8.	ADJUSTMENTS RELATING TO PORTFOLIO COMPONENTS	ANPASSUNGEN IN BEZUG AUF PORTFOLIOBESTANDTEILE
8.1	Consequences of a Potential Adjustment Event	Folgen eines Möglichen Anpassungsereignisses
	Following the occurrence of any Potential Adjustment Event, the Calculation Agent will, as soon as reasonably practicable after it becomes aware of such event determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the Portfolio Component and, if so, will (a) calculate the corresponding adjustment, if any, to be made to the elements relating to the relevant Portfolio Component used to determine any settlement or payment terms under the Notes and/or adjust any other terms of the Notes as it determines appropriate to preserve the economic equivalent of the obligations of the Issuer under the Notes (subject to any Local Taxes to be withheld or paid as explained below) and (b) determine the effective date of that adjustment. In its determination of the existence and extent of any dilutive or concentrative effect on the theoretical value of the Portfolio Components of any Potential Adjustment Event, and any related adjustments to the terms of the Notes, the Calculation Agent shall take into account any amounts of Local Taxes that would, in the determination of the Calculation Agent, be withheld from or paid or otherwise incurred by an Offshore Investor in connection with such Potential Adjustment Event. If relevant, the Calculation Agent may (but need not) determine the appropriate adjustment by reference to the adjustment in respect of such Potential Adjustment Event made by a Related Exchange (if any) to options on the Portfolio Component (if any) traded on such Related Exchange (if any).	Nach dem Eintritt eines Möglichen Anpassungsereignisses wird die Berechnungsstelle so bald wie möglich, nachdem sie von diesem Ereignis Kenntnis erlangt hat, bestimmen, ob dieses Mögliche Anpassungsereignis auf den theoretischen Wert des Portfoliobestandteils einen verwässernden oder konzentrierenden Effekt hat, und, falls dies der Fall ist, (a) gegebenenfalls die entsprechende erforderliche Anpassung der mit diesem Portfoliobestandteil verbundenen Angaben, die zur Bestimmung jeglicher Abrechnungs- oder Zahlungsbedingungen der Schuldverschreibungen herangezogen werden, berechnen und/oder Anpassungen an anderen Bedingungen der Schuldverschreibungen vornehmen, die sie für angemessen hält, um die Verpflichtungen der Emittentin aus den Schuldverschreibungen wirtschaftlich gleichwertig zu erhalten (vorbehaltlich Lokaler Steuern, die wie nachstehend erläutert einzubehalten oder zu zahlen sind), und (b) den Tag festlegen, zu dem diese Anpassung wirksam wird. Bei ihrer Feststellung bezüglich des Vorliegens und Umfangs eines verwässernden oder konzentrierenden Effekts eines Möglichen Anpassungsereignisses auf den theoretischen Wert der Portfoliobestandteile und etwaigen damit verbundenen Anpassungen der Bedingungen der Schuldverschreibungen berücksichtigt die Berechnungsstelle alle Beträge von Lokalen Steuern, die nach ihrer Feststellung einem Offshore-Anleger im Zusammenhang mit diesem Möglichen Anpassungsereignis vorenthalten oder von diesem bezahlt oder diesem entstehen würden. Falls relevant, kann die Berechnungsstelle die geeigneten Anpassungen unter Bezugnahme auf Anpassungen vornehmen, die im Hinblick auf ein derartiges Mögliches Anpassungsereignis (gegebenenfalls) von einer Zugehörigen Börse an Optionen auf den Portfoliobestandteil vorgenommen werden, die (gegebenenfalls) an dieser Zugehörigen Börse gehandelt werden, ist hierzu aber nicht verpflichtet.
	For the purposes of this Condition 8.1:	Für die Zwecke dieser Bedingung 8.1 gilt:

Die

	Eligibility Criteria are referred to as Eligible Collateral Assets .	maßgeblichen Zulässigkeitskriterien erfüllenden Sicherungswerte werden als Zulässige Sicherungswerte bezeichnet.
	The Eligibility Criteria specified in the applicable Final Terms may include limitations on the type of Collateral Assets that may be held, the maturity of the Collateral Assets, the liquidity of the Collateral Assets, requirements regarding the jurisdiction of the obligor of the Collateral Assets or its guarantor or the credit rating of the obligor of the Collateral Assets or its guarantor and/or any other limitations, restrictions and/or requirements concerning the Collateral Assets.	Die in den anwendbaren Endgültigen Bedingungen angegebenen Zulässigkeitskriterien können Beschränkungen in Bezug auf die Art der Sicherungswerte, die gehalten werden dürfen, die Fälligkeit der Sicherungswerte, die Liquidität der Sicherungswerte, die Anforderungen hinsichtlich der Jurisdiktion des Schuldners der Sicherungswerte oder seines Garantiegebers oder des Kreditratings des Schuldners der Sicherungswerte oder seines Garantiegebers und/oder sonstige Beschränkungen, Einschränkungen und/oder Anforderungen hinsichtlich der Sicherungswerte vorsehen.
	In addition to the Eligibility Criteria, the applicable Final Terms will set out the collateral rules which must be satisfied in order for the Collateral Test to be satisfied (the Collateral Rules). The Collateral Rules may include requirements relating to the diversification of types of Eligible Collateral Assets, the concentration of the Eligible Collateral Assets, the geographical location of the Eligible Collateral Assets or the currency of the Eligible Collateral Assets which may be held in a Collateral Pool and/or any other limitations, restrictions and/or requirements concerning the Eligible Collateral Assets contained in the relevant Collateral Pool as may be specified in the applicable Final Terms. Zusätzlich zu den Zulässigkeitskriterien enthalten die anwendbaren Endgültigen Bedingungen die zur Erfüllung des Sicherheitstests zu befolgenden Sicherheitenbestimmungen (die Sicherheitenbestimmungen). Die Sicherheitenbestimmungen können Anforderungen in Bezug auf die Diversifizierung der Arten von Zulässigen Sicherungswerten, die Konzentration der Zulässigen Sicherungswerte, den geografischen Standort der Zulässigen Sicherungswerte oder die Währung der Zulässigen Sicherungswerte vorsehen, die in einem Sicherheitenpool gehalten werden können, und/oder sonstige Beschränkungen, Einschränkungen und/oder Anforderungen bezüglich der Zulässigen Sicherungswerte in dem maßgeblichen Sicherheitenpool, wie in den anwendbaren Endgültigen Bedingungen angegeben, vorsehen. Zur Klarstellung wird festgehalten, dass die Sicherheitenbestimmungen für einen bestimmten Sicherheitenpool erfüllt sind, soweit Zulässige Sicherungswerte mit einem Sicherheitenwert von mindestens in Höhe des Erforderlichen Sicherheitenwerts zusammengefasst die Sicherheitenbestimmungen erfüllen.
2.2.2	Delegation to Collateral Agent	Beauftragung des Sicherheitenverwalters
	The Issuer may, pursuant to the terms of the Collateral Agency Agreement, delegate to the Collateral Agent the role of managing each Collateral Pool to comply with the requirements of these Additional Terms and Conditions (including, but not limited to, compliance with Conditions 3.4 and 3.5).	Die Emittentin kann den Sicherheitenverwalter nach Maßgabe der Bedingungen des Sicherheitenverwaltungsvertrags mit der Verwaltung der einzelnen Sicherheitenpools beauftragen, um die Anforderungen dieser Zusätzlichen Emissionsbedingungen (u. a. auch der Bedingungen 3.4 und 3.5) zu erfüllen.
2.3	Type of Collateral Pool	Art des Sicherheitenpools
	A Collateral Pool may be either a Single Series Collateral Pool or a Multiple Series Collateral Pool, each as further defined below.	Ein Sicherheitenpool kann entweder ein Sicherheitenpool für Einzelne Serien oder ein Sicherheitenpool für Mehrere Serien sein, wie jeweils nachstehend näher definiert.
2.3.1	Single Series Collateral Pool	Sicherheitenpool für Einzelne Serien
	Where the applicable Final Terms in respect of a Series of Secured Notes specify that the Type of Collateral Pool is " <i>Single Series Collateral Pool</i> ", such Series of Secured Notes will be the only Series of Secured Notes to be secured by the relevant Collateral Pool (a Single Series Collateral Pool).	Ist in den anwendbaren Endgültigen Bedingungen in Bezug auf eine Serie Besicherter Schuldverschreibungen „ <i>Sicherheitenpool für Einzelne Serien</i> “ als Art des Sicherheitenpools angegeben, ist die betreffende Serie Besicherter Schuldverschreibungen die einzige durch den maßgeblichen Sicherheitenpool zu besichernde Serie Besicherter Schuldverschreibungen (ein Sicherheitenpool für Einzelne Serien).
2.3.2	Multiple Series Collateral Pool	Sicherheitenpool für Mehrere Serien
	Where the applicable Final Terms in respect of a Series of Secured Notes specify that the Type of Collateral Pool is " <i>Multiple Series Collateral Pool</i> ",	Ist in den anwendbaren Endgültigen Bedingungen in Bezug auf eine Serie Besicherter Schuldverschreibungen „ <i>Sicherheitenpool für Mehrere</i>

Additional Terms and Conditions relating to Secured Notes

	Each Series of Secured Notes secured pursuant to a Multiple Series Collateral Pool must (i) be subject to the same governing law, (ii) be subject to the same method of distribution of Collateral Assets following enforcement of the relevant Security Document (i.e. exclusively either subject to "Physical Delivery of Collateral Assets" or not subject to "Physical Delivery of Collateral Assets"), (iii) be subject to the same Eligibility Criteria and Collateral Rules, (iv) be subject to the same Haircut value(s) for each type or class of Eligible Collateral Assets, and (v) have the same Collateral Test Dates.	Jede im Rahmen eines Sicherheitenpools für Mehrere Serien besicherte Serie Besicherter Schuldverschreibungen muss (i) demselben anwendbaren Recht unterliegen, (ii) demselben Verfahren für die Auskehrung von Sicherungswerten nach der Durchsetzung des maßgeblichen Sicherheitendokuments unterliegen (d. h. dass „ <i>Physische Lieferung von Sicherungswerten</i> “ entweder ausschließlich gilt oder ausschließlich nicht gilt), (iii) denselben Zulässigkeitskriterien und Sicherheitenbestimmungen unterliegen, (iv) demselben Preisabschlag bzw. demselben Preisabschlägen je Art oder Kategorie Zulässiger Sicherungswerte unterliegen und (v) dieselben Sicherheitentest-Termine haben.
	In such a scenario, following enforcement of the relevant Security Document, all Series of Secured Notes secured on such Collateral Pool would share in the distribution of the proceeds of realisation of the Collateral Assets constituting such Collateral Pool or Notes or, where the clause "Physical Delivery of Collateral Assets" is specified as applicable in the applicable Final Terms, in the delivery of the Collateral Assets contained in such Collateral Pool.	In einem solchen Szenario würden nach Durchsetzung des maßgeblichen Sicherheitendokuments sämtliche durch diesen Sicherheitenpool besicherte Serien Besicherter Schuldverschreibungen an der Ausschüttung der Erlöse aus der Verwertung der den betreffenden Sicherheitenpool bildenden Sicherungswerte oder Schuldverschreibungen, oder – falls „ <i>Physische Lieferung von Sicherheiten</i> “ in den anwendbaren Endgültigen Bedingungen als anwendbar angegeben ist –, an der Lieferung der in dem betreffenden Sicherheitenpool enthaltenen Sicherungswerte beteiligt.
	Noteholders acquiring and holding Secured Notes in relation to a Multiple Series Collateral Pool will be deemed to acknowledge, accept and agree to the rights of existing and future Noteholders of different Series of Secured Notes to share equally in the security created over the Collateral Assets in the Multiple Series Collateral Pool.	Schuldverschreibungsinhabern, die Besicherte Schuldverschreibungen in Verbindung mit einem Sicherheitenpool für Mehrere Serien erwerben und halten, wird unterstellt, dass sie die Rechte bestehender und künftiger Schuldverschreibungsinhaber anderer Serien Besicherter Schuldverschreibungen auf gleichberechtigte Beteiligung an den Sicherheiten, die an den Sicherungswerten in dem Sicherheitenpool für Mehrere Serien bestellt sind, anerkennen und ihr Einverständnis dazu erklären.
2.4	Segregation between Collateral Pools, Limited Recourse and Non-Petition	Trennung von Sicherheitenpools, Beschränkter Rückgriff und Verzicht auf Insolvenzantragstellung
2.4.1	Limited Recourse against the Issuer	Beschränkter Rückgriff gegen die Emittentin
	By acquiring and holding Secured Notes, Noteholders will be deemed to acknowledge and agree that the obligations of the Issuer to the Noteholders are limited in recourse to the Collateral Assets contained in the relevant Collateral Pool securing such Series of Secured Notes both in the case of a Single Series Collateral Pool and a Multiple Series Collateral Pool.	Mit dem Kauf und Halten der Besicherten Schuldverschreibungen wird den Schuldverschreibungsinhabern die Kenntnisnahme und Zustimmung unterstellt, dass die Verpflichtungen der Emittentin gegenüber den Schuldverschreibungsinhabern in Bezug auf den Rückgriff auf die in dem maßgeblichen Sicherheitenpool, mit dem die betreffende Serie Besicherter Schuldverschreibungen sowohl im Fall eines Sicherheitenpools für Einzelne Serien als auch im Fall eines Sicherheitenpools für Mehrere Serien besichert ist, enthaltenen Sicherungswerte beschränkt sind.

Additional Terms and Conditions relating to Secured Notes

	b) all amounts available from the relevant Collateral Assets in the relevant Collateral Pool have been applied to meet or provide for the relevant obligations specified in, and in accordance with, the provisions of the relevant Security Document and these Additional Terms and Conditions; and	b) alle aus den maßgeblichen Sicherungswerten im maßgeblichen Sicherheitenpool verfügbaren Beträge dazu verwendet wurden oder dazu dienen sollen, die maßgeblichen Verpflichtungen gemäß den Bestimmungen des maßgeblichen Sicherheitendokuments und diesen Zusätzlichen Emissionsbedingungen zu erfüllen; und
	c) there are insufficient amounts available from the relevant Collateral Assets in the relevant Collateral Pool to pay in full, in accordance with the provisions of the relevant Security Document and these Additional Terms and Conditions, amounts outstanding under the Secured Notes (including payments of principal, premium (if any) and interest),	c) die aus den maßgeblichen Sicherungswerten im maßgeblichen Sicherheitenpool verfügbaren Beträge nicht ausreichen, um die aus den Besicherten Schuldverschreibungen ausstehenden Beträge (einschließlich Zahlungen von Kapitalbeträgen, etwaigen Aufschlägen und Zinsen) nach Maßgabe der Bestimmungen des maßgeblichen Sicherheitendokuments und dieser Zusätzlichen Emissionsbedingungen in voller Höhe zu zahlen,

For the avoidance of doubt, in such a scenario, Noteholders will continue to be able to claim under the terms of the Guarantee against the Guarantor for any unpaid amounts.	so haben die Schuldverschreibungsinhaber der betreffenden Besicherten Schuldverschreibungen keinen weiteren Anspruch gegen die Emittentin in Bezug auf etwaige ihnen geschuldete Beträge, die nicht gezahlt wurden (zur Klarstellung: einschließlich Zahlungen von Kapitalbeträgen, etwaigen Aufschlägen und/oder Zinsen in Bezug auf die Schuldverschreibungen). Zur Klarstellung wird festgehalten, dass die Schuldverschreibungsinhaber in einem solchen Szenario weiterhin Ansprüche gegen die Garantin auf jedwede ungezahlte Beträge nach Maßgabe der Garantie geltend machen können.
2.4.2	<u>Segregation between Collateral Pools</u>	<u>Trennung der Sicherheitenpools</u>
	No Noteholder shall be entitled to have recourse to the Collateral Assets contained in a Collateral Pool other than the Collateral Pool which secures the Notes held by such Noteholder.	Kein Schuldverschreibungsinhaber hat ein Rückgriffsrecht auf die Sicherungswerte, die in einem anderen Sicherheitenpool als demjenigen enthalten sind, mit dem die vom betreffenden Schuldverschreibungsinhaber gehaltenen Schuldverschreibungen besichert sind.
2.4.3	<u>Non-petition</u>	<u>Verzicht auf Insolvenzantragstellung</u>
	By acquiring and holding Secured Notes, Noteholders will be deemed to acknowledge and agree that no Noteholder shall be entitled to take any steps or initiate proceedings to procure the winding-up, administration or liquidation (or any other analogous proceeding) of the Issuer.	Den Schuldverschreibungsinhabern wird infolge des Erwerbs und des Haltens von Besicherten Schuldverschreibungen die Kenntnisnahme und Zustimmung unterstellt, dass sie nicht zur Einleitung von Schritten oder Verfahren zur Herbeiführung der Abwicklung, Zwangsverwaltung oder Liquidation (oder eines sonstigen vergleichbaren Verfahrens) der Emittentin berechtigt sind.
2.5	<u>Hedging of Issuer's obligations</u>	<u>Absicherung der Verbindlichkeiten der Emittentin</u>
	The Issuer may hedge its obligations in relation to a Series of Secured Notes in a number of different ways, including by entering into repurchase agreements (Repurchase Agreements) or swap agreements (Swap Agreements) or any other agreements (any Repurchase Agreement, Swap Agreement or any other such agreement being a Hedging Agreement) with a counterparty which may be Société Générale or an affiliate of Société Générale or such other entities as the Issuer deems appropriate from time to time (each such entity being a Counterparty). Such transactions may also include provisions for the transfer to the Issuer of assets which may be treated as Collateral Assets by the Issuer and used to fulfil its obligations in relation to the Secured Notes. Bei solchen Transaktionen können ferner Bestimmungen für die Übertragung von Vermögenswerten – die von der Emittentin als

