Index Level meets the Strike Level Criterion, the Participation.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Final Index Level of the Index on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a return that is calculated on the basis of the Performance(2) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level(2) in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). If the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level(2) and (b) the Initial Index Level is equal to or less than zero, investors will receive less than 100% of the specified denomination of the Notes and may lose all of their investment in the Notes.

If the Final Index Level of the Index on the Valuation Date meets the Strike Level Criterion, a participation factor is applied to the Performance(1) of the Index in calculating the Final Redemption Amount. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, where the Final Index Level of the Index on the Valuation Date meets the Strike Level Criterion in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### **Basket Index Linked Notes**

If the Final Terms specify that the “Outperformance Redemption Note Provisions” apply, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) where the Basket Final Level meets the Basket Strike Level Criterion, the Participation.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

If the Basket Final Level of the Basket on the Valuation Date does not meet the Basket Strike Level Criterion, investors will only be entitled to a return that is calculated on the basis of the Basket Performance(2) if over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). If the quotient of (a) the difference between the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-

out” applies, the Max Basket Performance) of the Basket and the Basket Strike Level(2) and (b) the Basket Initial Level is equal to or less than zero, investors will receive less than 100% of the specified denomination of the Notes and may lose all of their investment in the Notes.

If the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, a participation factor is applied to the Basket Performance(1) in calculating the Final Redemption Amount. The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, where the Basket Final Level of the Basket on the Valuation Date meets the Basket Strike Level Criterion, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### ***Bonus Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index, (ii) if no Redemption Barrier Event has occurred, the Bonus and (iii) if a Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in), which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred and the Final Index Level on the Valuation Date does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(2) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(2) of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level(2) and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred and the Final Index Level on the Valuation Date does not meet the Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(2) of the Index in calculating the Final Redemption Amount. The Leverage Put will be

specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred and the Final Index Level on the Valuation Date meets the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(1) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If no Redemption Barrier Event has occurred, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Performance(1) of the Index.

Basket Index Linked Notes – “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of each Basket Component, (ii) if no Redemption Barrier Event has occurred, the Bonus and (iii) if a Redemption Barrier Event has occurred and the Final Index Level(k) does not meet the Strike Level(k) Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(k)(2) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, a leverage factor is applied to the Performance(k)(2) of such

worst performing Basket Component in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Basket Performance(1) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If no Redemption Barrier Event has occurred in respect of each and every Basket Component on the Valuation Date, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Basket Performance(1).

Basket Index Linked Notes – “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Basket level basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket, (ii) if no Redemption Barrier Event has occurred, the Bonus and (iii) if a Redemption Barrier Event has occurred and the Basket Final Level does not meet the Basket Strike Level Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Strike Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level does not meet the Basket Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the Basket Performance(2) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Basket Performance(2) will be a negative value (due to the quotient of (a) the difference between the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) and the Basket Strike Level(2) and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance(2) in calculating the Final Redemption Amount. The Leverage Put will be

specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level meets the Basket Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Basket Performance(1) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If no Redemption Barrier Event has occurred in respect of each and every Basket Component on the Valuation Date, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Basket Performance(1).

Basket Index Linked Notes – “Upside Redemption” specified as “Worst of basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component, (ii) if no Redemption Barrier Event has occurred, the Bonus and (iii) if a Redemption Barrier Event has occurred and the Final Index Level(k) Criterion does not meet the Strike Level(k) Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(k)(2) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) does not meet the Strike Level(k) Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(k)(2) of such worst performing Basket Component in

calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(1) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

If no Redemption Barrier Event has occurred in respect of any Basket Component, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the Performance(k)(1) of the worst performing Basket Component.

### ***Outperformance Bonus Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Outperformance Bonus Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index, (ii) if no Redemption Barrier Event has occurred, (1) the Bonus and (2) the Participation and (iii) if a Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in), which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(2) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(2) of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index and the Strike Level(2) and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, a leverage factor is applied to the Performance(2) of the Index in calculating the

Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred and the Final Index Level meets the Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(1) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

If no Redemption Barrier Event has occurred, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the higher of (1) the Bonus and (2) the product of (a) the Performance(1) of the Index and (b) the Participation.

The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance may also be magnified. If the Participation is less than 100%, any negative performance may be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, if no Redemption Barrier Event has occurred or a Redemption Barrier Event has occurred but the Final Index Level meets the Strike Level Criterion, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes – “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of each Basket Component, (ii) if no Redemption Barrier Event has occurred, (1) the Participation and (2) the Bonus and (iii) if a Redemption Barrier Event has occurred and the Final Index Level(k) does not meet the Strike Level(k) Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if

“Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(k)(2) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) does not meet the Strike Level(k) Criterion, a leverage factor (being the Leverage Put) is applied to the Performance(k)(2) of such worst performing Basket Component in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Basket Performance(1) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

If no Redemption Barrier Event has occurred in respect of one or more Basket Component, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the product of the Basket Performance(1) and the Participation.

The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance may also be magnified. If the Participation is less than 100%, any negative performance may be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of one or more Basket Component, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes – “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Basket level basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket, (ii) if no Redemption Barrier Event has occurred, (1) the Participation and (2) the Bonus and (iii)

if a Redemption Barrier Event has occurred and the Basket Final Level does not meet the Basket Strike Level Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Initial Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level does not meet the Basket Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the Basket Performance(2) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Basket Performance(2) will be a negative value (due to the quotient of (a) the difference between the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) and the Basket Strike Level(2) and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level does not meet the Basket Strike Level Criterion, a leverage factor (being the Leverage Put) is applied to the Basket Performance(2) in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level meets the Basket Strike Level Criterion, investors will only be entitled to a cash return that is calculated on the Basket Performance(1) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

If no Redemption Barrier Event has occurred in respect of the Basket, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus and (2) the product of the Basket Performance(1) and the Participation.

The Participation will be specified in the applicable Final Terms. If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance may also be magnified. If the Participation is less than 100%, any negative performance may be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of the Basket, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency

exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes – “Upside Redemption” specified as “Worst of basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Bonus Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component, (ii) if no Redemption Barrier Event has occurred, (1) the Participation and (2) the Bonus and (iii) if a Redemption Barrier Event has occurred and the Final Index Level(k) does not meet the Strike Level(k) Criterion, the Leverage Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which is determined by multiplying the Initial Index Level(k) by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies). In such circumstances, the Performance(k)(2) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) (or, (i) if “Asian-out” applies, the Average Index Level(k) or (ii) if “Lookback-out” applies, the Max Index Level(k)) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

Furthermore, where a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) does not meet the Strike Level(k) Criterion, a leverage factor (being the Leverage Put) is applied to Performance(k)(2) of such worst performing Basket Component in calculating the Final Redemption Amount. The Leverage Put will be specified in the applicable Final Terms. If the Leverage Put is higher than 100%, any negative performance will be magnified. If the Leverage Put is less than 100%, any negative performance will be scaled down.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(1) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each and

every Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

If no Redemption Barrier Event has occurred in respect of one or more Basket Component, investors will receive a redemption amount equal to the specified denomination of the Notes multiplied by the sum of (i) 100% and (ii) the greater of (1) the Bonus (2) the product of (a) the Performance(k)(1) of the worst performing Basket Component and (b) the Participation. The Participation will be specified in the applicable Final Terms.

If the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance may also be magnified. If the Participation is less than 100%, any negative performance may be scaled down, but investors will not benefit from the full extent of any positive performance.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of one or more Basket Component, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### ***Twin-Win Redemption Notes***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Twin-Win Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index, (ii) if no Redemption Barrier Event has occurred and the Final Index Level meets the Strike Level Criterion, (1) the Participation Call and (2) the Cap and (iii) if no Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, the Participation Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in), which is determined by multiplying the Initial Index Level by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred, investors will only be entitled to a cash return that is calculated on the basis of the Performance(2) of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date. In such circumstances, the Performance(2) of the Index will be a negative value (due to the quotient of (a) the difference between the Final Index Level of the Index and the Strike Level(2) and (b) the Initial Index Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If no Redemption Barrier Event has occurred and the Final Index Level meets the Strike Level Criterion, investors will receive a return on the Notes calculated on the basis of the Performance(1) of the

Index, subject to a Cap (as specified in the applicable Final Terms) and as multiplied by the Participation Call. The Participation Call will be specified in the applicable Final Terms. If the Participation Call is higher than 100%, investors may participate disproportionately in any positive performance or negative performance but if the Participation Call is less than 100%, any positive or negative performance will be scaled down. If Performance(1) is greater than the Cap, investors will not benefit from any positive performance of the Index in excess of the Cap.

If no Redemption Barrier Event has occurred and the Final Index Level does not meet the Strike Level Criterion, investors will receive a return on the Notes calculated on the basis of the absolute Performance(2) of the Index, as multiplied by the Participation Put. The Participation Put will be specified in the applicable Final Terms. If the Participation Put is higher than 100%, investors may participate disproportionately in any performance but if the Participation Put is less than 100%, any performance will be scaled down. As an absolute value of the Performance(1) is used, an investor will receive the least by way of redemption amount when the Final Index Level is at or around the Strike Level(1). An investor will receive a greater redemption amount if there is a negative performance of the Index and the Final Index Level is less than the Strike Level(1) but only just greater than the Redemption Barrier(knock-in) than where there is (1) a less pronounced negative performance of the Index and the differential between the Final Index Level and the Strike Level(1) is not as great, (2) a neutral performance of the Index when the Final Index Level is equal to the Strike Level(1) or (3) a less pronounced positive performance of the Index and the Final Index Level is greater than or equal to the Strike Level(1) but the differential between the Final Index Level and the Strike Level(1) is not as great.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes - “Upside Redemption” specified as “Basket level basis” and “Downside Redemption specified as “Worst of basis”

If the Final Terms specify that the “Twin-Win Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of each Basket Component, (ii) if no Redemption Barrier Event has occurred and the Basket Final Level meets the Basket Strike Level Criterion, (1) the Participation Call and (2) the Cap and (iii) if no Redemption Barrier Event has occurred and the Basket Final Level does not meet the Strike Level Criterion, the Participation Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which in respect of such Basket Component is determined by multiplying the Initial Index Level(k) of such Basket Component by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in

Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date. In such circumstances, the Performance(k) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If no Redemption Barrier Event has occurred in respect of each and every Basket Component and the Final Index Level(k) in respect of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will receive a return on the Notes calculated on the basis of the Basket Performance(1), subject to a Cap and as multiplied by the Participation Call. The Participation Call will be specified in the applicable Final Terms. If the Participation Call is higher than 100%, investors may participate disproportionately in any positive performance or negative performance but if the Participation Call is less than 100%, any positive or negative performance will be scaled down. If the Basket Performance(1) is greater than the Cap, investors will not benefit from any positive or negative performance of the Basket in excess of the Cap.