Ist in diesen Absicherungsvereinbarungen die Übertragung von Vermögenswerten auf die Emittentin vorgesehen, erfolgt die Übertragung des gesamten Eigentums.
	A Swap Agreement may be evidenced by a 2002 ISDA Master Agreement and Schedule together with the confirmation entered into by the Issuer and the Counterparty in respect of the relevant Series of Secured Notes. If the Counterparty's obligations under the Swap Agreement are to be collateralised, the Swap Agreement may be supplemented by a 1995 ISDA Credit Support Annex (Bilateral Form - Transfer).	Eine Swap-Vereinbarung kann durch einen ISDA-Rahmenvertrag von 2002 samt Anhang zusammen mit der von der Emittentin und dem Vertragspartner in Bezug auf die betreffende Serie Besicherter Schuldverschreibungen unterzeichnete Ausfertigung des Einzelabschlusses verbrieft sein. Sind die Verbindlichkeiten des Vertragspartners aus der Swap-Vereinbarung zu besichern, kann die Swap-Vereinbarung durch einen ISDA-Besicherungsanhang von 1995 (Bilaterales Muster – Übertragung) (1995 ISDA Credit Support Annex (Bilateral Form - Transfer)) ergänzt werden.
	A Repurchase Agreement may be substantially in the form of a 2000 TBMA/ISMA Global Master Repurchase Agreement, a "Convention Cadre FBF relative aux opérations de pensions livrées", each as amended, supplemented or otherwise modified from time to time, or any other agreement having a similar effect. 	If the Issuer or the Collateral Agent determines that a Collateral Disruption Event has occurred, the Issuer may redeem or cancel, as applicable, all of the relevant Secured Notes at the Early Redemption Amount following the occurrence of a Collateral Disruption Event as specified in the applicable Final Terms.	Stellt die Emittentin oder der Sicherheitenverwalter fest, dass eine Sicherheitenstörung eingetreten ist, kann die Emittentin sämtliche maßgeblichen Besicherten Schuldverschreibungen zum Vorzeitigen Rückzahlungsbetrag nach Eintritt einer Sicherheitenstörung zurückzahlen bzw. kündigen, wie in den anwendbaren Endgültigen Bedingungen angegeben.
	The occurrence of a Collateral Disruption Event will not constitute an Event of Default.	Der Eintritt einer Sicherheitenstörung stellt keinen Kündigungsgrund dar.

3.1	Valuation of Collateral and Secured Notes	BEWERTUNG DER SICHERHEITEN UND DER BESICHERTEN SCHULDVERSCHREIBUNGEN
	In order to ensure that a Series of Secured Notes is collateralised in accordance with its terms, the Collateral Value and the Secured Note Market Value of each Series of Secured Notes secured by such Collateral Pool will each be tested on the Issue Date of such Series of Secured Notes and on each Collateral Test Date as specified in the applicable Final Terms.	Um zu gewährleisten, dass eine Serie Besicherter Schuldverschreibungen gemäß ihren Bedingungen besichert wird, werden der Sicherheitenwert und der Marktwert je Besicherter Schuldverschreibung jeder mit dem betreffenden Sicherheitenpool besicherten Serie Besicherter Schuldverschreibungen jeweils am Emissionstag der betreffenden Serie Besicherter Schuldverschreibungen und an jedem Sicherheitentest-Termin wie in den anwendbaren Endgültigen Bedingungen angegeben getestet.
3.1.1	Valuation of Collateral	Bewertung der Sicherheiten
	The Collateral Value and the Secured Note Market Value will be used in order to calculate the Required Collateral Value of Eligible Collateral Assets (as further described in Condition 3.3) which must be held in a Collateral Account to secure one or more Series of Secured Notes.	Der Sicherheitenwert und der Marktwert je Besicherter Schuldverschreibung werden zur Berechnung des Erforderlichen Sicherheitenwerts der Zulässigen Sicherungswerte (wie in Bedingung 3.3 näher ausgeführt) herangezogen, die zur Besicherung einer oder mehrerer Serien Besicherter Schuldverschreibungen in einem Sicherheitenkonto verwahrt werden müssen.

	Except if, under the Secured Notes Provisions of the applicable Final Terms, "Collateral Valuation at Nominal Value" is specified as "applicable", the collateral value means the aggregate market value as of the relevant Valuation Point expressed in the Collateral Valuation Currency, of the Eligible Collateral Assets in a Collateral Pool, in each case taking into account any Haircut applied in relation thereto (the Collateral Value).	Der Sicherheitenwert entspricht – außer wenn nach den Bestimmungen für Besicherte Schuldverschreibungen in den anwendbaren Endgültigen Bedingungen „Sicherheitenbewertung zum Nennwert“ als anwendbar bezeichnet ist – dem Gesamtbetrag des Marktwerts der Zulässigen Sicherungswerte in einem Sicherheitenpool zum maßgeblichen Bewertungszeitpunkt, ausgedrückt in der Währung der Sicherheitenbewertung, wobei ein etwaiger diesbezüglich angewandter Preisabschlag jeweils zu berücksichtigen ist (der Sicherheitenwert).
	If the applicable Final Terms specify that "Collateral Valuation at Nominal Value" is applicable, the Collateral Value shall be deemed to be equal to the aggregate nominal value of the Collateral Assets constituting Eligible Collateral Assets (after taking into account any Haircut applied in relation thereto, as further described below) (the Collateral Valuation at Nominal Value) and "Collateral Value" shall be construed accordingly throughout these Additional Terms and Conditions.	Falls in den anwendbaren Endgültigen Bedingungen „Sicherheitenbewertung zum Nennwert“ als anwendbar bezeichnet ist, so gilt als Sicherheitenwert ein Betrag in Höhe des Gesamtbetrags des Nennwerts der Sicherungswerte, die Zulässige Sicherungswerte sind (unter Berücksichtigung eines etwaigen diesbezüglich angewandten Preisabschlags, wie nachstehend näher beschrieben) (die Sicherheitenbewertung zum Nennwert), und „Sicherheitenwert“ ist in diesen Zusätzlichen Emissionsbedingungen entsprechend auszulegen.
	Where the relevant currency of denomination of a Collateral Asset is other than the Collateral Valuation Currency, the Collateral Agent shall convert the value of such Collateral Asset at the relevant spot exchange rate.	Lautet ein Sicherungswert auf eine andere Währung als die Währung der Sicherheitenbewertung, so rechnet der Sicherheitenverwalter den Wert des betreffenden Sicherungswerts zum maßgeblichen Devisenkassakurs um.
	If Predetermined Collateral Valuation Currency Rate of Exchange is specified as applicable in the applicable Final Terms, the relevant spot exchange rate shall be the predetermined rate specified in the applicable Final Terms (the Predetermined Collateral Valuation Currency Rate of Exchange).	Falls „Vorher Festgelegter Wechselkurs für die Währung der Sicherheitenbewertung“ in den anwendbaren Endgültigen Bedingungen als anwendbar bezeichnet ist, ist der maßgebliche Devisenkassakurs der vorher festgelegte Wechselkurs, der in den anwendbaren Endgültigen Bedingungen angegeben ist (der Vorher Festgelegte Wechselkurs für die Währung der Sicherheitenbewertung).
	Except if Predetermined Collateral Valuation Currency Rate of Exchange is specified as applicable in the applicable Final Terms, the relevant spot exchange rate shall be the rate displayed on the Collateral Valuation Currency Screen Page at the Collateral Valuation Currency Specified Time or, if no such Collateral Valuation Currency Screen Page is specified in the applicable Final Terms or such Collateral Valuation Currency Screen Page is not available, the relevant spot rate shall be the rate determined by the Collateral Agent in good faith and in a commercially reasonable manner.	Sofern in den anwendbaren Endgültigen Bedingungen nicht „Vorher Festgelegter Wechselkurs für die Währung der Sicherheitenbewertung“ als anwendbar bezeichnet ist, ist der maßgebliche Devisenkassakurs der zum Festgelegten Zeitpunkt für die Währung der Sicherheitenbewertung auf der Bildschirmseite für die Währung der Sicherheitenbewertung angezeigte Kurs; ist in den anwendbaren Endgültigen Bedingungen keine solche Bildschirmseite für die Währung der Sicherheitenbewertung angegeben oder ist die betreffende Bildschirmseite für die Währung der Sicherheitenbewertung nicht verfügbar, so ist der maßgebliche Kassakurs der von dem Sicherheitenverwalter nach Treu und Glauben und in wirtschaftlich angemessener Weise ermittelte Kurs.
	In performing its calculations as described in the section " <i>Verification by Collateral Monitoring Agent</i> " below, the Collateral Monitoring Agent will use the same method of valuation of the Collateral Assets and, as the case may be, the relevant Haircut value(s) specified in the applicable Final Terms.	Bei der Durchführung der in nachstehender Bestimmung „Überprüfung durch die Sicherheitenkontrollstelle“ beschriebenen Bewertungen verwendet die Sicherheitenkontrollstelle dieselbe Methode zur Bewertung der Sicherungswerte bzw. den/die in den anwendbaren Endgültigen Bedingungen angegebene(n) maßgeblichen Preisabschlag/Preisabschläge.

3.4	Adjustments to Collateral Pool and Collateral Test Notice	Anpassungen des Sicherheitenpools und der Sicherheitentest-Mitteilung
	On each Collateral Test Date relating to a relevant Series of Secured Notes the Collateral Agent will determine whether (i) the Collateral Rules applicable to such Collateral Pool are satisfied and (ii) the Collateral Value is greater than or equal to 97 per cent of the Required Collateral Value for such Collateral Pool (taking into account any Haircut value(s) to be applied to the Collateral Assets and the aggregate value of any Waived Notes) (limbs (i) and (ii) above being referred to as the Collateral Test).	An jedem Sicherheitentest-Termin in Bezug auf eine maßgebliche Serie Besicherter Schuldverschreibungen stellt der Sicherheitenverwalter fest, ob (i) die auf den betreffenden Sicherheitenpool anwendbaren Sicherheitenbestimmungen erfüllt sind und (ii) der Sicherheitenwert größer oder gleich 97 % des Erforderlichen Sicherheitenwerts für diesen Sicherheitenpool ist (wobei ein bzw. mehrere auf die Sicherungswerte anzuwendende(r) Preisabschlag/Preisabschläge und der Gesamtwert etwaiger Verzichtgegenständlicher Schuldverschreibungen unter Umständen zu berücksichtigen sind) (vorstehende Bedingungen (i) und (ii) werden als der Sicherheitentest bezeichnet).
	When determining whether the Collateral Test is satisfied:	Bei der Feststellung, ob der Sicherheitentest erfüllt ist:
	- Collateral Assets for which instructions for the transfer to the relevant Collateral Account have been provided on or before such Collateral Test Date will be included; and	- werden Sicherungswerte, für die an oder vor dem betreffenden Sicherheitentest-Termin Anweisungen zur Übertragung auf das betreffende Sicherheitenkonto erteilt wurden, für die Zwecke dieser Feststellung berücksichtigt; und

	If on a Collateral Test Date the Collateral Agent determines that the Collateral Test is not satisfied for a specific Collateral Pool, the Collateral Agent on behalf of the Issuer will select the type and quantity of Collateral Assets to be deposited in the Collateral Account (or will select existing Collateral Assets to be replaced with other Collateral Assets), in order that after such adjustment the Collateral Test will be satisfied.	Wenn der Sicherheitenverwalter an einem Sicherheitentest-Termin feststellt, dass der Sicherheitentest für einen bestimmten Sicherheitenpool nicht erfüllt ist, wählt er im Namen der Emittentin die Art und Menge der in dem Sicherheitenkonto zu hinterlegenden Sicherungswerte aus (oder wählt bestehende Sicherungswerte aus, die durch andere Sicherungswerte zu ersetzen sind), damit der Sicherheitentest nach dieser Anpassung erfüllt ist.

	If "Type of Collateral Structure" is specified as "Standard Collateral Structure" in the applicable Final Terms, on each Collateral Business Day, if the Collateral Agent on behalf of the Issuer intends to make adjustments to the Collateral Assets held in a Collateral Pool (including, but not limited to, adjustments in order to ensure that the Collateral Test will be satisfied), the Collateral Agent will send or cause to be sent a notice to the Collateral Monitoring Agent and the Collateral Custodian (copied to the Issuer and the Guarantor, as the case may be) specifying the adjustments to be made to such particular Collateral Pool (including <i>inter alia</i> the type and quantity of any Collateral Assets to be deposited and/or removed) (the Collateral Test Notice).	Falls in den anwendbaren Endgültigen Bedingungen als „Art der Sicherheitenstruktur“ „Standard-Sicherheitenstruktur“ angegeben ist, gilt Folgendes: Wenn der Sicherheitenverwalter die Vornahme von Anpassungen (insbesondere von für die Erfüllung des Sicherheitentests erforderlichen Anpassungen) der in einem Sicherheitenpool verwahrten Sicherungswerte im Namen der Emittentin beabsichtigt, wird er an jedem Sicherheitengeschäftstag der Sicherheitenkontrollstelle und dem Sicherheitenverwahrer (in Kopie an die Emittentin bzw. die Garantin) eine Mitteilung übersenden oder dies veranlassen, in der die an diesem besonderen Sicherheitenpool vorzunehmenden Anpassungen (u. a. einschließlich der Art und Menge der zu hinterlegenden und/oder zu entnehmenden Sicherungswerte) anzugeben sind (die Sicherheitentest-Mitteilung).

Article 5 - Term

This Agreement shall come into force with effect from 1st July 2005. It is concluded for an initial term of one year, and thereafter shall be deemed renewed from year to year unless one of the Parties provides notice of termination in writing no later than 15 days prior to the date at which the Agreement is due to be renewed. Shall the Agreement be terminated, the Parties agree to be bound by its terms until all obligations under the Notes have been fully satisfied.

Article 6 - Modifications - Prior Agreements

Any modification of this Agreement shall be set forth in a written amendment signed by all the Parties.

Article 7 - Applicable law - Jurisdiction

This Agreement shall be governed by the laws of Germany.

All disputes relating to its validity, interpretation or performance shall be submitted to the law courts in Frankfurt with jurisdiction, provided however, that SG and SG alone, in whose favour such attribution of jurisdiction has been granted, shall have the option of bringing such proceedings before any other court with jurisdiction."

1.2. Limitation of Recourse

Pursuant to Condition 16 of the Terms and Conditions of the German law Notes, any payment obligations of the Issuer under the Notes are limited to the funds received from the Guarantor under the Trust Agreement. To the extent such funds prove ultimately insufficient to satisfy the claims of all Noteholders in full, then any shortfall arising therefrom will be extinguished and no Noteholder has any further claims against the Issuer, regardless of whether the Issuer would be able to fulfil its payment obligations under the Notes out of its own funds, subject, however, to the right of the Noteholders to exercise any termination or early redemption rights.

1.3. Impact of the Trust Agreement and the Limitation of Recourse on the Position of the Issuer vis-à-vis the Noteholders

As a result of the Trust Agreement, the Issuer's ability to satisfy its payment obligations under the Notes in full is dependent upon it receiving in full the amounts payable to it by the Guarantor under the Trust Agreement. Moreover, since the Terms and Conditions of the Notes provide for a limitation of recourse, this applies irrespective of whether the Issuer would be able to make such payments out of other funds available to it.

Thus, from an economic perspective, the Notes are issued by the Guarantor and not the Issuer, whose role is comparable to that of a special purpose vehicle used for the issue of Notes and the Noteholders directly depend on the credit risk of the Guarantor (see in section Risk Factors under "Factors that may affect the Issuers' and the Guarantor's ability to fulfil their respective obligations under the Notes and under the Guarantee and the Trust Agreement.") rather than that of the Issuer."

Harmonia Index (EUR – Excess Return)

1.1 Index Description

The SGI Harmonia Index – EUR Excess Return (the "**Index**") is designed to provide the excess return of the SGI Harmonia Index – EUR Net Total Return (the "**Sub-Index**") over the Euribor 3-Month Rate (the "**EURIBOR Rate**").

The Index is calculated and published by S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) (the "**Index Calculation Agent**") and is sponsored by Société Générale (the "**Index Sponsor**").

Main Characteristics

Bloomberg ticker:	SGIXHEER <Index>
Type of Return:	Excess Return
Calculation Frequency:	Daily
Publication Time:	End of Day
Index Launch Date:	June 6, 2011
Currency:	EUR
Fees and Costs:	As specified under the "Description of Sub-Index" section below
Index Asset Class:	Multi-Asset
Index Components:	Equity Instrument, Debt Instrument, Commodity Instrument and Market Data

1.2 Sub-Index description

The Sub-Index is designed to track the performance of a dynamic exposure to a Euro-hedged multi asset allocation (the "**Underlying Basket**") of indices and funds (each a "**Sub-Index Component**"), where weights are determined in order to make the risk contribution of each component of the Underlying Basket equal.

The allocation of the Underlying Basket is reviewed on a monthly basis according to a systematic allocation model as provided by Lyxor Asset Management (the "**Sub-Index Advisor**"). The Sub-Index is constructed pursuant to a variable exposure to the Underlying Basket used to optimize, under certain circumstances, the exposure to the Underlying Basket while keeping the risk level of the Sub-Index close to a pre-defined target level. The exposure to the Underlying Basket, through the use of the hypothetical borrowing, can reach a maximum of 150% of the level of the Sub-Index.

Certain parameters of the Sub-Index, like *inter alia* the composition of the Underlying Basket, may be reviewed periodically by a scientific committee (the "**Sub-Index Scientific Committee**").

The Sub-Index Scientific Committee will comprise three (3) members: two (2) of whom shall be a representative of Société Générale (the "**Sub-Index Sponsor**") and one (1) of whom shall be a representative of the Sub-Index Advisor.

In addition, the rules of Sub-Index (the "**Sub-Index Rules**") may, by decision of the Sub-Index Scientific Committee pursuant to the Sub-Index Scientific Committee Governance (as specified in the Index Rules), be supplemented, amended or revised in whole or in part, which may lead to changes in the way the Sub-Index is compiled and calculated or affect the Sub-Index in another way.

The Sub-Index level is determined net of

- advisory and administration fees of 0.20% per annum;
- transaction costs; and
- replication costs

The initial transaction costs and replication costs are displayed in Appendix 1.

These costs may be reviewed by the Sub-Index Sponsor to reflect a change in market conditions.

1.3 Sub-Index and Underlying Basket strategy

1.3.1 Sub-Index strategy

The constituents of the Sub-Index are (a) the Underlying Basket, (b) a hypothetical deposit based on the 3-Month Euro Interbank Offered Rate (the "**EURIBOR Rate**") and (c) a hypothetical borrowing based on the EURIBOR Rate. The deemed percentage exposure of the Sub-Index to the Underlying Basket (the "**Exposure**") is determined based on formulas (defined in the Sub-Index Rules) using the following input parameters:

- (i) the short term historical volatility of the Underlying Basket;
- (ii) a target volatility of 6%;
- (iii) the historical volatility of the Sub-Index itself;

such that, in most cases, when the short-term historical volatility of the Underlying Basket increases, the deemed exposure to the Underlying Basket decreases, and when the short-term historical volatility of the Underlying Basket decreases, the deemed exposure to the Underlying Basket increases.

The Exposure is capped at 150% of the Sub-Index Level and can be as low as 0%.

If the short-term historical volatility is greater than the Target Volatility, then the Exposure of the Sub-Index to the Underlying Basket will be less than 100%. If the Exposure is less than 100%, (a) a percentage of the Sub-Index's level is deemed invested in the Underlying Basket in an amount equal to the product of (i) the Exposure and (ii) the Sub-Index Level; and (b) the remaining percentage of the Sub-Index's level is deemed invested in the hypothetical deposit based on the EURIBOR Rate.

If the short-term historical volatility is equal to the Target Volatility, then the Exposure of the Sub-Index to the Underlying Basket will be 100%. If the Exposure is equal to 100%, then 100% of the Sub-Index's level is deemed invested in the Underlying Basket and no portion of the Sub-Index's level is deemed invested in the hypothetical deposit based on the EURIBOR Rate.

If the short-term historical volatility is less than the Target Volatility, then the Exposure of the Sub-Index to the Underlying Basket will be greater than 100% (subject to a maximum Exposure of 150%). If the Exposure of the Sub-Index to the Underlying Basket is greater than 100%, then 100% of the Sub-Index's level is deemed invested in the Underlying Basket and no portion of the Sub-Index's level is deemed invested in the hypothetical deposit based on the EURIBOR Rate. Furthermore, (a) the Sub-Index is deemed to have invested an additional amount into the Underlying Basket equal to the product of (i) the Sub-Index Level and (ii) the difference of the Exposure and 100% (the "**Additional Exposure**") and (b) the Sub-Index is deemed to have borrowed funds equal to the product of (i) the Sub-Index Level and (ii) the Additional Exposure at a rate based on the EURIBOR Rate. The deemed additional investment in the Underlying Basket will increase the Sub-Index's exposure to the Underlying Basket, while the deemed borrowing will reduce the level of the Sub-Index.

1.3.2 **Underlying Basket strategy**

The Underlying Basket Index reflects the performance of an optimized allocation across the Sub-Index Components. Each month, this allocation is reviewed according to the Equal-Risk Contribution ("ERC") methodology developed by the quantitative research team of the Sub-Index Advisor. The resulting weighting scheme is applied to the Sub-Index Components to determine the composition of the Sub-Index for the following month.

The non Euro-denominated Sub-Index Components are hedged against currency risk using 1-month FX forward swaps.

The allocation of the Underlying Basket is displayed in Appendix 1.

$$IL(t) = IL(t-1) \times [SIL(t) / SIL(t-1) - ER(t-1) \times ACT(t-1, t) / 360]$$

3. REVIEW OF THE SUB-INDEX COMPONENTS 3.1 Weights Optimization

3.1.1 General Principle

The optimization process (ERC approach) employed draws on the principles of the Modern Portfolio Theory set out by Markowitz, Lintner and Sharpe in 1950s and 1960s. However, even though it can be analysed in the mean-variance framework, the ERC approach is more derived from the techniques of risk-budgeting. The objective the ERC portfolio ("**ERC Portfolio**") is to find a risk-balanced allocation such that the risk contribution of each asset in the portfolio is equal. As a consequence, unlike the traditional mean-variance portfolio, the ERC Portfolio does not require an assumption about the expected returns of each asset and thus the only inputs needed the build an ERC Portfolio is the covariance matrix (the "**Covariance Matrix**") of the portfolio's components.

3.1.2 Determination of the Marginal Risk Contributions

The Marginal Risk Contribution ("MRC") corresponds to the change in the volatility of the Index induced by a small increase in the weight of each Sub-Index Component. It is given by the following formula:

$$\partial_{x_i} \sigma(I) = \frac{\partial \sigma(I)}{\partial x_i}$$

With

$\partial_{x_i} \sigma(I)$ means the MRC of Sub-Index Component i to the volatility of the Index

$\sigma(I)$ means the volatility of the Index

x_i means the weight considered for Sub-Index Component i

3.1.3 Determination of the Covariance Matrix

The Covariance Matrix is computed by the Sub-Index Sponsor on the Review Date (as defined in the Sub-Index rules) using 3-day returns for each Sub-Index Component over the last 262 trading days according to the following formula :

$$\Sigma(i, j) = \frac{1}{n} \sum_{k=1}^n (r_{i,k} - \bar{r}_i)(r_{j,k} - \bar{r}_j)$$

With

n means the number of 3-day returns considered for the calculation of the Covariance Matrix

$r_{i,k}$ means the kth 3-day return of Sub-Index Component i

\bar{r}_i means the average of the n 3-day returns of Sub-Index Component i considered for the calculation of the Covariance Matrix

For the purpose of the aforementioned, the calculation of the returns "over the last 262 trading days" shall be interpreted as the returns calculated using daily adjusted prices from the first Scheduled Valuation Day following the day that is 262 Scheduled Valuation Days before the Review Date (included) up to the Review Date.

3.1.4 Determination of the ERC Portfolio weights

The ERC Portfolio weights are determined by the Index Advisor on the Review Date under the following constraints:

- the MRC of each portfolio constituent must be equal

- the weighting of each portfolio constituent shall be strictly positive
- the sum of the weightings of the portfolio constituents must be equal to 1

The solution of this problem is endogenous as the weights that satisfy the equal MRC objective require the calculation of the portfolio risk which is itself a function of the weights of each portfolio component. The solution can then be found using a sequential quadratic programming algorithm that seeks to minimize the following utility function:

$$f(x) = \sum_{i=1}^n \sum_{j=1}^n (x_i(\Sigma x)_i - x_j(\Sigma x)_j)^2$$

3.2 Index Composition

The weights resulting from optimization process described in 3.1 above define the ERC Portfolio.

The final allocation used on the relevant Review Date to constitute the Underlying Basket will be determined according to a further optimization on weights based on a trend following analysis, whereby the past best (resp. worst) performing constituents tend to be overweighted (resp. underweighted) under the following constraints :

- the weighting of each Sub-Index Component must be strictly positive
- the sum of the weightings of the Sub-Index Components must be equal to 1
- the weighting of each Sub-Index Component must not exceed the Maximum Target Weight (as defined in Appendix 1) applicable to it as per its Sub-Index Component Asset Class
- the tracking error of the resulting allocation vs the ERC portfolio shall remain close to or below 3%

The composition shall be implemented on the close of the subsequent Rebalancing Dates, (as defined in the Sub-Index rules), effective on the immediately following Scheduled Valuation Day.

4. INDEX DISRUPTION EVENT REMEDIES:

If an Index Disruption Event occurs on a Scheduled Valuation Day (a "**Disrupted Day**"), then the Index Calculation Agent, after instruction from the Index Sponsor, shall not calculate the Index Level on such Disrupted Day. The next Calculation Date shall be the first succeeding Scheduled Valuation Day that is not a Disrupted Day for any Index Component as determined by the Index Calculation Agent, after instruction from the Index Sponsor, unless each of the five Scheduled Valuation Days immediately following the initial Disrupted Day is also a Disrupted Day for any Index Component, in which case:

- (i) the fifth Scheduled Valuation Day following the initial Disrupted Day, and each Scheduled Valuation Day that is a Disrupted Day thereafter, shall be deemed to be a Calculation Date (each, a "**Disrupted Calculation Date**"), notwithstanding the existence of an Index Disruption Event on such date and only for the purpose of determining an estimate of the Index Level; and
- (ii) on that fifth Scheduled Valuation Day and on each Disrupted Calculation Date thereafter, the Index Calculation Agent shall calculate the Index Level based on the following levels or prices:
 - (a) if the Index Disruption Event is a Sub-Index Disruption Event in relation to the Sub-Index only:
 - (x) the level or price of the Sub-Index using (α) the level or price of such Sub-Index last in effect prior to the occurrence of the relevant Sub-Index Disruption Event and (β) relevant market indicators on the relevant date(s) of determination, in each case as determined in good faith, after instruction from the Index Sponsor; and
 - (y) the level of each of the EURIBOR Rate as described in the definition of such EURIBOR Rate on the relevant date(s) of determination as if no Index Disruption Event existed;
 - (b) if the Index Disruption Event is a EURIBOR Disruption Event in relation to the EURIBOR Rate only:
 - (x) the level or price of the Sub-Index as described in the definition of such Sub-Index, on the relevant date(s) of determination as if no Index Disruption Event existed; and
 - (y) the level of the EURIBOR Rate determined in good faith, after instruction from the Index Sponsor, using relevant market indicators on the relevant date(s) of determination; or
 - (c) If the Index Disruption Event is a Sub-Index Disruption Event in relation to the Sub-Index and a EURIBOR Disruption Event in relation to the EURIBOR Rate:
 - (x) the level or price of the Sub-Index using (α) the level or price of such Sub-Index last in effect prior to the occurrence of the relevant Sub-Index Disruption Event and (β) relevant market indicators on the relevant date(s) of determination, in each case determined in good faith, after instruction from the Index Sponsor; and

- (y) the level of the EURIBOR Rate determined in good faith, after instruction from the Index Sponsor, using relevant market indicators on the relevant date(s) of determination.

Notwithstanding the foregoing Section 4, on any day from the first Disrupted Calculation Date but no later than the twentieth Scheduled Valuation Day following the initial Disrupted Day, if an Index Disruption Event has been continuing on each such days, the Index Sponsor will decide to (each a "**Index Disruption Remedy**"):

- a. adjust any relevant terms of the Index Rules in a manner that preserves the economic characteristics of the Index; or
- b. continue the determination of the Index Level pursuant to section 4(ii) for another maximum period of twenty Scheduled Valuation Days (a "**Disruption Period Extension**"), provided that after such period, the Index Sponsor shall decide again between the Index Disruption Remedies, including a renewal of the Disruption Period Extension, subject to a maximum of three such extensions, including the first one; or
- c. permanently cancel the Index if neither of the Index Disruption Remedies (i) and (ii) above constitute suitable remedies for such Index Disruption Event, as determined by the Index Sponsor.

5. EXTRAORDINARY EVENT REMEDIES:

If an Index Extraordinary Event or an Additional Extraordinary Event occurs on a Scheduled Valuation Day (an "**Extraordinary Event Day**"), then the Index Calculation Agent, after instruction from the Index Sponsor, may suspend the calculation of the Index Level on such Extraordinary Event Day, in which case the next Calculation Date shall be the first succeeding Scheduled Valuation Day on which the Index Extraordinary Event or Additional Extraordinary Event has been remedied as follows; provided that no later than the twentieth Scheduled Valuation Day following the initial Extraordinary Event Day, the Index Sponsor shall decide to (each, an "**Extraordinary Event Remedy**"):

- (a) adjust any relevant terms of the Index Rules (including, without limitation, a reduction of the weight of or a full removal of the relevant Index Component) in a manner that preserves the economic characteristics of the Index; or
- (b) replace the relevant Index Component with a new component of similar characteristics; or
- (c) permanently cancel the Index if neither of the Extraordinary Event Remedies provided in sections (a) and (b) above constitute suitable remedies for such Index Extraordinary Event, as determined by the Index Sponsor.

$$IL(t) = IL(t - 1) \times \frac{UBL(t)}{UBL(t - 1)} \times \left(1 - MF \times \frac{ACT(t - 1, t)}{360} \right)$$

Where,

$$IL(t_0) = 1000$$

2.4 DETERMINATION OF THE UNDERLYING BASKET LEVEL, “UBL(T)”

The Underlying Basket Level shall be determined by the Index Calculation Agent as per the relevant provisions of the Index Calculation Agent Methodology.

Pursuant to a Corporate Event, the Underlying Basket shall be adjusted by the Index Calculation Agent as per the relevant provisions of the Index Calculation Agent Methodology.

3. REVIEW OF THE INDEX COMPONENTS:

3.1 SELECTION OF THE INDEX COMPONENTS

On each Allocation Review Date, the composition and allocation of the Underlying Basket is systematically adjusted on a quarterly basis according to the World Champions Portfolio publication available from the Equity Research Department of Société Générale on the website <https://www.sgmarkets.com/> (any websites included in the prospectus are for information purposes only and do not form part of the prospectus).

The Underlying Basket allocation is composed by 25 stocks that must meet the following selection criteria:

- Belong to the 500 largest market capitalization stocks;
- Hold a significant market shares in a given activity.

3.2 WEIGHT DETERMINATION

On each Allocation Review Date, each Share is given a weight which is systematically computed according to a proprietary model developed by the Index Sponsor and based on a 2 steps optimization process described below:

- Step 1 : Equal-Risk Contribution algorithm (“**ERC Algorithm**”)
- Step 2 : Diversification Filter

3.2.1 ERC Algorithm

General Principle

The optimization process (ERC approach) employed draws on the principles of the Modern Portfolio Theory set out by Markowitz, Lintner and Sharpe in 1950s and 1960s. However, even though it can be analyzed in the mean-variance framework, the ERC approach is more derived from the techniques of risk-budgeting. The objective of the ERC portfolio ("**ERC Portfolio**") is to find a risk-balanced allocation such that the risk contribution of each asset in the portfolio is equal. As a consequence, unlike the traditional mean-variance portfolio, the ERC Portfolio does not require an assumption about the expected returns of each asset and thus the only inputs needed to build an ERC Portfolio is the covariance matrix (the "**Covariance Matrix**") of the ERC Portfolio's components.