If no Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will receive a return on the Notes calculated on the basis of the absolute value of the Basket Performance(2), as multiplied by the Participation Put. The Participation Put will be specified in the applicable Final Terms. If the Participation Put is higher than 100%, investors may participate disproportionately in any performance but if the Participation Put is less than 100%, any performance will be scaled down. As an absolute value of the Basket Performance is used an investor will receive least by way of redemption amount when the Basket Final Level is at or around the Basket Strike Level(2). An investor will therefore receive a greater redemption amount if there is a negative performance of the Basket and Basket Final Level is less than the Basket Strike Level(2) but only just greater than the Redemption Barrier(knock-in)(k) than where there is (1) a less pronounced negative performance of the Basket and the differential between the Basket Final Level and the Basket Strike Level(2) is not as great, (2) a neutral performance of the Basket when the Basket Final Level is equal to the Basket Strike Level(2) (or when the Basket Performance is zero) or (3) a less pronounced positive performance of the Basket and the Basket Final Level is greater than or equal to the Basket Strike Level(2) but the differential between the Basket Final Level and the Basket Strike Level is not as great.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of one or more Basket Component, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes – “Upside Redemption” specified as “Basket level basis” and “Downside Redemption” specified as “Basket level basis”

If the Final Terms specify that the “Twin-Win Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket, (ii) if no Redemption Barrier Event has occurred and the Basket Final Level meets the Basket Strike Level Criterion, (1) the Participation Call and (2) the Cap and (iii) if no Redemption Barrier Event has occurred and the Basket Final Level does not meet the Basket Strike Level Criterion, the Participation Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Strike Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket, investors will only be entitled to a cash return that is calculated on the basis Basket Performance(2) over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of the Basket Component, the Lookback-in Observation Date on which Basket Level(t) of the Basket is the lowest (with the Basket Initial Level in respect of such Basket Component on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date. In such circumstances, the Basket Performance(2) will be a negative value (due to the quotient of (a) the difference between the Basket Final Level and the Basket Strike Level(2) and (b) the Basket Initial Level being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If no Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level meets the Basket Strike Level Criterion, investors will receive a return on the Notes calculated on the basis of the Basket Performance(1), as multiplied by the Participation Call. The Participation Call will be specified in the applicable Final Terms. If the Participation Call is higher than 100%, investors may participate disproportionately in any positive performance or negative performance but if the Participation Call is less than 100%, any positive or negative performance will be scaled down. If the Basket Performance(1) is greater than the Cap, investors will not benefit from any positive or negative performance of the Basket in excess of the Cap.

If no Redemption Barrier Event has occurred in respect of the Basket and the Basket Final Level does not meet the Basket Strike Level Criterion, investors will receive a return on the Notes calculated on the basis of the absolute value of the Basket Performance(2), as multiplied by the Participation Put. The Participation Put will be specified in the applicable Final Terms. If the Participation Put is higher than 100%, investors may participate disproportionately in any performance but if the Participation Put is less than 100%, any performance will be scaled down. As an absolute value of the Basket Performance(2) is used an investor will receive least by way of redemption amount when the Basket Final Level is at or around the Basket Strike Level(2). An investor will therefore receive a greater redemption amount if there is a negative performance of the Basket and Basket Final Level is less than the Basket Strike Level(2) but only just greater than the Basket Redemption Barrier(knock-in) than where there is (1) a less pronounced negative performance of the Basket and the differential between the Basket Final Level and the Basket Strike Level(2) is not as great, (2) a neutral performance of the Basket when the Basket Final Level is equal to the Basket Strike Level(2) (or when the Basket Performance(2) is zero) or (3) a less pronounced positive performance of the Basket and the Basket Final Level is greater than or equal to the Basket Strike Level(2) but the differential between the Basket Final Level and the Basket Strike Level(2) is not as great.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of the Basket, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes – “Upside Redemption” specified as “Worst of basis” and “Downside Redemption” specified as “Worst of basis”

If the Final Terms specify that the “Twin-Win Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the worst performing Basket Component, (ii) if no Redemption Barrier Event has occurred and the Final Index Level(k) meets the Strike Level(k) Criterion, (1) the Participation Call and (2) the Cap and (iii) if no Redemption Barrier Event has occurred and the Final Index Level(k) does not meet the Strike Level(k) Criterion, the Participation Put.

The Notes are not principal protected and investors may therefore lose some or all of their investment.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of one or more Basket Component. A Redemption Barrier Event will occur in respect of a Basket Component if the Basket Level of such Basket Component on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Redemption Barrier(knock-in)(k), which in respect of such Basket Component is determined by multiplying the Initial Index Level(k) of such Basket Component by the Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of one or more Basket Component, investors will only be entitled to a cash return that is calculated on the basis of the Performance(k)(2) of the worst performing Basket Component over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date. In such circumstances, the Performance(k)(2) of the worst performing Basket Component will be a negative value (due to the quotient of (a) the difference between the Final Index Level(k) and the Strike Level(k)(2) and (b) the Initial Index Level(k) of the worst performing Basket Component being less than zero) and therefore investors may lose some or all of their investment in the Notes.

If no Redemption Barrier Event has occurred in respect of each and every Basket Component and the Final Index Level(k) in respect of each and every Basket Component on the Valuation Date meets the Strike Level(k) Criterion, investors will receive a return on the Notes calculated on the basis of the Performance(k)(1) of the worst performing Basket Component, subject to a Cap and as multiplied by the Participation Call. The Participation will be specified in the applicable Final Terms. If the Participation Call is higher than 100% investors may participate disproportionately in any positive performance or negative performance but if the Participation Call is less than 100% any positive or negative performance will be scaled down. If the Performance(k)(1) of the worst performing Basket Component is greater than the Cap, investors will not benefit from any positive or negative performance of the Performance(k)(1) of the worst performing Basket Component in excess of the Cap.

If no Redemption Barrier Event has occurred in respect of one or more Basket Component and the Final Index Level(k) in respect of one or more Basket Component on the Valuation Date does not meet the Strike Level(k) Criterion, investors will receive a return on the Notes calculated on the basis of the absolute value of the Performance(k)(2) of the worst performing Basket Component, as multiplied by the Participation Put. The Participation Put will be specified in the applicable Final Terms. If the Participation Put is higher than 100% investors may participate disproportionately in any performance but if the Participation Put is less than 100% any performance will be scaled down. As an absolute value of the Performance(k)(2) of the worst performing Basket Component is used an investor will receive least by way of redemption amount when the

Basket Final Level is at or around the Strike Level(k)(2). An investor will therefore receive a greater redemption amount if there is a negative performance of the Performance(k)(2) of the worst performing Basket Component and Final Index Level(k) is less than the Strike Level(k)(2) but only just greater than the Redemption Barrier(knock-in)(k) than where there is (1) a less pronounced negative performance of the Performance(k)(2) of the worst performing Basket Component and the differential between the Final Index Level(k) and the Strike Level(k)(2) is not as great, (2) a neutral performance of the Performance(k)(2) of the worst performing Basket Component when the Final Index Level(k) is equal to the Strike Level(k)(2) (or when the Performance(k)(2) of the worst performing Basket Component is zero) or (3) a less pronounced positive performance of the Performance(k)(2) of the worst performing Basket Component and the Final Index Level is greater than or equal to the Strike Level(k)(2) but the differential between the Final Index Level and the Strike Level(k)(2) is not as great.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of one or more Basket Component, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### ***Warrant Redemption***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Warrant Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) the Participation. The method of determination of the value of the performance of the Index will depend on whether the Warrant Type is specified as “Call” or “Put”.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

An investor’s return will depend upon the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

#### ***Warrant Type: “Call”***

If the Warrant Type is “Call”, then the Performance of the Index will be a positive value if the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

#### ***Warrant Type: “Put”***

If the Warrant Type is “Put”, then the Performance of the Index will represent an inverse performance and will be a negative value if the Final Index Level (or, (i) if “Asian-out” applies, the Average Index Level

or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100%, investors may participate disproportionately in any negative performance (resulting in an increased Final Redemption Amount), but any positive performance (resulting in a decreased Final Redemption Amount) will also be magnified. If the Participation is less than 100%, any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### Basket Index Linked Notes – “Fixed Best”: Not Applicable

If the Final Terms specify that the “Warrant Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket and (ii) the Participation. The method of determination of the value of the performance of the Basket will depend on whether the Warrant Type is specified as “Call” or “Put”.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

An investor’s return will depend upon the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

#### *Warrant Type: “Call”*

If the Warrant Type is “Call”, then the Basket Performance will be a positive value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

#### *Warrant Type: “Put”*

If the Warrant Type is “Put”, then Basket Performance will represent an inverse performance and will be a negative value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount a participation factor is applied to Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100% investors may participate disproportionately in any negative performance (resulting in a positive Basket Performance value), but any positive performance (resulting in a negative Basket value) will also be magnified. If the Participation is less than 100%, any positive

performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

#### Basket Index Linked Notes – “Fixed Best”: Applicable

If the Final Terms specify that the “Warrant Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket Components and (ii) the Participation. The method of determination of the value of the performance of the Basket Components will depend on whether the Warrant Type is specified as “Call” or “Put”.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

An investor’s return will depend upon the Fixed Best Basket Performance, which is calculated as the sum of (a) the weighted average of the Performance(k) of a specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, in respect of each Basket Component, the Lookback-in Observation Date on which the Basket Level of such Basket Component is the lowest (with the Initial Index Level(k) in respect of such Basket Component on such Lookback-in Observation Date floored at the Lookback-in Floor(k))) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies) and (b) the weighted average of a Fixed Return percentage in respect of each Basket Component other than the specified number of Basket Components that have the lowest Performance(k) amongst all the Basket Components in the Basket, as multiplied by the Participation.

#### *Warrant Type: “Call”*

If the Warrant Type is “Call”, then the Performance(k) of a Basket Component will be a positive value if the Final Index Level of such Basket Component on the Valuation Date (or, (i) if “Asian-out” applies, the Average Index Level(k) of the Basket Component or (ii) if “Lookback-out” applies, the Max Index Level(k) of the Basket Component) is greater than the Strike Level(k). If the Fixed Best Basket Performance is less than or equal to zero, the Notes will redeem at zero.

In calculating the Final Redemption Amount a participation factor is applied to the Fixed Best Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

#### *Warrant Type: “Put”*

If the Warrant Type is “Put”, then the Performance(k) of a Basket Component will represent an inverse performance and will be a negative value if the Final Index Level(k) on the Valuation Date (or, (i) if “Asian-out” applies, the Average Index Level(k) of the Basket Component or (ii) if “Lookback-out” applies, the Max Index Level(k) of the Basket Component) is greater than the Strike Level(k). In such circumstances, the Performance(k) will equate to 100% minus the percentage that the Final Index Level(k), Average Index

Level(k) or Max Index Level(k), as the case may be, is of the Strike Level(k). If the Fixed Best Basket Performance is less than or equal to zero, the Notes will redeem at zero.