Determination of the Marginal Risk Contributions

The Marginal Risk Contribution ("**MRC**") corresponds to the change in the volatility of the Underlying Basket induced by a small increase in the weight of each Stock. It is calculated by the following formula:

$$\partial_{x_i} \sigma(I) = \frac{\partial \sigma(I)}{\partial x_i}$$

Where,

$\partial_{x_i} \sigma(I)$ means the MRC of the Stock(i) to the volatility of the Underlying Basket

$\sigma(I)$ means the volatility of the Underlying Basket

x_i means the weight considered for Stock(i)

Determination of the Covariance Matrix

The Covariance Matrix is computed on each Review Date using 3-day returns for each Stock over the last 120 Calculation Dates according to the following formula:

$$\sum (i, j, t) = \frac{1}{120} \times \sum_{k=0}^{119} (r_{i,k}(t-k) - \overline{r_i(t)}) \times (r_{j,k}(t-k) - \overline{r_j(t)})$$

where,

$$r_{i,k}(t-k) = \sqrt{\frac{365}{\text{ACT}(t-k, t-k-3)}} \times \ln \left(\frac{S(i, t-k) \times \text{FX}(i, t-k)}{S(i, t-k-3) \times \text{FX}(i, t-k-3)} \right)$$

and,

$$\overline{r_{i,k}(t)} = \frac{1}{120} \times \sum_{k=0}^{119} r_{i,k}(t-k)$$

$S(i,t)$ means, in respect of a Calculation Date(t) and a Stock(i), the closing price of the Net Total Return version of the Stock(i).

$\text{FX}(i,t)$ means, in respect of the Calculation Date (t) and Stock(i), the foreign spot exchange rate to convert in the Index Currency one unit of the stock currency.

Determination of the ERC Portfolio weights

The ERC Portfolio weights are determined on the Allocation Review Date (t_{REV}) such that the risk contribution of each stock should be equal under the following constraints:

- the MRC of each stock must be equal.
- the weighting of each stock shall be positive and smaller than 1.
- the sum of the weightings of the portfolio constituents must be equal to 1.

The ERC Portfolio weights are the solution of the following optimization program:

$$X^{ERC}(t_{REV}) = \underset{X}{\text{Argmin}} \sum_{i=1}^{25} \sum_{j=1}^{25} \left(X_i \left(\sum X \right)_i - X_j \left(\sum X \right)_j \right)^2$$

Subject to:

$$\begin{cases} X_i^{ERC} \geq 0 & \text{for } i = 1, 2, \dots, 25 \\ X_i^{ERC} \leq 1 & \text{for } i = 1, 2, \dots, 25 \\ \sum_{i=1}^{25} X_i^{ERC} = 1 \end{cases}$$

with,

Σ means the Covariance Matrix on the Allocation Review Date (t_{REV}).

3.2.2 Diversification Filter

The final allocation used, on the relevant Allocation Review Date, to constitute the Underlying Basket will be determined according to a further optimization applied to the ERC Portfolio weights in order to satisfy the below diversification constraints:

- The weight of a single Country is limited to 50% of the Underlying Basket.
- The weight of a single Sector is capped at 20% of the Underlying Basket.
- The weight of each Stock is capped at 10% of the Underlying Basket.

The final weights are computed as below:

$$\omega_i^{Opt} = \alpha_i^{Opt} \times \beta_j^{Opt} \times \gamma_k^{Opt} \times X_i^{ERC}$$

Where,

α_i^{Opt} is defined for each Stock(i)

β_j^{Opt} is defined for each Sector(j)

γ_k^{Opt} is defined for each Country(k)

And altogether are the solutions of the following optimization program:

$$[\alpha^{Opt}, \beta^{Opt}, \gamma^{Opt}] = \underset{[\alpha, \beta, \gamma]}{\text{Argmin}} \left(\text{Error}_{\text{Stock}}(\alpha, \beta, \gamma) + \text{Error}_{\text{Sector}}(\alpha, \beta, \gamma) + \text{Error}_{\text{Country}}(\alpha, \beta, \gamma) \right)$$

Subject to:

$$\left\{ \begin{array}{l} \sum_{i=1}^{25} \omega_i = 1 \\ 0 \leq \omega_i \leq 10\% \\ \text{Weight Sector}_j \leq 20\% \text{ for any Sector (j)} \\ \text{Weight Country}_k \leq 50\% \text{ for any Country (k)} \\ \alpha_i \geq 0 \text{ for any Stock(i), } i = 1, 2, \dots, 25 \\ \beta_j \geq 0 \text{ for any Sector(j)} \\ \gamma_k \geq 0 \text{ for any Country(k)} \end{array} \right.$$

With,

$$\omega_i = \alpha_i \times \beta_j \times \gamma_k \times X_i^{\text{ERC}}$$

$$\text{Error}_{\text{Stock}}(\alpha, \beta, \gamma) = \sum_{i=1}^{25} \text{Max}(0, \omega_i - 10\%) + \sum_{i=1}^{25} \text{Max}(0, X_i^{\text{ERC}} - \omega_i) \times \text{Ind}(\alpha_i < 1)$$

$$\text{Error}_{\text{Country}}(\alpha, \beta, \gamma) = \sum_j \text{Max}(0, \text{Weight Sector}_j - 20\%)$$

$$\text{Error}_{\text{Sector}}(\alpha, \beta, \gamma) = \sum_k \text{Max}(0, \text{Weight Country}_k - 50\%)$$

$$\text{Weight Sector}_j = \sum_{i=1}^{25} \omega_i \times \text{Ind}(\text{Sector}(i) = \text{Sector}(j)) \text{ for any Sector}(j)$$

$$\text{Weight Country}_k = \sum_{i=1}^{25} \omega_i \times \text{Ind}(\text{Country}(i) = \text{Country}(k)) \text{ for any Country}(k)$$

$$\begin{cases} \text{Ind}(A) = 1 \text{ if } A \text{ is True} \\ \text{Ind}(A) = 0 \text{ if } A \text{ is False} \end{cases}$$

4. EXCEPTIONS TO THE SGI GLOBAL METHODOLOGY AND INITIAL PARAMETERS:

4.1 EXCEPTIONS

The Underlying Basket Level is determined net of transaction and replication costs that are computed by the Index Calculation Agent according to Index Calculation Agent Methodology by assuming that:

- the foreign exchange rate to convert a unit of the Index Component currency in the Index currency is sourced by WM Reuters.
- the withholding tax that is applicable are sourced from Ernst & Young's Worldwide Corporate Tax Guide and the Economic Intelligence Unit.
- the execution cost for any Share is equal to Fixed Transaction Costs (as defined in Section 2).
- the replication cost for any Share is equal to Fixed Replication Cost (as defined in Section 2). They are calculated daily and accrue on a daily basis on the level or price of the Basket Component.
- the transaction cost in respect of a Calculation Date (t) that is neither a Rebalancing Date nor a Reweighting Date is deemed to be equal to 0%.

4.2 INITIAL PARAMETERS

The initial parameters are as follows:

- Underlying Basket composition as of the Index Launch Date is provided in Appendix 1.

5. ADDITIONAL PROVISION:

In circumstances where the Index Sponsor makes various decisions (the "**Decisions**"), with respect to the methodology of calculation and/or the allocation of the Index, and the Index Calculation Agent determines that it can no longer calculate the Index to obtain the Index Levels according to the Index Rules as amended by such Decisions, the Index Calculation Agent shall notify the Index Sponsor of such impossibility together with the grounds thereof. 3. REVIEW OF THE INDEX COMPONENTS

3.1 UNIVERSE

The universe (the "Index Universe") corresponds to the European Silver Economy Portfolio available from the Equity Research Department of Société Générale on the website: <https://www.sgmarkets.com/>

The Index Universe is composed of (a) European stocks or (b) stocks listed in European Exchanges whose the largest region of revenues is Europe and that will benefit from an increase in the older population and leverage on the purchasing power of this population.

The Index Universe is reviewed from time to time by the Equity Research Department of Société Générale.

3.2 BASKET COMPONENTS SELECTION

The review of the allocation is performed by the Index Sponsor on each Review Date (t_{RW}).

A liquidity filter is applied to remove all the stocks of the Index Universe having a 30 days average daily volume less than EUR 3 million. For the remaining stocks, the following signal ("**Signal**") is calculated:#

$$Signal(t_{RW}) = \frac{1}{3} \times \sum_{i=0}^2 \left(\frac{Annual\ Revenues(t_{RW} - i \times 12\ Months)}{Annual\ Revenues(t_{RW} - (i + 1) \times 12\ Months)} - 1 \right)$$

Where,

Annual Revenues (t), means the last annual revenues on the fiscal year that precedes the Calculation Date (t) (i.e., the four (4) fiscal quarters preceding such date for Companies reporting quarterly, the two (2) semi-annual fiscal periods preceding such date periods for Companies reporting semi-annually or the fiscal year preceding such date for Companies reporting annually).

The top 40 Stocks are selected; subject to the number of stocks belonging to any GICS sub-industry shall not exceed 3. The Basket Component Weight calculation is detailed in the following section.

3.3 BASKET COMPONENT WEIGHT DETERMINATION

On each Rebalancing Date, each Basket Component is given a weight which is systematically computed, on the Review Date immediately preceding such date, according to a proprietary model developed by the Index Sponsor and based on an Equal-Risk Contribution algorithm ("**ERC Algorithm**")

3.3.1 ERC Algorithm

General Principle

The optimization process (ERC approach) employed draws on the principles of the Modern Portfolio Theory set out by Markowitz, Lintner and Sharpe in 1950s and 1960s. However, even though it can be analyzed in the mean-variance framework, the ERC approach is more derived from the techniques of risk-budgeting. The objective of the ERC portfolio ("**ERC Portfolio**") is to find a risk-balanced allocation such that the risk contribution of each asset in the portfolio is equal. As a consequence, unlike the traditional mean-variance portfolio, the ERC Portfolio does not require an assumption about the expected returns of each asset and thus the only inputs needed to build an ERC Portfolio is the covariance matrix (the "**Covariance Matrix**") of the ERC Portfolio's components.

Determination of the Marginal Risk Contributions

The Marginal Risk Contribution ("**MRC**") corresponds to the change in the volatility of the Underlying Basket induced by a small increase in the weight of each Basket Component. It is calculated by the following formula:

$$\partial_{w_i} \sigma(I) = \frac{\partial \sigma(I)}{\partial w_i}$$

Where,

$\partial_w \sigma(I)$ means the MRC of the Basket Component (i) to the volatility of the Underlying Basket

$\sigma(I)$ means the volatility of the Underlying Basket

w_i means the weight considered for Basket Component (i)

Determination of the Covariance Matrix

The Covariance Matrix is computed, on each Review Date (t_{RW}), using 3-day returns for each Basket Component over the last 252 Calculation Dates according to the following formula:

$$\sum_{(i,j,t)} = \frac{1}{252} \times \sum_{k=0}^{215} (r_{i,k}(t-k) - \overline{r_i(t)}) \times (r_{j,k}(t-k) - \overline{r_j(t)})$$

where,

$$r_{i,k}(t-k) = \sqrt{\frac{365}{ACT(t-k, t-k-3)}} \times \ln \left(\frac{CP_i^{GTR}(t-k) \times FX_i(t-k)}{CP_i^{GTR}(t-k-3) \times FX_i(t-k-3)} \right)$$

and,

$$\overline{r_{i,k}(t)} = \frac{1}{252} \times \sum_{k=0}^{251} r_{i,k}(t-k)$$

Calculation of the Basket Component Weights

The Basket Component Weights are determined, on each Review Date (t_{RW}), such that the risk contribution of each component should be equal under the following constraints:

- equal MRC of each stock Basket Component.
- the Basket Component Weights shall be positive and smaller than 1.
- the sum of the Basket Component Weights must be equal to 1.

The Basket Component Weights are the solution of the following optimization program:

$$W^{ERC}(t_{RW}) = \underset{W}{\operatorname{Argmin}} \sum_{i=1}^{40} \sum_{j=1}^{40} \left(W_i \left(\sum W \right)_i - W_j \left(\sum W \right)_j \right)^2$$

Subject to:

$$\begin{cases} W^{ERC}_i \geq 0 & \text{for } i = 1, 2, \dots, 40 \\ W^{ERC}_i \leq 1 & \text{for } i = 1, 2, \dots, 40 \\ \sum_{i=1}^{40} W^{ERC}_i = 1 \end{cases}$$

with,

Σ means the Covariance Matrix on the Review Date (t_{RW}).

4. EXCEPTIONS TO THE SGI GLOBAL METHODOLOGY AND INITIAL PARAMETERS

The Index Level is, in respect of Calculation Date (t), calculated by the Index Calculation Agent at the Valuation Time, subject to the occurrence or existence of an Index Disruption Event or an Index Extraordinary Event, according to the S&P Index Methodology. Exceptions to the S&P standard methodology are listed below:

4.1 EXCEPTIONS

The Index Level is determined by the Index Calculation Agent according to its standard methodology by assuming that:

- in respect of a Basket Component (i) and a Calculation Date (t), the foreign exchange rate to convert in the Index Currency a unit of the Basket Component Currency as of such Calculation Date, is as published by WM Reuters.;
- the transaction cost in respect of a Calculation Date (t) that is not a Rebalancing Date is deemed to be equal to 0;
- the execution cost for any Basket Component is equal to the Fixed Transaction Cost i.e. : 0.05% and is applied on each Rebalancing Date.
- the Maintenance Fee is accrued daily on the Index Level;
- the reinvestment rates are the current effective rates sourced from S&P Opco, LLC; these rates are maintained and updated by the Index Calculation Agent to reflect any ongoing changes it

being understood that in respect of an Ordinary Dividend or an Extraordinary Dividend that is of a non-operational nature, the reinvestment rate shall be deemed to be 100%.

The Index is calculated and published by Standard & Poor's Financial Services LLC (the "**Index Calculation Agent**").

The Index is calculated end of day.

1.2 INDEX STRATEGY

The Index components may be reviewed according to the CEO Model by Société Générale (the "**Index Sponsor**") every quarter in order to reflect any change in the stock selection.

The index universe (the "**Index Universe**") includes stocks that comply with the Selection Criteria provided in section 3. The current index composition is available at <https://sgi.sgmarkets.com/en/index-details/TICKER:SGIXCEOV/> (any websites included in the prospectus are for information purposes only and do not form part of the prospectus).

3. REVIEW OF THE INDEX COMPONENTS:

3.1 SELECTION CRITERIA:

To qualify for inclusion in the Index, a Share must meet the following selection criteria:

- be traded on one of the Exchange listed in Appendix 1 of the Index Rules;
- have a minimum free float market capitalisation of EUR 1 (one) billions or the equivalent in another currency;
- its Company is headquartered in one of the following countries: United Kingdom, France, Finland, Sweden, Denmark, Spain, Portugal, Italy, Austria, Germany, Switzerland, Belgium, Luxemburg, Netherlands, Norway, Ireland and any other European country as the Index Sponsor may determine.

Altogether the “**Selection Criteria**”.

3.2 DETERMINATION OF THE INDEX COMPONENTS:

On any Scheduled Review Date (or any other date determined by the Index Sponsor) the Index may be reviewed in accordance with the CEO Model. The Index Sponsor attributes scores to a sub universe of Shares selected from around 600 Shares. Selection is first done according to 2 filter criterias and then a scoring is established according to 2 financial and governance criteria (brief description of each criteria is supplied in Appendix 2 of the Index Rules). The Index corresponds to the equally weighted basket of the top ranked stocks. It will generally include between 20 and 30 Shares.

The Index Sponsor will apply a liquidity overlay and form the Index by removing all Shares which exhibit an aggregated average daily turnover below EUR 3 (one) million or equivalent over the last thirty Calculation Dates as of the Scheduled Review Date.

If on a Scheduled Review Date, the selection of Shares according to the CEO Model is unchanged versus the portfolio just before such Scheduled Review Date, the corresponding Rebalancing will be limited to the re-weighting of the Shares to achieve an equally weighted basket.

2.10 DETERMINATION OF THE UNDERLYING BASKET COMPONENT WEIGHT, "W(I,T)"

1.10.1 Determination of the Volatility, " $\sigma_i(t)$ "

The Volatility is defined by:

$$\sigma_i(t) = \sqrt{\frac{1}{n-1} \times \sum_{k=0}^{n-1} (R_i(t-k) - \overline{R_i(t,n)})^2}$$

With,

$$R_i(t) = \frac{CP_i(t)}{CP_i(t-1)} - 1$$

$$\overline{R_i(t,n)} = \frac{1}{n} \times \sum_{k=0}^{n-1} R_i(t-k)$$

and n = 66

1.10.2 Determination of the Rolling Beta, " $\beta(t)$ "

The Rolling Beta is, in respect of Calculation Date (t), determined according to the below formula:

for $t \geq t_0 + 66$

$$\beta(t) = \frac{Cov_{1,2}(t)}{(\sigma_2)^2}$$

Where

$$Cov_{i,j}(t) = \frac{1}{n-1} \sum_{k=0}^{n-1} (R_i(t-k) - \overline{R_i(t,n)}) \times (R_j(t-k) - \overline{R_j(t,n)})$$

And $\beta(t) = 300\%$ for $t < t_0 + 66$

1.10.3 Determination of the Target Weight, "TWi(t)"

The Target Weight is, in respect of Calculation Date (t), determined according to the below formula:

$$TW_1(t) = 200\% \\ TW_2(t) = -200\% \times \beta(t)$$

1.10.4 Determination of the Weight, "Wi(t)"

The Weight is, in respect of Calculation Date (t), determined according to the below formula:

$$W_1(t) = TW_1(t)$$
$$W_2(t) = \text{Min} \left(AC_2, \text{Max}(-AC_2, W_2(t-1) + \text{Min}(DC_2, \text{Max}(-DC_2, TW_2(t_{Rev}(t)) - W_2(t-1))) \right)$$

With,

$$W_i(t) = 0 \text{ for } t < t_0 - 2$$

Mapleis Limited (the **Preference Share Issuer**) is a private company limited by shares and was incorporated under the Companies Act 2006 on 7 March 2016 (with registered number 10045873). Mapleis Limited is governed by the laws of England and Wales and has its registered office at c/o Group Legal, SG House, 41 Tower Hill, London EC3N 4SG.

The sole business activity of the Preference Share Issuer is to (i) issue redeemable preference shares (the **Preference Shares**) under its preference share programme (the **Preference Shares Programme**); and (ii) enter into a loan or deposit agreement with Société Générale. Accordingly, the Preference Share Issuer does not have any trading assets and generates limited net income. The Preference Share Issuer does not have a credit rating.

As at the date of this Base Prospectus, the Preference Share Issuer has 250,000 ordinary shares in issue. The Company may issue further shares with such rights or restrictions as may be determined by ordinary resolution or, in the absence of such determination, the directors may determine such share rights or restrictions. The ordinary shares of the Preference Share Issuer are held by SG Investments Limited

The Preference Shares may be offered and issued to investors pursuant to the terms agreed with the Preference Share Issuer. Société Générale acts as structuring agent in order to facilitate the offer and issue by Preference Share Issuer of Preference Shares as well as calculation agent in respect of the Preference Shares. Other service providers act as registrar and corporate administrator to the Preference Share Issuer or in respect of the Preference Shares, as applicable.

A copy of the Mapleis Limited's constitutional documents and the terms and conditions of the Preference Shares (as contained in the principal memorandum and the relevant supplemental memorandum in respect of the Preference Shares) are available to investors in the Preference Share Linked Notes on written request (free of charge) from the registered office of the Mapleis Limited and from the distributor of the relevant Preference Share Linked Notes.

2. DOCUMENTS FOR INSPECTION

Copies of the Preference Share Issuer's constitutional documents (the Article of Associations) will be available for inspection at the registered office of the Preference Share Issuer, in each case during normal business hours on any weekday (Saturdays, Sundays and public holidays excepted) for 14 days following the date of each Supplemental Memorandum (as defined below).

The Private Placement Memorandum can be obtained by any interested investors from Société Générale.

3. DOCUMENTS ON DISPLAY

Copies of the Principal Memorandum (as defined below), any applicable Supplemental Memorandum relating to a series of Preference Shares, the Articles of Association and, after publication thereof, the annual accounts may be obtained from the corporate administrator at its registered office (Sanne Group (UK) Limited, 21 Palmer Street, London, SW1H 0AD) on request.

4. THE PREFERENCE SHARES

Preference Shares may be issued from time to time by the Preference Share Issuer in a Series under the Preference Shares Programme. Each Series of Preference Shares may have different features which are set out in the principal memorandum (the **Principal Memorandum**) and a Series specific supplemental memorandum (the **Supplemental Memorandum**, and together with the Principal Memorandum, the **Private Placement Memorandum**).

The Preference Shares issued under the Preference Shares Programme may pay dividend amount(s) (if any), may pay an automatic early redemption amount and, unless previously redeemed or cancelled, will pay a final redemption amount at maturity which may be linked to the performance of one or more underlying(s) (each, a **Preference Share Underlying**) which may include, but will not be limited to, equity, debt or derivative securities, indices, investments, funds, exchange traded funds, commodities, credit, baskets of securities or indices, currencies, portfolios and trading strategies. The composition of the relevant Preference Share Underlying(s) may be designed to change over time as a result of performance or other factors.

The Supplemental Memorandum applicable to a particular Series of Preference Shares will specify the redemption amount(s) and dividend amount(s) (if any) and when any such amount is payable and the terms based on which it is calculated.

The Preference Shares will not be exchangeable through CREST (or any other clearing system) and will not be listed or admitted to trading on any Stock Exchange.

The Private Placement Memorandum also provides that the Preference Share Issuer may redeem the Preference Shares early if:

- (a) the Preference Share Issuer's obligations under the relevant Series of Preference Shares become illegal or impractical; or

- (b) a change in law or regulation occurs that results or will result, solely by reason of the Preference Shares being outstanding, in the Preference Share Issuer being required to be regulated by any additional regulatory authority or being subject to any additional legal requirement or regulation or tax considered by the Preference Share Issuer to be materially onerous to it; or
- (c) if the financial product (the return on which is dependent on the value of the Preference Shares) is subject to early redemption or cancellation (other than if the early redemption or cancellation of the relevant financial product is caused by the early redemption of the relevant Series of Preference Shares); or
- (d) the calculation agent determines that an event has occurred and/or is existing that constitutes an early redemption event in relation to the relevant Series of Preference Shares.

5. THE PREFERENCE SHARE UNDERLYING

The performance of the Preference Shares depends on the performance of the Preference Share Underlying to which the relevant Preference Shares are linked.

Investors should review the Private Placement Memorandum and other constitutional documents and consult with their own professional advisers if they consider it necessary.

TAXATION

THE FOLLOWING SECTION PROVIDES GENERAL INFORMATION, AS OF THE DATE OF THIS BASE PROSPECTUS, ON TAXES ON THE INCOME FROM THE NOTES WITHHELD AT SOURCE IN RESPECT OF (I) THE COUNTRY OF THE REGISTERED OFFICE OF THE ISSUERS AND (II) THE COUNTRIES WHERE OFFERS OF NOTES MAY BE MADE OR ADMISSION TO TRADING MAY BE SOUGHT. SUCH INFORMATION IS NOT INTENDED TO PROVIDE AN EXHAUSTIVE DESCRIPTION OF THE POTENTIAL TAX ISSUES ASSOCIATED WITH THE NOTES. ACCORDINGLY, ANY INVESTOR CONSIDERING AN INVESTMENT IN THE NOTES SHOULD OBTAIN INDEPENDENT TAX ADVICE ON THE TAXATION IMPLICATIONS FOR IT, IN EACH RELEVANT JURISDICTION, OF PURCHASING, OWNING OR DISPOSING OF ANY NOTE.

1. JURISDICTIONS OF THE ISSUERS

1.1 France

1.1.1 Withholding tax

1.1.1.1 Payments made by Société Générale as Issuer

The following may be relevant to holders of the Notes who do not concurrently hold shares in Société Générale.

1.1.1.1.1 Notes issued by Société Générale or SG Option Europe which are not consolidated (assimilables for the purposes of French law) and do not form a single series with notes issued before 1 March 2010.

Payments of interest and other income made by Société Générale with respect to Notes issued as from 1 March 2010 (other than Notes (as described below) which are consolidated (assimilables for the purpose of French law) and form a single series with notes issued before 1 March 2010 having the benefit of Article 131 *quater* of the French tax code (FTC)) will not be subject to the withholding tax provided by Article 125 A III of the FTC unless such payments are made outside France in a non-cooperative State or territory (*Etat ou territoire non coopératif*) within the meaning of Article 238-0 A of the FTC (a **Non-Cooperative State**). If such payments under the Notes are made outside France in a Non-Cooperative State, a 75 per cent. withholding tax will be applicable (subject to certain exceptions and to the more favourable provisions of an applicable double tax treaty) by virtue of Article 125 A III of the FTC. The list of Non-Cooperative States is published by a ministerial executive order and is updated on annual basis. A draft law published by the French government on 28 March 2018 would, if adopted in its current form, (i) expand the list of Non-Cooperative States as defined under Article 238-0 A of the FTC to include the jurisdictions on the list set out in Annex I to the conclusions adopted by the Council of the European Union on 5 December 2017, as updated, (the **EU List**) and, as a consequence, (ii) expand this withholding tax regime to certain jurisdictions included in the EU List.

Furthermore, according to Article 238 A of the FTC, interest and other income on such Notes will not be deductible from Société Générale's taxable income if they are paid or accrued to persons domiciled or established in a Non-Cooperative State or paid to an account opened in the books of a financial institution established in such a Non-Cooperative State (the **Deductibility Exclusion**). The draft law published by the French government on 28 March 2018 abovementioned would, if adopted in its current form, expand this regime to the jurisdictions included in the EU List. Under certain conditions, any such non-deductible interest and other income may be recharacterised as constructive dividends pursuant to Articles 109 et seq. of the FTC, in which case such non-deductible interest and other income may be subject to the withholding tax provided by Article 119 bis 2 of the FTC, at a rate of (i) 12.8 per cent. for payments benefiting individuals who are not French tax residents, (ii) 30 per cent. (to be aligned with the standard corporate income tax rate set forth in Article 219-I of the FCT for fiscal years beginning as from 1 January 2020) for payments benefiting legal persons who are not French tax residents or (iii) 75 per cent. for payments made outside France in a Non-Cooperative State (subject to certain exceptions and to the more favourable provisions of an applicable double tax treaty).

Notwithstanding the foregoing, neither the 75 per cent. withholding tax provided by Article 125 A III of the FTC nor the Deductibility Exclusion will apply in respect of a particular issue of Notes if the relevant Issuer can prove that the main purpose and effect of such issue of Notes was not that of allowing the payments of interest or other income to be made in a Non-Cooperative State (the **Exception**). Pursuant to the *Bulletin Officiel des Finances Publiques-Impôts* BOI-INT-DG-20-50-20140211, no. 550 and 990, BOI-RPPM-RCM-30-10-20-40-20140211, no. 70 and 80, and BOI-IR-DOMIC-10-20-20-60-20150320, no. 10, an issue of Notes will benefit from the Exception without the Issuer having to provide any proof of the purpose and effect of such issue of Notes, if such Notes are:

- (i) offered by means of a public offer within the meaning of Article L.411.1 of the French monetary and financial code or pursuant to an equivalent offer in a State other than a Non-Cooperative State. For this purpose, an "equivalent offer" means any offer requiring the registration or submission of an offer document by or with a foreign securities market authority; or
- (ii) admitted to trading on a French or foreign regulated market or multilateral securities trading system provided that such market or system is not located in a Non-Cooperative State, and the operation of such market is carried out by a market operator or an investment services provider, or by such other similar foreign entity, provided further that such market operator, investment services provider or entity is not located in a Non-Cooperative State; or
- (iii) admitted, at the time of their issue, to the operations of a central depository or of a securities delivery and payments systems operator within the meaning of Article L.561-2 of the French monetary and financial code, or of one or more similar foreign depositories or operators provided that such depository or operator is not located in a Non-Cooperative State.

1.1.1.1.2 *Notes issued by Société Générale which are consolidated (assimilables for the purposes of French law) and form a single series with notes issued before 1 March 2010*

Payments of interest and other income with respect to Notes issued as from 1 March 2010 which are consolidated (*assimilables* for the purpose of French law) and form a single series with notes issued before 1 March 2010 with the benefit of Article 131 *quater* of the FTC, will be exempt from the withholding tax provided by Article 125 A III of the FTC.

Notes issued before 1 March 2010, whether denominated in Euro or in any other currency, and constituting obligations under French law, or *titres de créances négociables* within the meaning of the *Bulletin Officiel des Finances Publiques-Impôts* BOI-RPPM-RCM-30-10-30-20140211, no. 50, or other debt securities issued under French or foreign law and considered by the French tax authorities as falling into similar categories, are deemed to be issued outside France for the purpose of Article 131 *quater* of the FTC, in accordance with the above-mentioned *Bulletin Officiel des Finances Publiques-Impôts*.

In addition, interest and other income paid by the relevant Issuer on Notes issued as from 1 March 2010 and which are to be consolidated (*assimilables* for the purpose of French law) and form a single series with notes issued before 1 March 2010 will be subject neither to the Deductibility Exclusion, nor as a result to the withholding tax provided by Article 119 *bis* 2 of the FTC solely on account of their being paid in a Non-Cooperative State or accrued or paid to persons established or domiciled in a Non-Cooperative State.

1.1.1.1.3 *Payments made to individuals fiscally domiciled in France*

Pursuant to Article 125 A I of the FTC, where the paying agent (*établissement payeur*) is established in France and subject to certain exceptions, interest and other assimilated income received by individuals who are fiscally domiciled (*domiciliés fiscalement*) in France are subject to a 12.8 per cent. withholding tax, which is deductible from their personal income tax liability in respect of the year in which the payment has been made. Social contributions (CSG, CRDS and other related contributions) are also levied by way of withholding at a global rate of 17.2 per cent. on such interest and other assimilated income received by individuals who are fiscally domiciled (*domiciliés fiscalement*) in France.

1.1.2 **Transfer taxes and other taxes**

The following may be relevant in connection with Notes which may be settled or redeemed by way of physical delivery of certain listed shares issued by a French company (or certain assimilated securities) or securities representing such shares (or assimilated securities).

Pursuant to Article 235 *ter* ZD of the FTC, a financial transaction tax (the **French FTT**) is applicable to any acquisition for consideration, resulting in a transfer of ownership, of (i) an equity security (*titre de capital*) within the meaning of Article L. 212-1 A of the French monetary and financial code or an assimilated equity security (*titre de capital assimilé*), within the meaning of Article L. 211-41 of the French monetary and financial code, admitted to trading on a recognised stock exchange where the said security is issued by a company whose registered office is situated in France and whose market capitalisation exceeds €1 billion on 1 December of the year preceding the year in which the imposition occurs (a **French Share**) or (ii) a security representing a French Share (irrespective of the location of the registered office of the issuer of such security). The French FTT could apply in certain circumstances to the acquisition of a French Share (or a security representing a French Share) in connection with the settlement or redemption of Notes. The rate of the French FTT is 0.3% of the acquisition value of the French Share (or the security representing the French Share). There are a number of exemptions from the French FTT and investors should consult their counsel to identify whether they can benefit from them.

If the French FTT applies to an acquisition of a French Share, this transaction is exempt from transfer taxes (*droits de mutation à titre onéreux*) provided by Article 726 of the FTC which generally apply at a rate of 0.1% to the sale of shares issued by a company whose registered office is situated in France, provided that in case of shares listed on a recognised stock exchange, transfer taxes are due only if the transfer is evidenced by a written deed or agreement.

1.2 **Luxembourg**

The statements herein regarding withholding tax considerations in Luxembourg are based on the laws in force in the Grand Duchy of Luxembourg as of the date of this Base Prospectus and are subject to any changes in law.

The following information is of a general nature only, is not intended to be, nor should it be construed to be, legal or tax advice, and does not purport to be a comprehensive description of all the Luxembourg tax considerations which may be relevant to a decision to purchase, own or dispose of the Notes. The information contained within this section is limited to Luxembourg withholding tax issues and prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject and as to their tax position, as a result of the purchase, ownership and disposal of the Notes.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a withholding tax or a tax of a similar nature, or to any other concepts, refers to Luxembourg tax law and/or concepts only.

1.2.1 **Withholding Tax**

1.2.1.1 *Non-resident holders of Notes*

Under Luxembourg general tax laws currently in force, there is no Luxembourg withholding tax on payments of principal, premium or interest made to non-resident holders of Notes, nor on accrued but unpaid interest in

respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by non-resident holders of the Notes.

1.2.1.2 Resident holders of Notes

Under Luxembourg general tax laws currently in force and subject to the law of 23 December 2005, as amended (the "**Relibi Law**"), there is no Luxembourg withholding tax on payments of principal, premium or interest made to Luxembourg resident holders of Notes, nor on accrued but unpaid interest in respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by Luxembourg resident holders of the Notes.

Under the Relibi Law payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to an individual beneficial owner who is a resident of Luxembourg will be subject to a withholding tax of 20 %. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth. Responsibility for the withholding of the tax will be assumed by the Luxembourg paying agent.

2. OTHER JURISDICTIONS

Any terms defined in this section 2, in connection with a particular jurisdiction, relate only to the information provided in connection with that jurisdiction.