In calculating the Final Redemption Amount, a participation factor is applied to Fixed Best Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100% investors may participate disproportionately in any negative performance (resulting in a positive Fixed Best Basket Performance value), but any positive performance (resulting in a negative Fixed Best Basket Performance value) will also be magnified. If the Participation is less than 100%, any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

### ***Spread Warrant Redemption***

#### **Single Index Linked Notes**

If the Final Terms specify that the “Spread Warrant Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Spread, (ii) the performance of the Index and (iii) the Participation. The method of determination of the value of the performance of the Index (ii) will depend on whether the Warrant Type is specified as “Call” or “Put”.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

An investor’s return will depend upon the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies), as multiplied by the Participation.

#### ***Warrant Type: “Call”***

If the Warrant Type is “Call”, then the Performance of the Index will be a positive value if the Final Index Level (or, if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

However, the Final Redemption Amount will be capped at the greater of (i) the Spread multiplied by the Participation and (ii) the Performance multiplied by the Participation. To the extent that the Performance of the Index is greater than or equal to the Spread, investors will not benefit from any positive Performance of the Index in excess of the Spread. The Spread will depend on the Spread Percentage, which will be specified in the applicable Final Terms. If the Spread Percentage is less than 100%, then the investor will receive no return on their investment.

*Warrant Type: “Put”*

If the Warrant Type is “Put”, then the Performance of the Index will represent an inverse performance and will be a negative value if the Final Index Level (or, if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100%, investors may participate disproportionately in any negative performance (resulting in an increased Final Redemption Amount), but any positive performance (resulting in a decreased Final Redemption Amount) will also be magnified. If the Participation is less than 100%, any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

However, the Final Redemption Amount will be capped at the greater of (i) the Spread multiplied by the Participation and (ii) the Performance multiplied by the Participation. To the extent that the Performance of the Index (representing a negative performance of the Index) is greater than or equal to the Spread, investors will not benefit from any negative performance of the Index in excess of the Spread. The Spread will depend on the Spread Percentage, which will be specified in the applicable Final Terms. If the Spread Percentage is greater than 100%, then the investor will receive no return on their investment.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes

If the Final Terms specify that the “Spread Warrant Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the Basket Spread, (ii) the performance of the Basket and (iii) the Participation. The method of determination of the value of the performance of the Basket (ii) will depend on whether the Warrant Type is specified as “Call” or “Put”.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

An investor’s return will depend upon the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance), as multiplied by the Participation.

*Warrant Type: “Call”*

If the Warrant Type is “Call”, then the Basket Performance will be a positive value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative

performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

However, the Final Redemption Amount will be capped at the greater of (i) the Basket Spread multiplied by the Participation and (ii) the Basket Performance multiplied by the Participation. To the extent that the Basket Performance is greater than or equal to the Basket Spread, investors will not benefit from any positive performance of the Basket in excess of the Basket Spread. The Basket Spread will depend on the Spread Percentage, which will be specified in the applicable Final Terms. If the Spread Percentage is greater than 100% then the investor will receive no return on their investment.

*Warrant Type: “Put”*

If the Warrant Type is “Put”, then Basket Performance will represent an inverse performance and will be a negative value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount a participation factor is applied to Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100%, investors may participate disproportionately in any negative performance (resulting in an increased Final Redemption Amount), but any positive performance (resulting in a decreased Final Redemption Amount) will also be magnified. If the Participation is less than 100% any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

However, the Final Redemption Amount will be capped at the greater of (i) the Basket Spread multiplied by the Participation and (ii) the Basket Performance multiplied by the Participation. To the extent that the Basket Performance, as multiplied by the Participation (representing a negative performance of the Basket), is greater than or equal to the Basket Spread, investors will not benefit from any negative performance of the Basket in excess of the Basket Spread. The Basket Spread will depend on the Spread Percentage, which will be specified in the applicable Final Terms. If the Spread Percentage is greater than 100% then the investor will receive no return on their investment.

Furthermore, if “Flexo” applies, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

***Knock-Out Warrant Redemption***

**Single Index Linked Notes**

If the Final Terms specify that the “Knock-Out Warrant Redemption Note Provisions” apply and the Notes are Single Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Index and (ii) (1) if no Redemption Barrier Event has occurred, the Participation or (2), if a Redemption Barrier Event has occurred, the Rebate.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred. A Redemption Barrier Event will occur if the Index Level of the Index on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is greater than, or greater than or equal to (as specified in the applicable

Final Terms), the Redemption Barrier(knock-out), which is determined by multiplying the Strike Level by the Redemption Barrier(knock-out) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred, investors will receive an amount calculated by reference to the Rebate specified in the applicable Final Terms by way of Final Redemption Amount.

If no Redemption Barrier Event has occurred investors will receive a return on the Notes that is calculated on the basis of the Performance of the Index over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Index Level of the Index is the lowest (with the Initial Index Level in respect of such Lookback-in Observation Date floored at the Lookback Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

*Warrant Type: “Call”*

If the Warrant Type is “Call”, then the Performance of the Index will be a positive value if the Final Index Level (or, if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount when no Redemption Barrier Event has occurred, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

*Warrant Type: “Put”*

If the Warrant Type is “Put”, then the Performance of the Index will represent an inverse performance and will be a negative value if the Final Index Level (or, if “Asian-out” applies, the Average Index Level or (ii) if “Lookback-out” applies, the Max Index Level) of the Index is greater than the Strike Level. In calculating the Final Redemption Amount when no Redemption Barrier Event has occurred, a participation factor is applied to the Performance of the Index. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100%, investors may participate disproportionately in any negative performance (resulting in an increased Final Redemption Amount), but any positive performance (resulting in a decreased Final Redemption Amount) will also be magnified. If the Participation is less than 100%, any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

Basket Index Linked Notes

If the Final Terms specify that the “Knock-Out Warrant Redemption Note Provisions” apply and the Notes are Basket Index Linked Notes, the Final Redemption Amount of the Notes will depend on (i) the performance of the Basket Components and (ii) (1) if no Redemption Barrier Event has occurred, the Participation or (2) if a Redemption Barrier Event has occurred, the Rebate.

The Notes are not principal protected and investors may therefore lose some or all of their investment in the Notes.

How the value of the Final Redemption Amount is calculated depends upon whether a Redemption Barrier Event has occurred in respect of the Basket. A Redemption Barrier Event will occur in respect of the Basket if the Basket Level(t) on the Valuation Date (if “Final Monitoring” applies) or any day during the Redemption Barrier Observation Period (if “Continuous Monitoring” applies) is less than, or less than or equal to (as specified in the applicable Final Terms), the Basket Redemption Barrier(knock-in), which is determined by multiplying the Basket Strike Level by the Basket Redemption Barrier(knock-in) Percentage specified in the applicable Final Terms.

If a Redemption Barrier Event has occurred in respect of the Basket, investors will receive an amount calculated by reference to the Rebate specified in the applicable Final Terms by way of Final Redemption Amount.

If no Redemption Barrier Event has occurred in respect of the Basket, investors will receive a return on the Notes calculated on the basis of the Basket Performance over the period from the Strike Date (or, (i) if “Asian-in” applies, the Asian-in Averaging Dates or (ii) if “Lookback-in” applies, the Lookback-in Observation Date on which the Basket Level of the Basket is the lowest (with the Basket Initial Level in respect of the Basket on such Lookback-in Observation Date floored at the Basket Lookback-in Floor)) to the Valuation Date (or the Asian-out Averaging Dates if “Asian-out” applies or the Lookback-out Observation Dates if “Lookback-out” applies).

*Warrant Type: “Call”*

If the Warrant Type is “Call”, then the Basket Performance will be a positive value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount when no Redemption Barrier Event has occurred in respect of the Basket, a participation factor is applied to the Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Call” and the Participation is higher than 100%, investors may participate disproportionately in any positive performance, but any negative performance will also be magnified. If the Participation is less than 100%, any negative performance will be scaled down, but investors will not benefit from the full extent of any positive performance.

*Warrant Type: “Put”*

If the Warrant Type is “Put”, then Basket Performance will represent an inverse performance and will be a negative value if the Basket Final Level (or, (i) if “Asian-out” applies, the Average Basket Performance or (ii) if “Lookback-out” applies, the Max Basket Performance) on the Valuation Date is greater than the Basket Strike Level. In calculating the Final Redemption Amount when no Redemption Barrier Event has occurred in respect of the Basket a participation factor is applied to Basket Performance. The Participation will be specified in the applicable Final Terms. If the Warrant Type is “Put” and the Participation is higher than 100%, investors may participate disproportionately in any negative performance (resulting in an increased Final Redemption Amount), but any positive performance (resulting in a decreased Final Redemption Amount) will also be magnified. If the Participation is less than 100% any positive performance will be scaled down, but investors will not benefit from the full extent of any negative performance.

Furthermore, if “Flexo” applies, where no Redemption Barrier Event has occurred in respect of the Basket, in calculating the Final Redemption Amount, a currency exchange rate is applied. The currency exchange rate is determined as the quotient of (1) the Final XRate and (2) the Initial XRate. The Final XRate is a currency exchange rate as at the Valuation Date and the Initial XRate is a currency exchange rate as at an initial date specified in the applicable Final Terms. If the Final XRate is lower than the Initial XRate, then investors will receive a lower redemption amount.

## ***Lock-In***

### **Single Index Linked Notes**

If the Final Terms specify that “Lock-In” applies and the Notes are Single Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date(t) will, in addition to the factors set out above, also depend on whether a Lock-In Barrier Event has occurred in respect of the Interest Period(t) in relation to such Interest Payment Date(t) and/or whether a Lock In Barrier Event has occurred in respect of any previous Interest Period in relation to any previous Interest Payment Date.

If, in respect of any Interest Period(t) a Lock-In Barrier Event has occurred with respect to any preceding Interest Period and/or a Lock In Barrier Event occurs with respect to the Lock-In Barrier(t) in respect of such Interest Period(t) then, notwithstanding any Rate of Interest which would otherwise have been applicable in respect of such Interest Period(t) and any subsequent Interest Period in relation to any subsequent Interest Payment Date, the Rate of Interest in respect of Interest Period(t) and all subsequent Interest Periods will be equal to Rate of Interest(Lock-In)(t).

If “Performance Based Coupon” applies, Rate of Interest(Lock-In)(t) will be equal to the greater of Fixed Lock-In and Lock-In Performance(t). If “Performance Based Coupon” does not apply, Rate of Interest(Lock-In)(t) will be equal to Fixed Lock-In. Fixed Lock-In will be specified in the applicable Final Terms.