2.1 Austria

This section on taxation contains a brief summary of the Issuers' understanding with regard to certain important principles which are of significance in connection with the purchase, holding or sale of the Notes in Austria. This summary does not purport to exhaustively describe all possible tax aspects and does not deal with specific situations which may be of relevance for certain potential investors. In particular, this summary does not describe the tax consequences for investors in Notes which are redeemable in exchange for shares, other securities or rights or which in any other way provide for physical settlement, or the tax consequences after such exchange. The following comments are rather of a general nature and included herein solely for information purposes. They are not intended to be, nor should they be construed to be, legal or tax advice. This summary is based on the currently applicable tax legislation, case law and regulations of the tax authorities, as well as their respective interpretation, all of which may be amended from time to time. Such amendments may possibly also be effected with retroactive effect and may negatively impact on the tax consequences described. It is recommended that potential investors in the Notes consult with their legal and tax advisors as to the tax consequences of the purchase, holding or sale of the Notes. Tax risks resulting from the Notes (in particular from a potential qualification as a foreign investment fund within the meaning of sec. 188 of the Austrian Investment Funds Act 2011 (*Investmentfondsgesetz 2011*)) shall in any case be borne by the investor. For the purposes of the following it is assumed that the Notes are legally and factually offered to an indefinite number of persons.

2.1.1 General Remarks

Individuals having a domicile (*Wohnsitz*) and/or their habitual abode (*gewöhnlicher Aufenthalt*), both as defined in sec. 26 of the Austrian Federal Fiscal Procedures Act (*Bundesabgabenordnung*), in Austria are subject to income tax (*Einkommensteuer*) in Austria on their worldwide income (unlimited income tax liability; *unbeschränkte Einkommensteuerpflicht*). Individuals having neither a domicile nor their habitual abode in Austria are subject to income tax only on income from certain Austrian sources (limited income tax liability; *beschränkte Einkommensteuerpflicht*).

Corporations having their place of management (*Ort der Geschäftsleitung*) and/or their legal seat (*Sitz*), both as defined in sec. 27 of the Austrian Federal Fiscal Procedures Act, in Austria are subject to corporate income tax (*Körperschaftsteuer*) in Austria on their worldwide income (unlimited corporate income tax liability; *unbeschränkte Körperschaftsteuerpflicht*). Corporations having neither their place of management nor their legal seat in Austria are subject to corporate income tax only on income from certain Austrian sources (limited corporate income tax liability; *beschränkte Körperschaftsteuerpflicht*).

Both in case of unlimited and limited (corporate) income tax liability Austria's right to tax may be restricted by double taxation treaties.

2.1.2 Income taxation

Pursuant to sec. 27(1) of the Austrian Income Tax Act (*Einkommensteuergesetz*), the term investment income (*Einkünfte aus Kapitalvermögen*) comprises:

- income from the letting of capital (*Einkünfte aus der Überlassung von Kapital*) pursuant to sec. 27(2) of the Austrian Income Tax Act, including dividends and interest; the tax basis is the amount of the earnings received (sec. 27a(3)(1) of the Austrian Income Tax Act);
- income from realised increases in value (*Einkünfte aus realisierten Wertsteigerungen*) pursuant to sec. 27(3) of the Austrian Income Tax Act, including gains from the alienation, redemption and other realisation of assets that lead to income from the letting of capital (including zero coupon bonds); the tax basis amounts to the sales proceeds or the redemption amount minus the acquisition costs, in each case including accrued interest (sec. 27a(3)(2)(a) of the Austrian Income Tax Act); and
- income from derivatives (*Einkünfte aus Derivaten*) pursuant to sec. 27(4) of the Austrian Income Tax Act, including cash settlements, option premiums received and income from the sale or other realisation of forward contracts like options, futures and swaps and other derivatives such as index certificates (the mere exercise of an option does not trigger tax liability); e.g., in the case of index

certificates, the tax basis amounts to the sales proceeds or the redemption amount minus the acquisition costs (sec. 27a(3)(3)(c) of the Austrian Income Tax Act).

Also the withdrawal of the Notes from a securities account (*Depotentnahme*) and circumstances leading to a restriction of Austria's taxation right regarding the Notes *vis-à-vis* other countries, e.g. a relocation from Austria (*Wegzug*), are in general deemed to constitute a sale (*cf.* sec. 27(6)(1) and (2) of the Austrian Income Tax Act). The tax basis amounts to the fair market value minus the acquisition costs (sec. 27a(3)(2)(b) of the Austrian Income Tax Act).

Individuals subject to unlimited income tax liability in Austria holding the Notes as non-business assets are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. Investment income from the Notes with an Austrian nexus (*inländische Einkünfte aus Kapitalvermögen*), basically meaning income paid by an Austrian paying agent (*auszahlende Stelle*) or an Austrian custodian agent (*depotführende Stelle*), is subject to withholding tax (*Kapitalertragsteuer*) at a flat rate of 27.5%; no additional income tax is levied over and above the amount of tax withheld (final taxation pursuant to sec. 97(1) of the Austrian Income Tax Act). Investment income from the Notes without an Austrian nexus must be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5%. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act at the lower progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). The acquisition costs must not include ancillary acquisition costs (*Anschaffungsnebenkosten*; sec. 27a(4)(2) of the Austrian Income Tax Act). Expenses such as bank charges and custody fees must not be deducted (sec. 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. Sec. 27(8) of the Austrian Income Tax Act, *inter alia*, provides for the following restrictions on the offsetting of losses: negative income from realised increases in value and from derivatives may be neither offset against interest from bank accounts and other non-securitized claims *vis-à-vis* credit institutions (except for cash settlements and lending fees) nor against income from private foundations, foreign private law foundations and other comparable legal estates (*Privatstiftungen, ausländische Stiftungen oder sonstige Vermögensmassen, die mit einer Privatstiftung vergleichbar sind*); income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act may not be offset against income subject to the progressive income tax rate (this equally applies in case of an exercise of the option to regular taxation); negative investment income not already offset against positive investment income may not be offset against other types of income. The Austrian custodian agent has to effect the offsetting of losses by taking into account all of a taxpayer's securities accounts with the custodian agent, in line with sec. 93(6) of the Austrian Income Tax Act, and to issue a written confirmation to the taxpayer to this effect.

Individuals subject to unlimited income tax liability in Austria holding the Notes as business assets are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. Investment income from the Notes with an Austrian nexus is subject to withholding tax at a flat rate of 27.5%. While withholding tax has the effect of final taxation for income from the letting of capital, income from realised increases in value and income from derivatives must be included in the investor's income tax return (nevertheless income tax at the flat rate of 27.5%). Investment income from the Notes without an Austrian nexus must always be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5%. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act at the lower progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). The flat tax rate does not apply to income from realised increases in value and income from derivatives if realizing these types of income constitutes a key area of the respective investor's business activity (sec. 27a(6) of the Austrian Income Tax Act). Expenses such as bank charges and custody fees must not be deducted (sec. 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. Pursuant to sec. 6(2)(c) of the Austrian Income Tax Act, depreciations to the lower fair market value and losses from the alienation, redemption and other realisation of financial assets and derivatives in the sense of sec. 27(3) and (4) of the Austrian Income Tax Act, which are subject to income tax at the flat rate of 27.5%, are primarily to be offset against income from realised increases in value of such financial assets and derivatives and with appreciations in value of such assets within the same business unit (*Wirtschaftsgüter desselben Betriebes*); only 55% of the remaining negative difference may be offset against other types of income.

Pursuant to sec. 7(2) of the Austrian Corporate Income Tax Act (*Körperschaftsteuergesetz*), corporations subject to unlimited corporate income tax liability in Austria are subject to corporate income tax on income in the sense of sec. 27(1) of the Austrian Income Tax Act from the Notes at a rate of 25%. Income in the sense of sec. 27(1) of the Austrian Income Tax Act from the Notes with an Austrian nexus is in general subject to withholding tax at a flat rate of 27.5%. However, pursuant to sec. 93(1a) of the Austrian Income Tax Act, the withholding agent may apply a 25% rate if the debtor of the withholding tax is a corporation. Such withholding tax can be credited against the corporate income tax liability. Under the conditions set forth in sec. 94(5) of the Austrian Income Tax Act withholding tax is not levied in the first place. Losses from the alienation of the Notes can be offset against other income.

Pursuant to sec. 13(3)(1) in connection with sec. 22(2) of the Austrian Corporate Income Tax Act, private foundations (*Privatstiftungen*) pursuant to the Austrian Private Foundations Act (*Privatstiftungsgesetz*) fulfilling the prerequisites contained in sec. 13(3) and (6) of the Austrian Corporate Income Tax Act and holding the Notes as non-business assets are subject to interim taxation at a rate of 25% on interest income, income from realised increases in value and income from derivatives (*inter alia*, if the latter are in the form of securities). Pursuant to the Austrian tax authorities' view, the acquisition costs must not include ancillary acquisition costs.

Expenses such as bank charges and custody fees must not be deducted (sec. 12(2) of the Austrian Corporate Income Tax Act). Interim tax is generally not triggered insofar as distributions subject to withholding tax are made to beneficiaries in the same tax period. Investment income from the Notes with an Austrian nexus is in general subject to withholding tax at a flat rate of 27.5%. However, pursuant to sec. 93(1a) of the Austrian Income Tax Act, the withholding agent may apply a 25% rate if the debtor of the withholding tax is a corporation. Such withholding tax can be credited against the tax triggered. Under the conditions set forth in sec. 94(12) of the Austrian Income Tax Act withholding tax is not levied.

Individuals and corporations subject to limited (corporate) income tax liability in Austria are taxable on income from the Notes if they have a permanent establishment (*Betriebsstätte*) in Austria and the Notes are attributable to such permanent establishment (*cf.* sec. 98(1)(3) of the Austrian Income Tax Act, sec. 21(1)(1) of the Austrian Corporate Income Tax Act). In addition, individuals subject to limited income tax liability in Austria are also taxable on interest in the sense of sec. 27(2)(2) of the Austrian Income Tax Act and accrued interest (including from zero coupon bonds) in the sense of sec. 27(6)(5) of the Austrian Income Tax Act from the Notes if the (accrued) interest has an Austrian nexus and if withholding tax is levied on such (accrued) interest. This does not apply to individuals being resident in a state with which automatic exchange of information exists. Interest with an Austrian nexus is interest the debtor of which has its place of management and/or its legal seat in Austria or is an Austrian branch of a non-Austrian credit institution; accrued interest with an Austrian nexus is accrued interest from securities issued by an Austrian issuer (sec. 98(1)(5)(b) of the Austrian Income Tax Act). The Issuers understand that in this respect no taxation applies in the case at hand.

Pursuant to sec. 188 of the Austrian Investment Funds Act 2011 as amended in the course of the implementation of Directive 2011/61/EU, the term "foreign investment fund" comprises (i) undertakings for collective investment in transferable securities the member state of origin of which is not Austria; (ii) alternative investment funds pursuant to the Austrian Act on Alternative Investment Fund Managers (*Alternative Investmentfonds Manager-Gesetz*) the state of origin of which is not Austria; and (iii) secondarily, undertakings subject to a foreign jurisdiction, irrespective of the legal form they are organized in, the assets of which are invested according to the principle of risk-spreading on the basis either of a statute, of the undertaking's articles or of customary exercise, if one of the following conditions is fulfilled: (a) the undertaking is factually, directly or indirectly, not subject to a corporate income tax in its state of residence that is comparable to Austrian corporate income tax; (b) the profits of the undertaking are in its state of residence subject to corporate income tax that is comparable to Austrian corporate income tax, at a rate of less than 15%; or (c) the undertaking is subject to a comprehensive personal or material tax exemption in its state of residence. Certain collective investment vehicles investing in real estate are exempted. Up to now the tax authorities have not yet adapted the Austrian Investment Fund Guidelines (*Investmentfondsrichtlinien*) to the legislation as currently in force, but the Austrian Ministry of Finance has recently circulated a draft of Investment Fund Guidelines of 2018 for consultation. In case of a qualification as a foreign investment fund, the tax consequences would substantially differ from those described above: A special type of transparency principle would be applied, pursuant to which generally both distributed income as well as deemed income would be subject to Austrian (corporate) income tax.

2.1.3 **Inheritance and gift taxation**

Austria does not levy inheritance or gift tax.

Certain gratuitous transfers of assets to private law foundations and comparable legal estates (*privatrechtliche Stiftungen und damit vergleichbare Vermögensmassen*) are subject to foundation transfer tax (*Stiftungseingangssteuer*) pursuant to the Austrian Foundation Transfer Tax Act (*Stiftungseingangssteuergesetz*) if the transferor and/or the transferee at the time of transfer have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Certain exemptions apply in cases of transfers *mortis causa* of financial assets within the meaning of sec. 27(3) and (4) of the Austrian Income Tax Act (except for participations in corporations) if income from such financial assets is subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act. The tax basis is the fair market value of the assets transferred minus any debts, calculated at the time of transfer. The tax rate generally is 2.5%, with higher rates applying in special cases.

In addition, there is a special notification obligation for gifts of money, receivables, shares in corporations, participations in partnerships, businesses, movable tangible assets and intangibles if the donor and/or the donee have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Not all gifts are covered by the notification obligation: In case of gifts to certain related parties, a threshold of EUR 50,000 per year applies; in all other cases, a notification is obligatory if the value of gifts made exceeds an amount of EUR 15,000 during a period of five years. Furthermore, gratuitous transfers to foundations falling under the Austrian Foundation Transfer Tax Act described above are also exempt from the notification obligation. Intentional violation of the notification obligation may trigger fines of up to 10% of the fair market value of the assets transferred.

Further, gratuitous transfers of the Notes may trigger income tax at the level of the transferor pursuant to sec. 27(6)(1) and (2) of the Austrian Income Tax Act (see above).

2.2 **Germany**

The following discussion of certain German tax consequences of buying, holding or disposing of the Notes is based on tax laws, regulations, decisions, judgments and administrative decrees currently in effect, which may be amended or construed differently, potentially with retroactive or retrospective effect. However, this section does not refer to all possible tax considerations which are relevant to the decision of any potential purchaser with respect to buying, holding or disposing of a Note; in particular, it does not refer to specific circumstances

which may be relevant to certain purchasers such as individual tax privileges. This means that the following text exclusively refers to Notes as an investment as such (unless expressly indicated otherwise) and does not address any persons in their specific tax situation. Further, the following text does not address specific tax situations with respect to the BRRD and the SRM Regulation. The information contained in the following section is not intended as and does not purport to be legal or tax advice.

Prospective investors in the Notes are therefore advised to consult their own tax advisers as to the German and other tax consequences of buying, holding or disposing of the Notes.

As each Tranche of Notes may be subject to a different tax treatment due to the specific terms of such Tranche of Notes as set out in the respective Final Terms, the following section only provides some very general information on the possible tax treatment. If necessary, the prospectus regarding the respective Tranche of Notes will contain more specific but also general information on the possible tax treatment of the respective Notes. Prospective investors should therefore always review the respective Final Terms also with respect to additional tax information.

The law as currently in effect provides for a reduced tax rate for capital income. The coalition agreement between the German Christdemocratic Party and the Socialdemocratic Party for the formation of a new German federal government provides that the final taxation ("*Abgeltungsteuer*") regime for capital income shall be partially abolished. The coalition agreement further specifies that the solidarity surcharge ("*Solidaritätszuschlag*") shall be abolished in stages provided that the individual income does not exceed certain thresholds. There is however no draft bill available yet and a lot of details are hence still unclear. That means however that income received by holders holding the Notes as private assets may be taxed at individual progressive income tax rates of up to 45% in the future (plus 5.5% solidarity surcharge thereon, unless abolished or reduced in the future, and church tax, if applicable to the individual holder).

2.2.1 German taxation of residents

2.2.1.1 Notes held as a private asset

Taxation of interest income

Under German tax law, payment of interest on the Notes to persons who are tax residents of Germany (including persons whose residence, habitual abode, statutory seat or place of management is located in Germany, a "German Holder") and who held the Note as a private asset is subject to German income tax as capital income in the meaning of § 20 German Income Tax Act. From the year 2009, a final taxation ("*Abgeltungsteuer*") is charged on capital income at an amount of 25% plus 5.5% solidarity surcharge ("*Solidaritätszuschlag*") thereon, resulting in a total final taxation of 26.375% (please see below). Taxable base is the received interest without any deduction of expenses actually incurred. The total capital income of the individual will be deducted by a personal annual exemption ("*Sparer-Pauschbetrag*") of EUR 801 (EUR 1,602 for married couples and partners filing their tax return jointly). The personal income tax liability regarding the capital income is, in principle, settled by the tax withheld. If no withholding tax was charged on the payment of the interest, the German Holder will have to include this interest income in its tax return. The final taxation will then be charged by way of assessment. The German Holder may also apply for assessment of the capital income based on the general rules if the personal income tax rate of the German Holder is lower than the final taxation rate. In such assessment, (i) still no deduction of expenses actually incurred is available (except for the deduction of the personal annual exemption ("*Sparer-Pauschbetrag*") of EUR 801 or EUR 1,602 for married couples and partners filing their tax return jointly) and (ii) the withholding tax will be credited.