Further, if the Final Terms specify that “Lock-In” applies and the Notes are Single Index Linked Notes, the Final Redemption Amount will, in addition to the factors set out above, also depend on whether a Lock-In Barrier Event has occurred with respect of any Interest Period.

If a Lock-In Event has occurred, the Final Redemption Amount will, notwithstanding any Final Redemption Amount which would otherwise have been applicable, be equal to the product of (1) the Calculation Amount, (2) the CA Factor and (3) 100%. Investors will not receive any amount in excess of this amount reflecting any positive performance of the Index.

### **Basket Index Linked Notes**

If the Final Terms specify that “Lock-In” applies and the Notes are Basket Index Linked Notes, the Rate of Interest in respect of the Notes on any Interest Payment Date(t) will, in addition to the factors set out above, also depend on whether a Lock-In Barrier Event has occurred in respect of the Interest Period(t) in relation to such Interest Payment Date(t) and/or whether a Lock In Barrier Event has occurred in respect of any previous Interest Period in relation to any previous Interest Payment Date.

If, in respect of any Interest Period(t) a Lock-In Barrier Event has occurred with respect to any preceding Interest Period and/or a Lock In Barrier Event occurs with respect to the Lock-In Barrier(t) in respect of such Interest Period(t) then, notwithstanding any Rate of Interest which would otherwise have been applicable in respect of such Interest Period(t) and any subsequent Interest Period in relation to any subsequent Interest Payment Date, the Rate of Interest in respect of Interest Period(t) and all subsequent Interest Periods will be equal to Rate of Interest(Lock-In)(t).

If “Performance Based Coupon” applies, Rate of Interest(Lock-In)(t) will be equal to the greater of Fixed Lock-In and Lock-In Basket Performance(t). If “Performance Based Coupon” does not apply, Rate of Interest(Lock-In)(t) will be equal to Fixed Lock-In. Fixed Lock-In will be specified in the applicable Final Terms.

Further, if the Final Terms specify that “Lock-In” applies and the Notes are Basket Index Linked Notes, the Final Redemption Amount will, in addition to the factors set out above, also depend on whether a Lock-In Barrier Event has occurred with respect of any Interest Period.

If a Lock-In Barrier Event has occurred, the Final Redemption Amount will, notwithstanding any Final Redemption Amount which would otherwise have been applicable, be equal to the product of (1) the Calculation Amount, (2) the CA Factor and (3) 100%. Investors will not receive any amount in excess of this amount reflecting any positive performance of the Basket Components.

### ***Inflation Linked Notes***

The Issuer may issue Inflation Linked Notes with principal and/or interest determined by reference to a particular inflation index. Potential investors should be aware that:

1. the market price of such Inflation Linked Notes may be very volatile. The market price of the Inflation Linked Notes at any time is likely to be affected primarily by changes in the level of the inflation index to which the Inflation Linked Notes are linked. It is impossible to predict how the level of the inflation index will vary over time;
2. such Inflation Linked Notes may involve interest rate risk, including the risk of Noteholders receiving no interest;
3. payment of principal or interest may occur at a different time or in a different currency than expected;
4. they may lose all or a substantial portion of their principal;
5. an inflation index may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities, indices or funds, resulting in principal or interest payable that also may not correlate with such changes;
6. an inflation index connected to emerging markets may be subject to significant fluctuations attributable to, among other things, nationalisation, expropriation or taxation, currency devaluation, foreign exchange control, political, social or diplomatic instability or governmental restrictions. The capital markets in emerging market countries have substantially less volume, and are generally less liquid and more volatile, than those in more developed markets. As a result, an investor in Inflation Linked Notes connected to emerging markets should be prepared to hold such Inflation Linked Notes for an indefinite period and to experience potentially sharp changes in the value of such Inflation Linked Notes throughout that period. Disclosure and regulatory requirements could be less stringent than in other markets, with a low level of monitoring and limited and uneven enforcement of existing regulations. An investor in Inflation Linked Notes connected to emerging markets may therefore experience a decrease in the value of such Inflation Linked Notes as a result of market or other developments that are less likely in more stringently regulated markets;
7. if the principal and/or interest payable in relation to Inflation Linked Notes contains a multiplier greater than one or contains some other leverage factor, the effect of changes in the inflation indices on principal or interest payable likely will be magnified;
8. the timing of changes in an inflation index may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in the inflation index, the greater the effect on yield;
9. Inflation Linked Notes are of limited maturity and, unlike direct investments in an inflation index investors are not able to hold them beyond the Maturity Date in the expectation of a recovery in the price of the underlying;
10. the price at which an investor will be able to sell Inflation Linked Notes prior to the Maturity Date may be at a substantial discount to the market value of the Inflation Linked Notes at the time they are issued depending on the performance of the inflation index;

11. there are market risks associated with an actual investment in the underlying inflation index and, although the Inflation Linked Notes do not create an actual interest in such underlying inflation index, the return on the Inflation Linked Notes generally involves the same associated risks as an actual investment in the underlying inflation index. Potential investors in Inflation Linked Notes should understand that the Issuer has not purported and does not purport to be a source of information concerning the market risks associated with such underlying inflation index;
12. the Issuer may invest in the underlying inflation index for its own account, and may exercise its discretion in respect of matters concerning its holdings of such interests as it sees fit, without regard to the interests of any investor in the Inflation Linked Notes;
13. inflation indices may not correlate with other indices and may not correlate perfectly with the rate of inflation experienced by purchasers of the Notes in such jurisdiction. The value of the Notes which are linked to an inflation index may be based on a calculation made by reference to such inflation index for a month which is several months prior to the date of payment on the Notes and therefore could be substantially different from the level of inflation at the time of the payment on the Notes; and
14. upon the occurrence of certain events in relation to an inflation index – e.g. the inflation index level has not been published or is discontinued or is corrected or such inflation index is rebased or materially modified – then, depending on the particular event, the Calculation Agent or the Issuer may have discretion to determine the level, substitute the original inflation index, adjust the terms and conditions of the Notes or redeem the Notes. Any such event and consequent exercise of discretion by the Calculation Agent or the Issuer may have an adverse effect on the value of the Notes.

***Risks related to Notes which are linked to “benchmarks”***

The London Interbank Offered Rate (“**LIBOR**”), the Euro Interbank Offered Rate (“**EURIBOR**”) and other interest rates or other types of rates and indices which are deemed to be “benchmarks” are the subject of ongoing national and international regulatory reform. Following the implementation of any such potential reforms, the manner of administration of benchmarks may change, with the result that they may perform differently than in the past, or benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted. In June 2016, the European Union adopted a Regulation (the “**Benchmark Regulation**”) on indices (such as LIBOR and EURIBOR) used in the European Union as benchmarks in financial contracts. The Benchmark Regulation became effective as of 1 January 2018. It provides that administrators of benchmarks in the European Union generally must be authorised by or registered with regulators no later than 1 January 2020, and that they must comply with a code of conduct designed primarily to ensure reliability of input data, governing issues such as conflicts of interest, internal controls and benchmark methodologies. Benchmark administrators in the United Kingdom will be required to comply with the Benchmark Regulation so long as the United Kingdom remains part of the European Union (and possibly thereafter, depending on the terms of withdrawal), and will also be required to comply with U.K. national requirements. In addition, on 27 July 2017, the United Kingdom Financial Conduct Authority (“**FCA**”) announced that it will no longer persuade or compel banks to submit rates for the calculation of the LIBOR benchmark after 2021. The announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. The potential elimination of the LIBOR benchmark or any other benchmark, or changes in the manner of administration of any benchmark, could require an adjustment to the terms and conditions, or result in other consequences, in respect of any Notes linked to such benchmark (including but not limited to Notes whose interest rates are linked to LIBOR).

The terms and conditions of the Notes provide for certain fallback arrangements in the event that a published benchmark, including an inter-bank offered rate such as LIBOR, EURIBOR or other relevant reference rates (including any page on which such benchmark may be published (or any successor service)), becomes unavailable or a Benchmark Event otherwise occurs, including the possibility that the rate of interest could then be set by reference to a successor rate or an alternative reference rate and that such successor rate or alternative reference rate may be adjusted (if required) in order to reduce or eliminate, to the fullest extent reasonably practicable in the circumstances, any economic prejudice or benefit (as applicable) to investors arising out of the replacement of the relevant benchmark, all as determined by the Issuer (acting in good faith and in consultation with an Independent Adviser). In certain circumstances the ultimate fallback for the purposes of calculation of interest for a particular Interest Period may result in the rate of interest for the last preceding Interest Period being used. For example, this may result in the effective application of a fixed rate for Floating Rate Notes based on the rate which was last observed on the Relevant Screen Page. In addition, due to the uncertainty concerning the availability of successor rates and alternative reference rates and the involvement of an Independent Adviser, the relevant fallback provisions may not operate as intended at the relevant time.

Any such consequences could have a material adverse effect on the trading market for, liquidity of, value of and return on the relevant Notes. Moreover, any of the above matters or any other significant change to the setting or existence of any relevant reference rate could affect the ability of the Issuer to meet its obligations under such Notes or could have a material adverse effect on the value or liquidity of, and the amount payable under, such Notes. Investors should consider these matters when making their investment decision with respect to the relevant Notes.

### ***Notes issued at a substantial discount or premium***

The issue price of Notes specified in the applicable Final Terms may be more than the market value of such Notes as at the Issue Date, and more than the price, if any, at which a Dealer or any other person is willing to purchase the Notes in the secondary market. In particular, where permitted by applicable law, the issue price in respect of any Notes may take into account amounts with respect to commissions relating to the issue and sale of such Notes and amounts relating to the hedging of the Issuer's obligations under such Notes, and secondary market prices are likely to exclude such amounts. In addition, pricing models of market participants may differ or produce a different result.

The market values of Notes issued at a substantial discount (such as Zero Coupon Notes) or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for more conventional interest-bearing Notes. Generally, the longer the remaining term of such Notes, the greater the price volatility as compared to more conventional interest-bearing Notes with comparable maturities.

### **Exchange rates and exchange controls**

The Issuer will pay principal and interest on the Notes in the Specified Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (1) the Investor's Currency-equivalent yield on the Notes, (2) the Investor's Currency-equivalent value of the principal payable on the Notes and (3) the Investor's Currency-equivalent market value of the Notes.

The Issuer may also issue Notes where the amount of principal and/or interest payable is linked to the performance of one or more exchange rates. Movements in such exchange rates will impact the amount of principal and/or interest payable by the Issuer and may result in investors receiving less than they had expected.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate and/or restrict the convertibility or transferability of currencies within and/or outside of a particular jurisdiction which in turn could adversely affect the ability of the Issuer to make payments in respect of the Notes. As a result, investors may receive less interest or principal than expected, or receive it later than expected or not at all.

### **No gross-up**

All payments made by the Issuer in respect of the Notes shall be made subject to any tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted. Noteholders will not be entitled to receive grossed-up amounts to compensate for any such tax, duty, withholding or other payment and no event of default shall occur as a result of any such withholding or deduction. As a result, investors may receive less interest than expected and the return on their Notes could be significantly adversely affected. In addition, the Issuer shall have the right to redeem Notes issued by it if, on the occasion of the next payment due in respect of such Notes, the Issuer would be required to withhold or account for tax in respect of such Notes.

### **Interest rate risks**

An investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.

### **Notes in New Global Note form**

The New Global Note form has been introduced to allow for the possibility of notes being issued and held in a manner which will permit them to be recognised as eligible collateral for monetary policy of the central banking system for the euro (the “**Eurosystem**”) and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. However, in any particular case, such recognition will depend upon satisfaction of the Eurosystem eligibility criteria at the relevant time. Investors should make their own assessment as to whether the Notes meet such Eurosystem eligibility criteria.

### **Minimum Specified Denomination**

In relation to any issue of bearer Notes which has denominations consisting of a minimum Specified Denomination plus one or more higher integral multiples of another smaller amount, it is possible that such Notes may be traded in amounts that are not integral multiples of such minimum Specified Denomination. Any such holding of Notes that is less than the minimum Specified Denomination may be illiquid and difficult to trade. In such a case, a Noteholder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in its account with the relevant clearing system at the relevant time may not receive a definitive bearer Note in respect of such holding (should Definitive Notes be printed) and would need to purchase a principal amount of Notes such that its holding amounts to a minimum Specified Denomination.

If Definitive Notes are issued, Noteholders should be aware that Definitive Notes that have a denomination which is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

### **Legal investment considerations may restrict certain investments**

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (1) Notes are legal investments for it, (2) Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

### **Modification**

The conditions of the Notes contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally, including modifying the date of maturity of the Notes or any date for payment of interest thereof, reducing or cancelling the amount of principal or the rate of interest payable in respect of the Notes or altering the currency of payment of the Notes or coupon, and to obtain resolutions in writing on matters relating to the Notes from the Noteholders without calling a meeting. These provisions permit defined majorities to bind all Noteholders, including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority or, as the case may be, who did not sign a resolution in writing.

## DOCUMENTS INCORPORATED BY REFERENCE

The following documents, which have previously been published or are published simultaneously with this Base Prospectus and have been approved by the AFM or filed with it, shall be deemed to be incorporated in, and to form part of, this Base Prospectus.

### *Level 1 Programme Prospectus*

The Base Prospectus for the issuance of Medium Term Notes and Inflation Linked Notes in respect of the €40,000,000,000 Global Issuance Programme of ING Bank N.V. and ING Bank N.V., Sydney Branch dated 22 June 2018, excluding the sections entitled “Summary of the Programme relating to Non-Exempt PD Notes”, “Risk Factors”, “Documents Incorporated by Reference”, “Overview of the Programme”, “Form of Final Terms of the Notes”, “Form of Final Terms of the Inflation Linked Notes”, “Taxation”, “ERISA and Certain Other U.S. Considerations” and “Subscription and Sale”.

### *The Issuer*

This Base Prospectus should be read and construed in conjunction with the registration document of the Issuer dated 30 March 2018, prepared in accordance with Article 5 of the Prospectus Directive and approved by the AFM (together with the supplements thereto dated 11 May 2018 and 22 June 2018, the “**Issuer Registration Document**” or the “**ING Bank N.V. Registration Document**”), including, for the purpose of clarity, the following items incorporated by reference therein:

- (i) the Articles of Association (*statuten*) of the Issuer;
- (ii) the publicly available annual report of the Issuer in respect of the year ended 31 December 2017, including the audited consolidated financial statements and auditors’ reports in respect of such year;
- (iii) the publicly available audited consolidated financial statements of the Issuer in respect of the years ended 31 December 2016 and 2015 (in each case, together with the auditors’ reports thereon and explanatory notes thereto); and
- (iv) the press release published by ING Group on 9 May 2018 entitled “ING posts 1Q18 net result of €1,225 million” (the “**Q1 Press Release**”). The Q1 Press Release contains, among other things, the consolidated unaudited interim results of ING Group as at, and for the three month period ended, 31 March 2018, as well as information about recent developments during this period in the banking business of ING Group, which is conducted substantially through the Issuer and its consolidated group.

Any statement contained in a document which is incorporated by reference herein shall be deemed to be modified or superseded for the purpose of this Base Prospectus to the extent that a statement contained herein modifies or supersedes such earlier statement (whether expressly, by implication or otherwise).

Where only certain sections of a document referred to above are incorporated by reference in this Base Prospectus, the parts of the document which are not incorporated by reference are either not relevant to prospective investors in the Notes or covered elsewhere in this Base Prospectus.

With respect to the Q1 Press Release, prospective investors should note that the Issuer’s consolidated operations, while materially the same, are not identical with the reported financial and statistical information on a segment basis for the banking business of ING Group as described in the Q1 Press Release, because the financial and statistical information reported by ING Group also contains certain financial items incurred solely at the level of ING Group (on a standalone basis) which are therefore not included in the consolidated operations of the Issuer (being a wholly-owned subsidiary of ING Group). Despite the incorporation by

reference of one or more press releases published by it, ING Group is not responsible for the preparation of this Base Prospectus.

The Issuer will provide, without charge, to each person to whom a copy of this Base Prospectus has been delivered in accordance with applicable law, upon the request of such person, a copy of any document which is incorporated herein by reference. Requests for any such document should be directed to the Issuer at Foppingadreef 7, 1102 BD Amsterdam, The Netherlands. In addition, this Base Prospectus and any document which is incorporated herein by reference will be made available on the website of ING (<https://www.ingmarkets.com/downloads/687/global-issuance-programme> (for the Base Prospectus, the Issuer Registration Document), <https://www.ing.com/Investor-relations/Annual-Reports.htm> (for the annual reports), <https://www.ing.com/Investor-relations/Results-Interim-Accounts/Quarterly-Results.htm> (for the Q1 Press Release) and <https://www.ing.com/About-us/Corporate-Governance/Legal-structure-and-Regulators/Articles-of-Association.htm> (for the Articles of Association)). The Issuer will, in the event of a significant new factor, material mistake or inaccuracy relating to the information contained in this Base Prospectus which is capable of affecting the assessment of any Notes, prepare a supplement to this Base Prospectus or publish a new prospectus for use in connection with any subsequent issue of Notes to be admitted to trading on an EU regulated market or to be offered to the public in the EU or in Switzerland.

## OVERVIEW OF THE PROGRAMME

### PART 1: Introduction

This Base Prospectus replaces and supersedes the base prospectus relating to the Programme dated 26 June 2017 and any supplements thereto in connection with the issue of Index Linked Notes under the Programme. Any Notes issued under this Base Prospectus are issued subject to the provisions set out herein. This does not affect any Notes issued prior to the date hereof.

The Notes issued under this Base Prospectus by the Issuer will comprise Notes which are issued pursuant to the “Terms and Conditions of Index Linked Notes” (“**Index Linked Notes**”). Such Notes may also constitute, among others, fixed rate notes (“**Fixed Rate Notes**”), floating rate notes (“**Floating Rate Notes**”), zero coupon notes (“**Zero Coupon Notes**”), tailor-made interest notes (“**Tailor-Made Interest Notes**”), step-up interest notes (“**Step-Up Interest Notes**”), floater interest notes (“**Floater Interest Notes**”), floater with lock-in interest notes (“**Floater with Lock-In Interest Notes**”), reverse floater interest notes (“**Reverse Floater Interest Notes**”), ratchet floater interest notes (“**Ratchet Floater Interest Notes**”), switchable (fixed to floating) interest notes (“**Switchable (Fixed to Floating) Interest Notes**”), switchable (floating to fixed) interest notes (“**Switchable (Floating to Fixed) Interest Notes**”), steepener interest notes (“**Steepener Interest Notes**”), steepener with lock-in interest notes (“**Steepener with Lock-In Interest Notes**”), range accrual(rates) interest notes (“**Range Accrual(Rates) Interest Notes**”), range accrual(spread) interest notes (“**Range Accrual(Spread) Interest Notes**”), inverse range accrual interest notes (“**Inverse Range Accrual Interest Notes**”), KO range accrual interest notes (“**KO Range Accrual Interest Notes**”), dual range accrual interest notes (“**Dual Range Accrual Interest Notes**”), snowball interest notes (“**Snowball Interest Notes**”), snowranger interest notes (“**SnowRanger Interest Notes**”), barrier(rates) interest notes (“**Barrier(Rates) Interest Notes**”), reference item(inflation) performance linked interest notes (“**Reference Item(Inflation) Performance Linked Interest Notes**”), reference item(inflation) indexed interest notes (“**Reference Item(Inflation) Indexed Interest Notes**”), inflation indexed redemption notes (“**Inflation Indexed Redemption Notes**”), inflation indexed redemption with floor notes (“**Inflation Indexed Redemption with Floor Notes**”), step-up barrier interest notes (“**Step-Up Barrier Interest Notes**”), memory interest notes (“**Memory Interest Notes**”), one touch memory interest notes (“**One Touch Memory Interest Notes**”), range accrual(index) interest notes (“**Range Accrual(Index) Interest Notes**”), barrier(index) interest notes (“**Barrier(Index) Interest Notes**”), one touch barrier(index) interest notes (“**One Touch Barrier(Index) Interest Notes**”), reference item(index) performance linked interest notes (“**Reference Item(Index) Performance Linked Interest Notes**”), best of interest notes (“**Best Of Interest Notes**”), one touch Lock-In(index) interest notes (“**One Touch Lock-In(Index) Interest Notes**”), annual coupon interest notes (“**Annual Coupon Interest Notes**”), uncapped (partial) capital protection redemption notes (“**(Partial) Capital Protection Redemption Notes**”), (partial) capital protection redemption notes (“**(Partial) Capital Protection Redemption Notes**”), (partial) capital protection with knock-out redemption notes (“**(Partial) Capital Protection With Knock-Out Redemption Notes**”), (partial) capital protection (Vanilla) Redemption Notes (“**(Partial) Capital Protection (Vanilla) Redemption Notes**”), reverse convertible redemption notes (“**Reverse Convertible Redemption Notes**”), barrier reverse convertible redemption notes (“**Barrier Reverse Convertible Redemption Notes**”), capped outperformance redemption notes (“**Capped Outperformance Redemption Notes**”), capped bonus redemption notes (“**Capped Bonus Redemption Notes**”), express redemption notes (“**Express Redemption Notes**”), tracker redemption notes (“**Tracker Redemption Notes**”), outperformance redemption notes (“**Outperformance Redemption Notes**”), bonus redemption notes (“**Bonus Redemption Notes**”), outperformance bonus redemption notes (“**Outperformance Bonus Redemption Notes**”), twin-win redemption notes (“**Twin-Win Redemption Notes**”), warrant redemption notes (“**Warrant Redemption Notes**”), spread warrant redemption notes

(“**Spread Warrant Redemption Notes**”), knock-out warrant redemption (“**Knock-Out Warrant Redemption Notes**”), and instalment notes (“**Instalment Notes**”).