Please note that church tax is levied automatically by way of a final taxation if the Noteholder is subject to church tax unless the Noteholder has filed a blocking notice ("*Sperrvermerk*") with the German Federal Central Tax Office ("*Bundeszentralamt für Steuern*"). If this is the case church tax is not levied by way of withholding and the Noteholder is obliged to include the income in the tax return for church tax purposes.

Withholding tax on interest income

If the Notes are held in a custodial account maintained by a German Holder with a German branch of a German or foreign bank or financial services institution (a "German Disbursing Agent"), which pays or credits the interest, a 25% withholding tax ("*Kapitalertragsteuer*") on interest payments, plus a 5.5% solidarity surcharge ("*Solidaritätszuschlag*") thereon will be levied, resulting in a total withholding tax charge of 26.375% (plus church tax, if applicable; please see above "Taxation of interest income") on the gross amount of interest paid. Accrued Interest paid by a German Holder upon the purchase of the Notes may be set-off against the amount of interest income received by such German Holder and, under certain circumstances, may reduce the amount subject to withholding tax.

If the Noteholder is an individual to whom income from the Notes constitutes income from a capital investment and such Noteholder has filed a certificate of exemption ("*Freistellungsauftrag*") with the German Disbursing Agent, no tax will be withheld by the German Disbursing Agent to the extent that the interest income derived from the Notes together with other investment income administered by the German Disbursing Agent does not exceed the maximum exemption amount shown on this certificate. Similarly, no tax will be withheld if the Noteholder submits to the German Disbursing Agent a certificate of non-assessment ("*Nichtveranlagungsbescheinigung*") issued by the competent local tax office.

Disposal or redemption of the Notes

Capital gains resulting from the disposal or redemption of Notes (or, as the case may be, from the payment at maturity of the Notes) realised by individual German Holders holding the Notes as private assets are taxable as capital gains. They are also subject to the final taxation ("*Abgeltungsteuer*") at an amount of 25% plus 5.5%

solidarity surcharge ("*Solidaritatzuschlag*") thereon, resulting in a total final taxation of 26.375% (plus church tax, if applicable; please see above "Taxation of interest income").

Base for this taxation is the capital gain, which is in general the difference between the proceeds from the disposal or redemption after deduction of expenses directly related to the disposal and the cost of acquisition. The taxable capital gains from Notes issued in a currency other than Euro also include any currency gains (and losses). In case of a physical settlement of certain Notes which grant the Issuer or the individual Noteholder the right to opt for a physical delivery of a predetermined number of underlying securities instead of a (re)payment in cash, generally no taxable capital gain may result, because the acquisition costs of the Notes are regarded as acquisition costs of the underlying securities received by the individual Noteholder upon physical settlement. Therefore, only losses can arise from the deduction of directly related expenses.

Capital losses in respect of the Notes held as a private asset may only be set-off against capital income within the same financial year and in subsequent years. However, if losses result from Notes held in a custodial account maintained by a German Disbursing Agent, initially the German Disbursing Agent will take these losses into account when calculating the withholding tax. In case the losses cannot be compensated in the current year the losses will be set off against the income of the subsequent year. Upon request of the German Holder the German Disbursing Agent will provide a certificate of all losses, which could not be set off during the current year within the custodial account. This certificate enables the German Holder to claim a deduction within the assessment of capital income.

The German Federal Ministry of Finance ("*Bundesfinanzministerium*") in its decree dated January 18, 2016 (IV C 1 – S 2252/08/10004:017) (as amended) has taken the position that a bad debt loss ("*Forderungsausfall*") and a waiver of a receivable ("*Forderungsverzicht*") shall, in general, not be treated as a sale, so that losses suffered upon such bad debt loss or waiver shall not be deductible for tax purposes. However, the German Federal Court of Finance ("*Bundesfinanzhof*") recently decided that a final bad debt loss with respect to a capital claim shall be deductible for tax purposes (court decision dated 24 October 2017, VIII R 13/15); the question whether this also applies to a waiver of a receivable has been left open by the court. The court decision has not been published in the Federal Tax Gazette ("*Bundessteuerblatt*") as this requires the coordination of the supreme tax authorities of the federation and the German states. As this has not taken place yet, the ruling should therefore not be used apart from the specific case which was decided by the court (regional finance office North Rhine-Westphalia, information note (income tax) no. 01/2018 dated 23 January 2018).

Withholding tax on disposal or redemption of the Notes

Like the treatment of interest income a withholding tax at an amount of 25%, plus a 5.5% solidarity surcharge ("*Solidaritatzuschlag*") thereon (in total 26.375%, plus church tax, if applicable; please see above "Taxation of interest income") will be levied on capital gains from disposal or redemption of the Notes, if the Note is held in a custodial account maintained by a German Disbursing Agent. A withholding tax will not be charged if the German Holder has provided a certificate of exemption ("*Freistellungsauftrag*") or a certificate of non-assessment ("*Nichtveranlagungsbescheinigung*") to the German Disbursing Agent.

Base for this taxation is again the difference between the proceeds from the disposal or redemption after deduction of expenses directly related to the disposal and the cost of acquisition. However, in case the Notes have not been kept in a custodial account with the same German Disbursing Agent since the time of acquisition, upon the disposal, redemption or repayment the withholding applies to 30% of the disposal proceeds, unless the current Disbursing Agent has been notified of the actual acquisition costs of the Notes by the previous Disbursing Agent or by a statement of a bank or financial services institution within the European Union, the EEA or certain other countries/territories (e.g. the Swiss Confederation, the Principality of Liechtenstein, the Republic of San Marino, the Principality of Monaco, the Principality of Andorra, Curacao and Sint Maarten). Furthermore, the special provision for a physical settlement of certain Notes applies for purposes of the withholding. Therefore, in principle, redemption accompanied by physical settlement may not result in a withholding tax.

2.2.1.2 Notes held as business assets or by a corporate body

If the Notes are held as business assets or by a corporate body all income received from the Notes (interest as well as capital gains) is subject to German income tax or German corporate income tax. The income from the Notes will be taxed at the German Noteholder's individual tax rate. The income tax or the corporate income tax is not settled by the tax withheld. Withholding tax and the solidarity surcharge thereon might be credited as prepayments against the German Holder's final tax liability for German personal or corporate income tax purposes and the respective solidarity surcharge, or, if in excess of such final tax liability, refunded upon application.

If the Notes are held in a German business establishment for trade tax purposes, interest income derived from the Notes will also be subject to trade tax on income, which is a municipal tax levied whose effective tax rate depends on the trade tax factor applied by the relevant municipality.

The taxation of the investment in the Notes might be calculated on an accruals basis. The income might therefore be taxed before the German Holder receives a payment from the Notes.

In general, withholding tax will be deducted in accordance with the same provisions as the withholding with respect to Notes held as private assets. The withholding tax on capital gains might not apply under certain circumstances and for certain capital income if the Notes are held by a tax resident corporate or if the Notes are

held by an individual or by a partnership as part of the business assets as long as the German Holder provides the German Disbursing Agent with a certificate of the character of the Notes as business assets.

2.2.2 **German taxation of non-residents**

Income derived from the Notes by persons who are not tax residents of Germany (Non-German Holders) is in general exempt from German income or corporate income taxation, and no withholding tax shall be withheld (even if the Notes are held with a German Disbursing Agent), provided (i) the Notes are not held as business assets of a German permanent establishment of the Non-German Holder, including a permanent representative, or fixed base of the Noteholder, (ii) the income derived from the Notes does not otherwise constitute German source income (such as income from the letting and leasing of certain German situs property), (iii) the Notes or coupons are not presented for payment at the offices of a German branch of a German or foreign bank or financial services institution, that do not hold in custody or manage the Notes, in an over-the-counter-transaction ("*Tafelgeschäft*") by a person who is not a foreign bank or financial service institution and, (iv) in the event that the Notes are held in a custodial account maintained by a German Disbursing Agent, the Noteholder complies with the applicable procedural rules under German law and provides evidence of the fact that the Notes are not subject to taxation in Germany. Unjustified retained withholding tax shall be refunded upon request to the Local Tax Office ("*Finanzamt*") to whom the withholding tax was paid.

If the interest is subject to German taxation (for example, if the Notes are held as business assets of a German permanent establishment of a Non-German Holder), such holder is subject to a tax treatment similar to that described above under the caption "German Taxation of Residents". The withholding tax may be refunded based on an assessment to tax or under an applicable tax treaty.

If the Notes are offered by the Issuer other than in Germany, information relating to withholding tax may be disclosed in the applicable Final Terms or, in the event of an offer which is made after completion of the applicable Final Terms, in a supplement to this Base Prospectus.

2.2.3 **Gift or Inheritance Taxation**

No estate, inheritance or gift taxes with respect to any Notes will arise under the laws of Germany, if, in the case of estate and inheritance taxes, both the decedent and the beneficiary, and, in the case of gift taxes, both the donor and the donee, are tax non-residents and are not deemed to be a tax resident of Germany at the time of the transfer and such Notes are not attributable to a permanent establishment in Germany. In the case of a decedent, donor or heir who is a German national, this only applies if such person has been a non-resident of Germany for more than five consecutive years.

2.2.4 **Stamp Duty**

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax is not levied in Germany.

2.3 **Switzerland**

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Notes issued by the Issuer where the holder is tax resident in Switzerland or has a tax presence in Switzerland or (ii) Notes where the Paying Agent, custodian or securities dealer is located in Switzerland. The discussion is based on legislation as of the date of this Base Prospectus. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision to invest in Notes. The tax treatment for each investor depends on the particular situation. All investors are advised to consult with their professional tax advisers as to the respective Swiss tax consequences of the purchase, ownership, disposition, lapse, exercise or redemption of Notes (or options embedded therein) in light of their particular circumstances.

Swiss Withholding Tax

Payments on a Note are currently not subject to Swiss federal withholding tax provided that the respective Issuer is at all times resident and managed outside Switzerland for Swiss tax purposes. On November 4, 2015 the Swiss Federal Council announced a mandate to the Swiss Federal Finance Department to institute a group of experts tasked with the preparation of a new proposal for a reform of the Swiss withholding tax system. The new proposal is expected to include in respect of interest payments the replacement of the existing debtor-based regime by a paying agent-based regime for Swiss withholding tax similar to the one published on December 17, 2014 by the Swiss Federal Council and repealed on June 24, 2015 following the negative outcome of the legislative consultation with Swiss official and private bodies. Under such a new paying agent-based regime, if enacted, a paying agent in Switzerland may be required to deduct Swiss withholding tax on any payments or any securing of payments of interest in respect of a Note for the benefit of the beneficial owner of the payment unless certain procedures are complied with to establish that the owner of the Note is not an individual resident in Switzerland.

Income Taxation

Notes held as Private Assets by a Swiss resident holder

Structured Notes

If a Note classifies as a structured note, its income taxation depends on whether the bond and the derivative financial instrument(s) embedded therein are recorded separately from each other and whether the Note is classified as a structured note with or without a predominant one-time interest payment (a structured note is classified as a note with a predominant one-time interest payment if the one-time interest payment exceeds the sum of the periodic interest payments):

Non-transparent derivative financial instruments: If the bond is not recorded separately from the embedded derivative financial instrument(s), the Note is classified as non-transparent structured note and any return over the initial investment is classified as a taxable interest payment. Non-transparent derivative financial instruments generally include a predominant one-time interest payment and are taxed in accordance with the principles set forth below under "—Transparent derivative financial instruments with a predominant one-time interest payment".

Transparent derivative financial instruments without a predominant one-time interest payment: If the bond is recorded separately from the embedded derivative financial instrument(s) and the yield-to-maturity predominantly derives from periodic interest payments and not from a one-time-interest-payment (see below "—Transparent derivative financial instruments with a predominant one-time interest payment"), then any such periodic interest payment and the non-predominant one-time interest payment, if any, is taxed when paid to the holder of the Note. A gain, including interest accrued, a loss, respectively, realised on the sale of a Note is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder"). The same applies if the Note is redeemed except that interest accrued is taxed when paid.

Transparent derivative financial instruments with a predominant one-time interest payment: If the bond is recorded separately from the embedded derivative financial instrument(s) and the yield-to-maturity predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments, then any periodic interest payments and on the sale or redemption of the Note, the difference between the value of the bond at redemption or sale, as applicable, and its value at issuance or secondary market purchase, as applicable, converted, in each case, into Swiss Francs at the exchange rate prevailing at the time of redemption or sale, issuance or purchase, respectively (modified differential taxation method) constitutes taxable income. A value decrease on the bond respectively realised on the sale or redemption of the Note may be offset against any gains (including periodic interest payments) realised within the same taxation period from all instruments with a predominant one-time interest payment. Any residual return realised on the embedded derivative financial instrument(s) is a tax-free private capital gain, and any residual loss is a non-tax-deductible private capital loss, respectively (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder").

Bonds

Bonds without a predominant one-time interest payment: If a Note is classified as a pure bond without a predominant one-time interest payment (the yield-to-maturity predominantly derives from periodic interest payments and not from a one-time-interest-payment), Swiss resident private investors will be taxed on the periodic and any one-time interest payments, if any, converted into Swiss Francs at the exchange rate prevailing at the time of payment. A gain, including interest accrued, a loss, respectively, realised on the sale of a Note is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder").

Bonds with a predominant one-time interest payment: If a Note is classified as a pure bond with a predominant one-time interest payment (the yield-to-maturity predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments), Swiss resident private investors will be taxed on any periodic interest payments and on any gains, including capital and foreign exchange gains, realised on the Notes (differential taxation method).

Pure Derivative Financial Notes

Periodic and one-time dividend equalisation payments realised on a Note which is classified as a pure derivative financial instrument (such as pure call and put options, including low exercise price options with a maturity not exceeding one year, pure futures, static certificates replicating an index or a basket of at least five shares and with a fixed maturity or an annual redemption right) and which is held as part of a holder's private assets constitute taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder").

Low Exercise Price Options

According to the current practice of the Swiss Federal Tax Administration low exercise price options are given if the underlying of an option has been pre-financed by at least 50 per cent. at the time of issuance.

For low exercise price options with a maturity exceeding one year the interest component of the low exercise price option (i.e. issue discount) constitutes taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder").

Fund-like Notes

A Note classified as a fund-like instrument will be considered a pass-through instrument for Swiss tax purposes if dividend and interest income (less attributable costs) from, and capital gains and losses (less costs attributable) realised on, the underlying investments, are reported and distributed separately. Under such conditions, an individual holding a fund-like Note as part of private assets only receives taxable income (which he or she must report annually) over such portion of the distributions (in case the fund is distributing the income realised on the underlying investments) or earnings credits (in case the fund is reinvesting the income realised on the underlying investment) as derive from dividends and interest (less attributable costs) on the underlying instruments. Any distributions or credits deriving from capital gains realised on the underlying investments

constitute a tax-free private capital gain and any respective loss on the underlying investments is a non-tax-deductible private capital loss. Any gain realised within a taxation period on the sale of a fund-like instrument (including accrued dividends and interest) is exempt from income taxation as a private capital gain, and, conversely, any loss realised a non-tax-deductible capital loss (see below "—Capital Gains, Notes held as Private Assets by a Swiss resident holder").

Notes held as Assets of a Swiss Business

Corporate entities and individuals who hold Notes as part of a trade or business in Switzerland, in the case of residents abroad carried on through a permanent establishment or a fixed place of business in Switzerland, are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, such Notes (irrespective of their classification) in their income statement for the respective taxation period and will be taxed on any net taxable earnings for such period.

The same taxation treatment also applies to Swiss-resident individuals who, for income tax purposes, are classified as "professional securities dealers" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities.

Capital Gains Taxation

Notes held as Private Assets by a Swiss resident Holder

A gain, a loss, respectively, realised by an individual resident in Switzerland for tax purposes upon the sale or other disposal of a Note held as part of his or her private assets is a tax-free private capital gain, a non-tax deductible capital loss, respectively, unless such individual is classified, for income tax purposes, as a "professional securities dealer" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities. If an individual is classified as a "professional securities dealer" he or she will be taxed in accordance with the principles set forth above under "—Notes held as Assets of a Swiss Business". In relation to the bifurcation of a tax-exempt capital gains component, non-tax deductible capital loss component, respectively, from taxable income components of a Note, see the bifurcation principles set forth above with regard to the different instruments under "—Income Taxation, Notes held as Private Assets by a Swiss resident holder").

Notes held as Assets of a Swiss Business

Capital gains realised on Notes held as Assets of a Swiss Business are taxed in accordance with the taxation principles set forth above under "—Income Taxation, Notes held as Swiss Business Assets").

Stamp Taxes

Swiss Federal Issue Stamp Tax

The Notes are not subject to Swiss federal stamp tax on the issuance of securities.