Notes may be issued in unitised form (“**Units**”) and references in this Base Prospectus to Notes shall also include Units. Units shall have an individual issue price instead of a (specified) denomination and where reference in this Base Prospectus is made to a minimum (specified) denomination for Notes, such term shall be deemed to include references to a minimum issue price for Units.

Notes may be denominated in any currency determined by the Issuer and the relevant Dealer (if any). References herein to “**Notes**” are to the Index Linked Notes which may be issued by the Issuer under this Base Prospectus. References herein to “**Noteholders**” are to holders of Notes.

Subject as set out herein, the Notes will be subject to such minimum or maximum maturity as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the Issuer or the relevant Specified Currency (as defined herein). The maximum aggregate nominal amount of all Notes and obligations from time to time outstanding under the Programme (including, but not limited to, Notes issued under this Base Prospectus) will not exceed €40,000,000,000 (or its equivalent in other currencies calculated as described herein).

None of the Notes will contain any provision that would oblige the Issuer to gross up any amounts payable thereunder in the event of any withholding or deduction for or on account of taxes levied in any jurisdiction.

The Notes will be issued on a continuing basis by the Issuer to the purchasers thereof, which may include any Dealers appointed under the Programme from time to time, which appointment may be for a specific issue or on an ongoing basis and which may include ING Bank N.V. acting in its capacity as a Dealer and separate from that as Issuer (each a “**Dealer**” and together the “**Dealers**”). The Dealer or Dealers with whom the Issuer agrees or proposes to agree on the issue of any Notes is or are referred to as the “**relevant Dealer**” in respect of those Notes.

The Issuer has a senior debt rating from Standard & Poor’s Credit Market Services Europe Limited (“**Standard & Poor’s**”), Moody’s Investors Service Ltd. (“**Moody’s**”) and Fitch France S.A.S. (“**Fitch**”), details of which are contained in the Issuer Registration Document. Standard & Poor’s, Moody’s and Fitch are established in the European Union and are registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies (as amended from time to time, the “**CRA Regulation**”).

Tranches (as defined herein) of Notes issued under this Base Prospectus may be rated or unrated. Where a Tranche of Notes is to be rated, such rating will not necessarily be the same as any ratings assigned to the Issuer, the Programme or any Notes already issued. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

The Issuer may decide to issue Notes in a form not contemplated by the various terms and conditions of the Notes, as the case may be, herein. In any such case a supplement to this Base Prospectus, if appropriate, will be made available which will describe the form of such Notes.

This Base Prospectus, when read together with the Level 1 Programme Prospectus and Issuer Registration Document, comprises a base prospectus for the purposes of Article 5.4 of the Prospectus Directive (as implemented in the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) and implementing regulations) for the purpose of giving information with regard to the Issuer and the Notes to be issued by the Issuer, which, according to the particular nature of the Issuer and the Notes to be issued by the Issuer, is necessary to enable investors to make an informed assessment of the assets and liabilities, financial

position, profit and losses and prospects of the Issuer and of the rights attached to the Notes to be issued by the Issuer.

The Issuer accepts responsibility for the information contained in this Base Prospectus. To the best of the knowledge of the Issuer (which has taken all reasonable care to ensure that such is the case), the information contained in this Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. The information in “DTC Information – Registered Notes issued by the Global Issuer” has been obtained from DTC. The information has been accurately reproduced and, as far as the Issuer is aware and are able to ascertain from DTC, no facts have been omitted which would render the reproduced information inaccurate or misleading. In relation to each separate issue of Notes, the issue price and the amount of such Notes will be determined, based on then prevailing market conditions at the time of the issue of the Notes, and will be set out in the applicable Final Terms (as defined below). The Final Terms will be provided to investors and filed with the relevant competent authority for the purposes of the Prospectus Directive (i) when any public offer of Notes is made in the European Economic Area as soon as practicable and in advance of the beginning of the offer and (ii) when admission to trading of Notes on a regulated market in the European Economic Area is sought as soon as practicable and if possible in advance of the admission to trading.

Notice of the aggregate nominal amount of Notes, interest (if any) payable in respect of Notes, the issue price of Notes and any other terms and conditions not contained herein which are applicable to each Tranche of Notes will be set forth in the final terms (the “**Final Terms**”) for the particular issue.

Notes may be issued in bearer form and registered form (see “Form of the Notes” in the Level 1 Programme Prospectus).

This Base Prospectus is to be read in conjunction with any supplement and any Final Terms hereto and with all documents which are deemed to be incorporated herein by reference (see “Documents Incorporated by Reference”). This Base Prospectus shall be read and construed on the basis that such documents are incorporated into, and form part of, this Base Prospectus.

To the fullest extent permitted by law, none of the Dealers (for the avoidance of doubt, excluding ING Bank N.V. acting in its capacity as Issuer) accepts any responsibility for the contents of this Base Prospectus or for any other statement made or purported to be made by a Dealer or on its behalf in connection with the Issuer or the issue and offering of any Notes. Each Dealer (for the avoidance of doubt, excluding ING Bank N.V. acting in its capacity as Issuer) accordingly disclaims all and any liability whether arising in tort or contract or otherwise (save as referred to above) which it might otherwise have in respect of this Base Prospectus or any such statement.

No person has been authorised to give any information or to make any representation not contained in or not consistent with this Base Prospectus or any other information supplied in connection with this Base Prospectus and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer or any of the Dealers appointed by the Issuer.

Neither this Base Prospectus nor any other information supplied in connection with this Base Prospectus (i) is intended to provide the basis of any credit or other evaluation or (ii) should be considered as a recommendation by the Issuer or any of the Dealers or Arrangers that any recipient of this Base Prospectus or any other information supplied in connection with this Base Prospectus should purchase any Notes. Each investor contemplating purchasing any Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer. Neither this Base Prospectus nor any other information supplied in connection with this Base Prospectus or the issue of any Notes constitutes an offer or invitation by or on behalf of the Issuer or any of the Dealers or Arrangers to any person to subscribe for or to purchase any Notes.

The Notes issued under this Base Prospectus are sophisticated instruments and can involve a high degree of risk and are intended for sale only to those investors capable of understanding the risk entailed in such instruments. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risk and that they understand the nature of the Notes as an investment in the light of their own circumstances and financial condition. Prospective purchasers of the Notes should conduct their own investigations and, in deciding whether or not to purchase Notes, should form their own views of the merits of an investment related to the Notes based upon such investigations and not in reliance upon any information given in this Base Prospectus and the applicable Final Terms. In particular, each investor contemplating purchasing any Notes should make its own appraisal of any index to which such Note may be linked (including the creditworthiness of the issuer of any share or debt or other security comprised in such index). If in doubt, potential investors are strongly recommended to consult with their independent financial advisers before making any investment decision.

Neither the delivery of this Base Prospectus nor the offering, sale or delivery of any Notes shall in any circumstances imply that the information contained herein concerning the Issuer is correct at any time subsequent to the date hereof or that any other information supplied in connection with this Base Prospectus is correct as of any time subsequent to the date indicated in the document containing the same. The Dealers do not undertake to review the financial condition or affairs of the Issuer during the life of this Base Prospectus. Investors should carefully review and evaluate, *inter alia*, the most recent financial statements of the Issuer when deciding whether or not to purchase any Notes.

Other than in Belgium, France, Luxembourg, Poland and The Netherlands, the Issuer, the Arranger and any Dealer do not represent that this Base Prospectus may be lawfully distributed, or that Notes may be lawfully offered, in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer, the Arranger or any Dealer under the Programme which would permit a public offering of the Notes or distribution of this document in any jurisdiction where action for that purpose is required, other than (if so indicated in the applicable Final Terms) in certain Member States of the European Economic Area and Switzerland. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither this Base Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction where such offer, sale, distribution and/or publication would be prohibited and each Dealer will be required to represent that all offers and sales by it of Notes will be made on these terms. The Issuer may seek to have an expected issue of Notes admitted to trading on Euronext Amsterdam, Euronext Paris or the Warsaw Stock Exchange on an “as-if-and-when-issued” basis, generally starting three business days preceding the Issue Date until the Issue Date (both the first day of the as-if-and-when-issued-trading and the Issue Date will be specified in the applicable Final Terms). As-if-and-when-issued-trading makes it possible to trade in the Notes listed on Euronext Amsterdam, Euronext Paris or the Warsaw Stock Exchange before they have been issued. However, prospective investors in Notes should not rely on trading on this basis as a commitment by the Issuer to accept an application to subscribe for Notes to refrain from withdrawing, cancelling or otherwise modifying an offer of Notes.

The distribution of this Base Prospectus and the offer or sale of Notes may be restricted by law in certain jurisdictions. Persons into whose possession this Base Prospectus or any Notes come must inform themselves about, and observe, any such restrictions. See “Subscription and Sale”.

Unless the Final Terms in respect of any Notes specifies Belgium as public offer jurisdiction, the Notes are not intended to be offered, sold or otherwise made available to and will not be offered, sold or otherwise made available to “consumers” (*consumenten/consommateurs*) within the meaning of the Belgian Code of Economic law (*Wetboek economisch recht/Code de droit économique*).

Non-Exempt PD Notes may, subject as provided below, be offered in a Member State of the European Economic Area that has implemented the Prospectus Directive (each a “**Relevant Member State**”) in circumstances where there is no exemption from the obligation under the Prospectus Directive to publish a prospectus. Any such offer is referred to in this Base Prospectus as a “**Public Offer**”.

This Base Prospectus has been prepared on a basis that permits offers that are not made within an exemption from the requirement to publish a prospectus under Article 3.2 of the Prospectus Directive in Belgium, France, Luxembourg, Poland and The Netherlands (together the “**Public Offer Jurisdictions**”). Any person making or intending to make a Public Offer of Non-Exempt PD Notes in a Public Offer Jurisdiction on the basis of this Base Prospectus must do so only with the Issuer’s consent (see “Consent to Use of this Base Prospectus – Consent given in accordance with Article 3.2 of the Prospectus Directive”). Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any Public Offer of Notes in circumstances in which an obligation arises for either the Issuer or any Dealer to publish or supplement this Base Prospectus for such offer.

If the Issuer intends to make or authorise any Public Offer of Non-Exempt PD Notes to be made in one or more Relevant Member States other than in a Public Offer Jurisdiction, it will prepare a supplement to this Base Prospectus specifying such Relevant Member State(s) and any additional information required by the Prospectus Directive in respect thereof. Such supplement will also set out provisions relating to the Issuer’s consent to use this Base Prospectus in connection with any such Public Offer.

**MIFID II product governance / target market** – The Final Terms in respect of any Notes will include a legend entitled “MiFID II Product Governance” which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the “**MiFID Product Governance Rules**”), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MIFID Product Governance Rules.

**IMPORTANT – EEA RETAIL INVESTORS** – If the Final Terms in respect of any Notes includes a legend entitled “Prohibition of Sales to EEA Retail Investors”, the Notes are not intended to be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (“**MiFID II**”); (ii) a customer within the meaning of Directive 2002/92/EC (as amended, “**IMD**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Directive. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

The Notes have not been and will not be registered under the United States Securities Act of 1933, as amended (the “**Securities Act**”) or with any securities regulatory authority of any state or other jurisdiction of the United States. Accordingly, the Notes may not be offered, sold, pledged or otherwise transferred within the United States or to or for the account or benefit of U.S. persons, except in accordance with Regulation S

under the Securities Act or pursuant to an exemption from the registration requirements of the Securities Act and any applicable state securities laws. Registered Notes issued by the Issuer may be offered and sold in the United States exclusively to persons reasonably believed by the Issuer or the Dealers (if any), to be QIBs (as defined herein), or placed privately with accredited investors as defined in Rule 501(a) of Regulation D (“**Accredited Investors**”) under the Securities Act. Each U.S. purchaser of Registered Notes issued by the Issuer is hereby notified that the offer and sale of any Registered Notes to it may be made in reliance upon the exemption from the registration requirements of the Securities Act provided by Rule 144A. To permit compliance with Rule 144A under the Securities Act in connection with the resales of Registered Notes issued by the Issuer, the Issuer is required to furnish, upon request of a holder of a Registered Note issued by the Issuer or a prospective purchaser designated by such holder, the information required to be delivered under Rule 144A(d)(4) under the Securities Act. Registered Notes issued by the Issuer are not transferable to other holders within the United States, except upon satisfaction of certain conditions as described under “Subscription and Sale”. Certain U.S. tax law requirements may also apply to U.S. holders of the Notes.

The Notes have not been approved or disapproved by the U.S. Securities and Exchange Commission, any state securities commission in the United States or any other U.S. regulatory authority, nor have any of the foregoing authorities passed upon or endorsed the merits of the offering of the Notes or the accuracy or the adequacy of this Base Prospectus. Any representation to the contrary is a criminal offence in the United States.

No prospectus or other disclosure document (as defined in the Australian Corporations Act) in relation to this Base Prospectus or any Notes has been or will be lodged with ASIC. Each Dealer has represented and agreed and each further Dealer appointed under this Base Prospectus will be required to represent and agree that, unless the applicable Final Terms (or a supplement to this Base Prospectus) otherwise provides, it:

- (a) has not made or invited, and will not make or invite, an offer of the Notes for issue or sale in Australia (including an offer or invitation which is received by a person in Australia); and
- (b) has not distributed or published, and will not distribute or publish, any base prospectus or other offering material or advertisement relating to any Notes in Australia,

unless the offeree or invitee is a “wholesale client” (within the meaning of section 761G of the Australian Corporations Act) and (i) the aggregate consideration payable by each offeree is at least A\$500,000 (or its equivalent in an alternate currency) (disregarding moneys lent by the offeror or its associates) or the offer otherwise does not require disclosure to investors under either Part 6D.2 or Chapter 7 of the Australian Corporations Act, (ii) such action complies with applicable laws and directives (including, without limitation, the financial services licensing requirements of Chapter 7 of the Corporations Act) and (iii) such action does not require any document to be lodged with ASIC.

Section 708(19) of the Australian Corporations Act provides that an offer of debentures for issue or sale does not need disclosure to investors under Part 6D.2 of the Australian Corporations Act if the Issuer is an ADI.

In addition, each Dealer has agreed, and each further Dealer appointed under this Base Prospectus will be required to agree that, in relation to any Notes issued by the Issuer, it will comply with the directive issued by the Assistant Treasurer of the Commonwealth of Australia dated 23 September 1996 as contained in Banking (Exemption) Order No. 82 which may require all offers and transfers to be for a consideration of at least A\$500,000. Banking (Exemption) Order No. 82 does not apply to transfers which occur outside Australia.

The Banking (Foreign Exchange) Regulations and other regulations in Australia prohibit payments, transactions and dealings with assets or named individuals or entities subject to international sanctions or associated with terrorism.

This Base Prospectus includes general summaries of certain Belgian, Dutch, French, Luxembourg, Polish, United Kingdom and U.S. federal income tax considerations relating to an investment in the Notes issued by the Issuer (see “Taxation”). Such summaries may not apply to a particular holder of Notes. Any potential investor should consult its own tax adviser for more information about the tax consequences of acquiring, owning and disposing of Notes issued by the Issuer in its particular circumstances.

All references in this Base Prospectus to **“U.S. dollars”**, **“dollar”**, **“U.S.\$”**, **“\$”**, **“USD”** and **“U.S. cent.”** refer to the lawful currency of the United States of America, those to **“Japanese Yen”**, **“Yen”**, **“JPY”** and **“¥”** refer to the lawful currency of Japan, those to **“euro”**, **“EUR”** and **“€”** refer to the lawful currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community as amended by the Treaty on European Union, those to **“Australian Dollar”**, **“AUD”**, **“AU\$”** and **“A\$”** refer to the lawful currency of Australia, those to **“Brazilian Real”**, **“Brazilian Reais”** and **“BRL”** refer to the lawful currency of the Federative Republic of Brazil, those to **“Canadian Dollar”**, **“CAD”** and **“C\$”** refer to the lawful currency of Canada, those to **“Czech Koruna”** and **“CZK”** refer to the lawful currency of the Czech Republic, those to **“Danish Krone”**, **“DKr”** and **“DKK”** refer to the lawful currency of the Kingdom of Denmark, those to **“Hong Kong Dollar”**, **“HK\$”** and **“HKD”** refer to the lawful currency of Hong Kong, those to **“Korean Won”** and **“KRW”** are to the lawful currency of the Republic of Korea, those to **“Mexican Peso”**, **“MXN”** and **“MXP”** refer to the lawful currency of the United Mexican States, those to **“New Zealand Dollar”**, **“NZ\$”** and **“NZD”** refer to the lawful currency of New Zealand, those to **“Norwegian Krone”**, **“Nkr”** and **“NOK”** refer to the lawful currency of the Kingdom of Norway, those to **“Philippine Peso”** and **“PHP”** refer to the lawful currency of the Republic of the Philippines, those to **“Renminbi”**, **“CNY”** or **“RMB”** are to the single currency of the People’s Republic of China, those to **“PLN”** refer to the lawful currency of the Republic of Poland, those to **“Russian Ruble”**, **“Russian Rouble”**, **“RUR”** and **“RUB”** refer to the lawful currency of the Russian Federation, those to **“Singapore Dollar”**, **“S\$”** and **“SGD”** refer to the lawful currency of the Republic of Singapore, those to **“Sterling”**, **“£”**, **“GBP”** and **“STG”** refer to the lawful currency for the time being of the United Kingdom of Great Britain and Northern Ireland, those to **“Swedish Krona”**, **“SKr”** and **“SEK”** refer to the lawful currency of the Kingdom of Sweden, those to **“Swiss Franc”**, **“Sfr”**, **“CHF”** and **“SWF”** refer to the lawful currency of Switzerland and those to **“Taiwanese Dollar”**, **“New Taiwanese Dollar”** and **“TWD”** refer to the lawful currency of the Republic of China.

**In connection with the issue of any Tranche of Notes, the Issuer or one or more Dealers (in such capacity, the “Stabilising Manager(s)” (or person(s) acting on behalf of any Stabilising Manager(s)) may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the final terms (in the case of Notes convertible or exchangeable into shares or into other securities equivalent to shares) or terms (in all other cases) of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilisation action or over-allotment must be conducted by the relevant Stabilising Manager(s) (or any person acting on behalf of any Stabilising Manager(s)) in accordance with all applicable laws and rules.**

This Base Prospectus includes or incorporates by reference “forward-looking statements” within the meaning of Section 27A of the Securities Act and Section 21E of the United States Securities Exchange Act

of 1934, as amended (the “**Exchange Act**”). All statements other than statements of historical fact included or incorporated by reference in this Base Prospectus, including, without limitation, those regarding the Issuer’s financial position, business strategy, plans and objectives of management for future operations, are forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Issuer, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Issuer’s present and future business strategies and the environment in which the Issuer will operate in the future. These forward-looking statements speak only as of the date of this Base Prospectus or as of such earlier date at which such statements are expressed to be given. The Issuer expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statement contained herein to reflect any change in the Issuer’s expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

Amounts payable under the Notes may be calculated by reference to the EURIBOR which is provided by the European Money Markets Institute (“**EMMI**”), LIBOR which is provided by the ICE Benchmark Administration Limited (“**ICE**”), or any other benchmark, in each case as specified in the applicable Final Terms. As at the date of this Base Prospectus, EMMI and ICE are not included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority (“**ESMA**”) pursuant to Article 36 of the Benchmark Regulation.

As far as the Issuer is aware, the transitional provisions in Article 51 of the Benchmark Regulation apply, such that EMMI and ICE are not currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence).

If a benchmark (other than EURIBOR or LIBOR) is specified in the applicable Final Terms, the applicable Final Terms will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks established and maintained by ESMA pursuant to Article 36 of the Benchmark Regulation.

The registration status of any administrator under the Benchmark Regulation is a matter of public record and, save where required by applicable law, the Issuer does not intend to update the Base Prospectus or any applicable Final Terms to reflect any change in the registration status of the administrator.

## **PART 2: Notes**

*The following section is qualified in its entirety by the remainder of this Base Prospectus.*

### **Programme:**

Global Issuance Programme.

Under this €40,000,000,000 Global Issuance Programme, the Issuer may from time to time issue Notes. These Notes may or may not be listed on a stock exchange.

The applicable terms of any Notes will be determined by the Issuer and, with respect to issues of Notes for which one or more Dealers are appointed, the relevant Dealer(s) prior to the issue of the Notes. Such terms will be set out in the General Terms and Conditions of the Notes and/or the Inflation Linked Conditions and/or the Index Linked Note Conditions, endorsed on, or incorporated by reference into, the Notes, as modified and supplemented by the applicable Final Terms attached to, or

|                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                               | <p>endorsed on, or applicable to such Notes, as more fully described in the “General Terms and Conditions of the Notes”, and/or the “Terms and Conditions of Inflation Linked Notes” section of the Level 1 Programme Prospectus and/or the “Terms and Conditions of the Index Linked Notes” section of this Base Prospectus, as applicable.</p>                                                                                                                                                                             |
| <b>Size:</b>                                  | <p>Up to €40,000,000,000 (or its equivalent in other currencies calculated as described herein) aggregate nominal amount of Notes outstanding at any time. The Issuer may increase the amount of the Programme.</p>                                                                                                                                                                                                                                                                                                          |
| <b>Arranger:</b>                              | <p>ING Bank N.V.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Dealers:</b>                               | <p>ING Bank N.V. has been appointed as Dealer under the Programme. One or more other Dealers may be appointed under the Programme in respect of issues of Notes in the future pursuant to the Programme Agreement (as defined in “Subscription and Sale”). The Issuer may also issue Notes directly to purchasers thereof.</p>                                                                                                                                                                                               |
| <b>Ratings:</b>                               | <p>Tranches of Notes issued under the Programme may be rated or unrated. Where a Tranche of Notes is rated, such rating will be specified in the applicable Final Terms. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the ratings assigned to the Issuer, the Programme or any Notes already issued. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.</p> |
| <b>Distribution:</b>                          | <p>The Issuer may from time to time issue PD Notes (which may be Non-Exempt PD Notes or Exempt PD Notes) and Exempt Notes.</p> <p>Notes may be issued directly by the Issuer or through one or more Dealers on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be stated in the applicable Final Terms.</p> <p>The Issuer shall act as Calculation Agent in respect of the Notes unless another entity is so specified in the applicable Final Terms.</p>                              |
| <b>Regulatory Matters:</b>                    | <p>Each issue of Notes denominated in a currency in respect of which particular laws, guidelines, regulations, restrictions or reporting requirements apply will only be issued in circumstances which comply with such laws, guidelines, regulations, restrictions or reporting requirements from time to time (see “Subscription and Sale”).</p>                                                                                                                                                                           |
| <b>Selling and Transfer Restrictions:</b>     | <p>There are selling and transfer restrictions in relation to issues of Notes as described in “Subscription and Sale” below.</p>                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Issuing and Principal Paying Agent for</b> | <p>The Bank of New York Mellon, London Branch.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**issues of Notes:**

**Registrar for issues of Finnish Notes:** Euroclear Finland.

**Registrar for issues of Norwegian Notes:** VPS AS.

**Registrar for issues of Polish Notes:** Polish National Depository for Securities (*Krajowy Depozyt Papierów Wartościowych S.A.*)

**Registrar for issues of Swedish Notes:** Euroclear Sweden AB.

**Currencies:** Subject to any applicable legal or regulatory restrictions, any currency agreed between the Issuer and the relevant Dealer (if any).

**Maturities:** Such maturities as may be determined by the Issuer and the relevant Dealer (if any), subject to such minimum or maximum maturity as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the Issuer or the relevant Specified Currency. Save as provided above, the Notes are not subject to any maximum maturity.

**Issue Price:** Notes may be issued at their nominal amount or at a discount or premium to their nominal amount.

**Form of Notes:** The Notes will be issued in bearer or registered form. The forms of the Notes are described in further detail in “Form of the Notes” in the Level 1 Programme Prospectus.

**Initial Delivery of Notes:** On or before the issue date for each Tranche of bearer Notes, if the relevant global Note is an NGN, the global Note will be delivered to a Common Safekeeper for Euroclear and Clearstream, Luxembourg. On or before the issue date for each Tranche of bearer Notes, if the relevant global Note is not an NGN, the global Note may (or, in the case of Notes listed on the market of the Luxembourg Stock Exchange appearing on the list of regulated markets issued by the European Commission, shall) be deposited with a common depository for Euroclear and Clearstream, Luxembourg or with Clearstream, Frankfurt. Global Notes relating to Notes that are not listed on the Luxembourg Stock Exchange may also be deposited with any other clearing system or may be delivered outside any clearing system. Registered Notes that are to be credited to one or more clearing systems on issue will be registered in the name of nominees or a common nominee for such clearing systems.

**Denomination of Notes:** Notes will be issued in such denominations as may be determined by the Issuer and the relevant Dealer (if any) and as specified in the applicable Final Terms, save that the minimum denomination of each Note will be such as may be allowed or required from time to time by the relevant central bank (or regulatory authority) or any laws or regulations applicable to the relevant Specified Currency.

**Notes with a maturity of less than one year:**

Notes having a maturity of less than one year will, if the proceeds of the issue are accepted in the United Kingdom, constitute deposits for the purposes of the prohibition on accepting deposits contained in section 19 of the Financial Services and Markets Act 2000, unless they are issued to a limited class of professional investors and have a denomination of at least £100,000 or its equivalent. See “Subscription and Sale”.

**Taxation; no gross-up:**

This Base Prospectus includes general summaries of certain tax considerations relating to an investment in the Notes. See the “Taxation” section of this Base Prospectus. Such summary may not apply to a particular holder of Notes or to a particular issue and does not cover all possible tax considerations. In addition, the tax treatment may change before the maturity, exercise or termination date of Notes. Any potential investor should consult his own tax adviser for more information about the tax consequences of acquiring, owning and disposing of Notes in its particular circumstances.

The Notes will not contain any provision that would oblige the Issuer to gross up any amounts payable in respect of interest or principal in the event of any withholding or deduction for or on account of taxes levied in any jurisdiction. The Issuer may also elect to redeem Notes if they would be required, on the occasion of the next payment due in respect of the Notes, to withhold or account for tax in respect of the Notes.

**ERISA Considerations:**

Unless otherwise stated in the applicable Final Terms, Registered Notes issued pursuant to Rule 144A may be acquired by employee benefit plans or other plans that are subject to Title I of the U.S. Employee Retirement Income Security Act of 1974, as amended (“**ERISA**”) or Section 4975 of the U.S. Internal Revenue Code of 1986, as amended, (the “**Section 4975**”) and by any entities or arrangements whose assets are treated for the purposes of such provisions of law as assets of any such plans (such plans, entities and arrangements, “**Benefit Plan Investors**”); provided that such acquisition, holding and disposition of the Notes will not result in a non-exempt prohibited transaction under ERISA or Section 4975. None of the Issuer, the Arranger, the Dealers, or Calculation Agent, or any employee, agent or representative thereof is intended to be or to be treated as a “fiduciary” or to provide or undertake to provide impartial or other “investment advice” (in each case within the meaning of Section 3(21) of ERISA) as to the acquisition, holding or disposition of any Notes (or interest therein) by any Benefit Plan Investor, including, without limitation, by reason of the Base Prospectus or any supplement thereto, and each purchaser and transferee of a Note will be deemed to have made certain representations relating to ERISA

and Section 4975. See “Certain ERISA and Other U.S. Considerations”.

**Cross-default of Notes:**

No cross-default provision.

**Negative Pledge:**

No negative pledge provision.

**Status of the Notes:**

Unless otherwise specified in the applicable Final Terms, the Notes issued by the Issuer will be unsecured and unsubordinated obligations of the Issuer and will rank *pari passu* among themselves and equally with all other unsecured and unsubordinated obligations of the Issuer from time to time outstanding, save as otherwise preferred by law.

**Bail-In:**

Reference is made to the section entitled “Risk Factors – General Risk Factors – Bail-In” in this Base Prospectus, the section entitled “Risk Factors” in the Issuer Registration Document (which is incorporated by reference into this Base Prospectus), including without limitation under the heading “Bank Recovery and Resolution Regimes”.

**Listing:**

Notes may be (i) admitted to trading on Euronext Amsterdam; (ii) admitted to the Official List; (iii) admitted to trading on the Luxembourg Stock Exchange; (iv) admitted to trading on the Warsaw Stock Exchange (v) admitted to trading on Euronext Paris; (vi) admitted to trading on the Italian Stock Exchange; (vii) admitted to trading on another regulated market as defined under MiFID II; (viii) admitted to trading on an unregulated market as defined under MiFID II; or (ix) unlisted and not admitted to trading on any market.

**Governing Law:**

The applicable Final Terms and the Notes issued by the Issuer will be governed by, and construed in accordance with, the laws of The Netherlands.

**DESCRIPTION OF THE NOTES, KEY FEATURES OF THE NOTES AND AN  
EXPLANATION OF HOW THE VALUE OF THE NOTES IS AFFECTED BY THE VALUE  
OF THE REFERENCE ITEM(S)**

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                                   | interest and an investor will not receive any return on the Notes until redemption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Tailor-Made Interest Notes</b> | <p>Tailor-Made Interest Notes will bear interest at a floating rate of interest based on the underlying rate plus the (positive or negative) margin specified in the applicable Final Terms.</p> <p>In calculating the rate of interest payable on the Notes, a “multiplier” is applied to the underlying rate, meaning that the underlying rate is multiplied by a specified percentage. Unless the multiplier is 100% the effect of the multiplier will be to magnify or diminish any positive or negative changes in the underlying rate. If the multiplier is greater than 100%, any positive or negative changes in the underlying rate will be magnified, meaning that, if the underlying rate increases, the percentage increase in the rate of interest payable by the Issuer on the Notes will be greater than the percentage increase in the underlying rate (subject to any cap which will limit the maximum rate of interest that the Issuer pays on the Notes) but, if the underlying rate decreases, the percentage decrease in the rate of interest payable by the Issuer on the Notes will be greater than the percentage decrease in the underlying rate (subject to any floor which will require the Issuer to pay a minimum rate of interest on the Notes). If the multiplier is less than 100%, any positive or negative changes in the underlying rate will be scaled down, meaning that, if the underlying rate increases, the percentage increase in the rate of interest payable by the Issuer on the Notes will be lesser than the percentage increase in the underlying rate (subject to any cap which will limit the maximum rate of interest that the Issuer pays on the Notes) but, if the underlying rate decreases, the percentage decrease in the rate of interest payable by the Issuer on the Notes will be lesser than the percentage decrease in the underlying rate (subject to any floor which will require the Issuer to pay a minimum rate of interest on the Notes).</p> <p>The rate of interest payable by the Issuer on the Notes may also be subject to a cap. Unless the applicable Final Terms specify the cap as being not applicable, the cap represents the maximum rate of interest that the Issuer is required to pay on the Notes.</p> <p>The rate of interest payable by the Issuer on the Notes may also be subject to a floor. Unless the applicable Final Terms specify the floor as being not applicable, the floor represents the minimum rate of interest that the Issuer is required to pay on the Notes.</p> <p>The margin, the multiplier, the cap (if applicable) and the floor (if applicable) may change from interest period to interest period, and will be as specified in the applicable Final Terms.</p> |
| <b>Step-Up Interest Notes</b>     | Step-Up Interest Notes will bear interest at a fixed rate of interest which increases (or “steps-up”) periodically during the                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