Swiss Federal Securities Turnover Tax

The issue and redemption of Notes by the Issuer are not subject to Swiss federal stamp duty on the issue of securities.

Dealings in Notes which are classified as pure derivative financial instruments (such as pure call and put options, including low exercise price options with a maturity not exceeding twelve months, pure futures with a maximal pre-financing of 25 per cent., static certificates replicating an index or a basket of at least five shares and with a fixed maturity on an annual redemption right) are not subject to the Swiss federal securities turnover tax.

Dealings in Notes which have been issued by an issuer outside of Switzerland and which are classified as structured notes, share-like instruments (including low exercise price warrants on shares with a maturity exceeding twelve months) or fund-like instruments are subject to Swiss federal securities turnover tax of 0.3 per cent. on the consideration paid, however, only if a Swiss securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

Dealing in bonds and structured notes with a maturity not exceeding one year are exempt from Swiss federal turnover tax.

The delivery of an underlying taxable security at exercise or redemption to the holder of the Note is subject to Swiss federal securities turnover tax of 0.3 per cent. if a Swiss domestic securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

Non-Swiss resident holders

A holder of a Note who is not resident in Switzerland for tax purposes and who during the taxation year has not engaged in trade or business carried on through a business operation or permanent establishment in Switzerland, will neither be subject to income tax and capital gains tax nor net wealth or capital tax in Switzerland.

Automatic Exchange of Information in Tax Matters

On November 19, 2014, Switzerland signed the Multilateral Competent Authority Agreement (the **MCAA**). The MCAA is based on article 6 of the OECD/Council of Europe administrative assistance convention and is intended to ensure the uniform implementation of Automatic Exchange of Information (the **AEOI**). The Federal Act on the International Automatic Exchange of Information in Tax Matters (the **AEOI Act**) entered into force on January 1, 2017. The AEOI Act is the legal basis for the implementation of the AEOI standard in Switzerland.

The AEOI is being introduced in Switzerland through bilateral agreements or multilateral agreements. The agreements have, and will be, concluded on the basis of guaranteed reciprocity, compliance with the principle of

speciality (i.e. the information exchanged may only be used to assess and levy taxes (and for criminal tax proceedings)) and adequate data protection.

Switzerland has concluded a multilateral AEOI agreement with the EU (replacing the EU savings tax agreement) and has concluded bilateral AEOI agreements with several non-EU countries.

Based on such multilateral agreements and bilateral agreements and the implementing laws of Switzerland, Switzerland will begin to collect data in respect of financial assets, including, as the case may be, Notes, held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland for the benefit of individuals resident in a EU member state or in a treaty state.

Swiss Facilitation of the Implementation of the U.S. Foreign Account Tax Compliance Act

Switzerland has concluded an intergovernmental agreement with the U.S. to facilitate the implementation of FATCA. The agreement ensures that the accounts held by U.S. persons with Swiss financial institutions are disclosed to the U.S. tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance. Information will not be transferred automatically in the absence of consent, and instead will be exchanged only within the scope of administrative assistance on the basis of the double taxation agreement between the U.S. and Switzerland. On 8 October 2014, the Swiss Federal Council approved a mandate for negotiations with the U.S. on changing the current direct-notification-based regime to a regime where the relevant information is sent to the Swiss Federal Tax Administration, which in turn provides the information to the U.S. tax authorities.

2.4 United States

2.4.1.1 Foreign Account Tax Compliance Act

Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 (**FATCA**) impose a new reporting regime and potentially a 30% withholding tax with respect to certain payments to (i) any non-U.S. financial institution (a "foreign financial institution", or **FFI** (as defined by FATCA)) that does not become a "**Participating FFI**" by entering into an agreement with the U.S. Internal Revenue Service (**IRS**) to provide the IRS with certain information in respect of its account holders and investors or is not otherwise exempt from or in deemed compliance with FATCA and (ii) any investor (unless otherwise exempt from FATCA) that does not provide information sufficient to determine whether the investor is a U.S. person or should otherwise be treated as holding a "United States account" of the Issuer (a **Recalcitrant Holder**). The Issuers are classified as FFIs.

The new withholding regime is now in effect for payments from sources within the United States and will apply to "**foreign passthru payments**" (a term not yet defined) no earlier than 1 January 2019. This withholding would potentially apply to payments in respect of (i) any Notes characterised as debt (or which are not otherwise characterised as equity and have a fixed term) for U.S. federal tax purposes that are issued after the "**grandfathering date**", which (A) with respect to Notes that give rise solely to foreign passthru payments, is the date that is six months after the date on which final U.S. Treasury regulations defining the term foreign passthru payment are filed with the Federal Register, and (B) with respect to Notes that give rise to a dividend equivalent pursuant to section 871(m) of the U.S. Internal Revenue Code of 1986, is six months after the date on which obligations of its type are first treated as giving rise to dividend equivalents, or which (in each case) are materially modified after the grandfathering date and (ii) any Notes characterised as equity or which do not have a fixed term for U.S. federal tax purposes, whenever issued. If Notes are issued on or before the grandfathering date, and additional Notes of the same series are issued after that date, the additional Notes may not be treated as grandfathered, which may have negative consequences for the existing Notes, including a negative impact on market price.

The United States and a number of other jurisdictions have entered into intergovernmental agreements to facilitate the implementation of FATCA (each, an **IGA**). Pursuant to FATCA and the "Model 1" and "Model 2" IGAs released by the United States, an FFI in an IGA signatory country could be treated as a "**Reporting FI**" not subject to withholding under FATCA on any payments it receives. Further, an FFI in an IGA jurisdiction generally would not be required to withhold under FATCA or an IGA (or any law implementing an IGA) (any such withholding being **FATCA Withholding**) from payments it makes. Under each Model IGA, a Reporting FI would still be required to report certain information in respect of its account holders and investors to its home government or to the IRS. The United States has entered into agreements with France (the **US-France IGA**) and Luxembourg (the **US-Luxembourg IGA**) based largely on the Model 1 IGA.

If the relevant Issuer is treated as a Reporting FI pursuant to the US-France IGA or US Luxembourg IGA (as applicable) it does not anticipate that it will be obliged to deduct any FATCA Withholding on payments it makes. There can be no assurance, however, that the relevant Issuer will be treated as a Reporting FI, or that it would in the future not be required to deduct FATCA Withholding from payments it makes. The relevant Issuer and financial institutions through which payments on the Notes are made may be required to withhold FATCA Withholding if (i) any FFI through or to which payment on such Notes is made is not a Participating FFI, a Reporting FI, or otherwise exempt from or in deemed compliance with FATCA or (ii) an investor is a Recalcitrant Holder.

Whilst the Notes are in global form and held within Euroclear Bank SA/NV or Clearstream Banking S.A. (together, the **ICSDs**) or cleared through Euroclear France, SIX SIS SA, Euroclear Sweden AB, Euroclear Finland Ltd, Verdipapirsentralen ASA or VP Securities A/S (together, the **Applicable Clearing Systems**), it is generally expected that FATCA will not affect the amount of any payments made under, or in respect of, the

Notes by the Issuer, the Guarantor, any paying agent and the common depository or common safekeeper, given that each of the entities in the payment chain between the Issuer and the participants in the ICSDs and Applicable Clearing Systems is a major financial institution whose business is dependent on compliance with FATCA and that any alternative approach introduced under an IGA will be unlikely to affect the Notes. No assurance, however, can be given that FATCA withholding will not apply to the Notes. The documentation expressly contemplates the possibility that the Notes may go into definitive form and therefore that they may be taken out of the ICSDs or Applicable Clearing System. If this were to happen, then a non-FATCA compliant holder could be subject to FATCA Withholding. However, definitive Notes will only be printed in remote circumstances.

FATCA is particularly complex and its application is uncertain at this time. The above description is based in part on regulations, official guidance and model IGAs, all of which are subject to change or may be implemented in a materially different form. Prospective investors should consult their tax advisers on how these rules may apply to the Issuer and to payments they may receive in connection with the Notes.

2.4.1.2 *Possible Withholding under Section 871(m) of the U.S. Internal Revenue Code*

U.S. Treasury regulations issued under Section 871(m) of the U.S. Internal Revenue Code of 1986 (the Section 871(m) Regulations) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid (within the meaning of the relevant Section 871(m) Regulations) to a non-United States holder (a Non-U.S. Holder) with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (such equities and indices, U.S. Underlying Equities). The 30% withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders may be reduced by an applicable tax treaty (provided the Issuer shall be entitled to withhold at the highest rate applicable to such payments regardless of any exemption from, or reduction in, such withholding), eligible for credit against other U.S. tax liabilities or refunded, provided that the beneficial owner claims a credit or refund from the United States Internal Revenue Service (the IRS) in a timely manner, but the Issuer makes no assessment as to whether any such tax credits will be available to Non-U.S. Holders.

Specifically, the Section 871(m) Regulations will generally apply to Notes issued on or after that substantially replicate the economic performance of one or more U.S. Underlying Equities as determined by the Issuer on the date for such Notes as of which the expected delta of the product is determined by the Issuer, based on tests set out in the applicable Section 871(m) Regulations (the Specified Notes). If one or more of the U.S. Underlying Equities are expected to pay dividends during the term of the Specified Note, withholding generally will still be required even if the Specified Note does not provide for payments explicitly linked to dividends. Even where a Note is a Specified Note, no tax should be imposed under Section 871(m) as long as either (1) no dividend is paid with respect to any U.S. Underlying Equity during the term of the Note or (2) both (x) no additional amount is paid to the holder of a Note in respect of any such dividend and (y) as estimated by the Issuer (with the meaning of Treas. Reg. § 1.871-15(i)(2)(iii)) at the time of issuance in writing the amount of all such dividends will be zero (such securities, Zero Estimated Dividends Securities). In such case, we will estimate the amount of dividends to be paid with respect to U.S. Underlying Equities for all periods during the term of the Note to be zero and will not make any adjustments for dividends, including extraordinary dividends, that are taxable as dividends for U.S. federal income tax purposes, and thus there should be no tax imposed under section 871(m) on the Note even if one or more dividends are paid with respect to a U.S. Underlying Equity.

A Note linked to U.S. Underlying Equities which the Issuer has determined not to be a Specified Note will not be subject to withholding tax under the Section 871(m) Regulations. Moreover, the Section 871(m) Regulations provide certain exceptions to this withholding regime, in particular for Notes linked to certain broad-based indices that meet requirements set forth in the applicable regulation pursuant to the Section 871 (m) Regulations (Qualified Indices) as well as securities that track such indices (Qualified Index Securities).

A Note referencing U.S. Underlying Equities issued prior to 1 January 2017 is generally considered out of scope of Section 871(m) Regulations, unless such Note is modified after 1 January 2017 and as a result of any such modification substantially replicates the economic performance of one or more U.S. Underlying Equities and becomes a Specified Note for the purposes of Section 871(m) Regulations. If additional Notes of the same series are issued (or deemed issued for U.S. tax purposes, such as certain sales of Notes out of inventory) after the original issue date, the U.S. Internal Revenue Service ("IRS") could treat the issue date for determining whether the existing Notes are Specified Notes as the date of such subsequent sale or issuance. Consequently, a previously out-of-scope Note might become a Specified Note following such modification or further issuance.

The applicable Final Terms will specify if the Notes are Specified Notes or Zero Estimated Dividends Securities. In the case of Notes that are Specified Notes, but not Zero Estimated Dividends Securities, the applicable Final Terms will specify whether the Issuer or its withholding agent will withhold tax under Section 871(m) Regulations and the rate of the withholding tax. If the Notes are Zero Estimated Dividends Securities, the applicable Final Terms, will specify the rate of the withholding tax to be zero. If the Notes are determined to be Specified Notes, a Non-U.S. Holder of such Specified Notes generally will be subject to a 30% withholding tax, without regard to any applicable treaty rate, on dividend equivalents paid or deemed paid. If the Notes are Zero Estimated Dividends Securities, a Non-U.S. Holder of such Specified Notes will be subject to a zero withholding tax.

Investors are advised that the Issuer's determination is binding on all Non U.S. Holders of the Notes, but it is not binding on the IRS and the IRS may therefore disagree with the Issuer's determination, as the Section 871(m)

Regulations require complex calculations to be made with respect to Notes linked to U.S. Underlying Equities and their application to a specific issue of Notes may be uncertain. Investors should note that if the Issuer or any withholding agent determines that withholding is required, neither the Issuer nor the withholding agent will be required to gross up any amounts withheld in connection with a Specified Note.

Prospective investors should consult their tax advisers regarding the potential application of Section 871(m) Regulations to an investment in the Notes."

2.5 Liechtenstein

There are no Liechtenstein taxes on the income from the securities withheld at source apart from the case specified below.

Under the Agreement of 29 January 2013 between the Principality of Liechtenstein and the Republic of Austria regarding the Cooperation in the Area of Taxes, payments of interest, dividends or similar income or capital gains made or ascribed by a paying agent established in Liechtenstein to or for the immediate benefit of a Liechtenstein entity qualifying as transparent asset structure (transparente Vermögensstruktur) under the Agreement will be subject to withholding tax if the beneficial owner thereof is tax resident in Austria and has elected to be taxed at source under the Agreement. Where withholding tax is applied, it will be levied at a rate of 27.5 per cent.

SUBSCRIPTION, SALE AND TRANSFER RESTRICTIONS

The Dealers have in a programme agreement to be dated on or around the date of this Prospectus (the **Programme Agreement**, which expression includes the same as it may be updated or supplemented from time to time), agreed with the Issuers and the Guarantor a basis upon which they (or any one of them) may from time to time agree to purchase Notes. Any such agreement will extend to those matters stated under "Form of the Notes" and in the Terms and Conditions of the Notes above. In the Programme Agreement, the Issuers have jointly and severally agreed to reimburse the Dealers for certain of their expenses in connection with the establishment and any future update of the Programme and the issue of Notes under the Programme and to indemnify the Dealers against certain liabilities incurred by them in connection therewith.

Each Dealer has agreed, and each further Dealer appointed under the Programme and each other Purchaser will be required to agree, that it will (to the best of its knowledge and belief) comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Notes or possesses or distributes the Base Prospectus or any offering material, and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries, and none of the Issuers, the Guarantor or any other Dealer shall have any responsibility therefor.

None of the Issuers, the Guarantor or any of the Dealers represents that Notes may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

The following selling restrictions may be modified by the relevant Issuer and the relevant Purchaser(s) following a change in the relevant law, regulation or directive and in certain other circumstances as may be agreed between the relevant Issuer and the relevant Purchaser(s). Any such modification will be set out in the syndication agreement (if applicable) in respect of the Tranche to which it is related or in a Supplement to this Base Prospectus.

1. UNITED STATES TRANSFER RESTRICTIONS

- (e) that the Issuer and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that if any of such acknowledgements, representations or agreements made by it are no longer accurate, it shall promptly notify the Issuer; and if it is acquiring any Notes as a fiduciary or agent for one or more accounts it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account;

No payments will be made on the affected Notes from the date notice of the sale requirement is sent to the date on which the affected Notes are sold. There can be no assurance that a holder of Notes, or an interest therein, who is required to sell Notes, or whose Notes are sold on its behalf (in this way) will not incur a significant loss as a result of the need for the Issuer, or for the transferor, to find a Permitted Transferee willing to purchase the Notes. Neither the Issuer nor any other party shall be liable to a holder for any such loss;
- (g) that the Issuer may receive a list of participants holding positions in the Notes from one or more book-entry depositories; and

that it will, and will require each subsequent holder to, notify any purchaser of the Notes from it of the representations and resale restrictions referred to in the foregoing paragraphs, and include as part of such transaction any legends or other disclosure required by such restrictions.

2. SELLING RESTRICTIONS: JURISDICTIONS OUTSIDE THE EUROPEAN ECONOMIC AREA (EEA)

2.1 Switzerland

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme and each other Purchaser will be required or deemed to agree, that it will comply with (i) any laws, regulations or guidelines applicable in Switzerland (as amended from time to time) in relation to the marketing, offer, sale, delivery or transfer of the Notes, or the distribution of any marketing or offering material in respect of the Notes, in or from Switzerland and (ii) the requirements in respect of the distribution of CHF SIS Notes set out in Condition 1.1(a) to 1.1(g) of the Terms and Conditions of the German Law Notes.

If pursuant to the applicable Final Terms a public offering in or from Switzerland is not permissible each Dealer has represented and agreed, and each further Dealer appointed under the Programme and each other Purchaser will be deemed to represent and agree, that the Notes must not be publicly offered, sold or advertised, directly or indirectly, in or from Switzerland, and in case of structured products as per article 5 CISA, the Notes may be distributed in or from Switzerland exclusively to Qualified Investors as defined by article 10 CISA and related provisions of the Collective Investment Scheme Ordinance and in strict compliance with applicable Swiss law and regulations. If a public offering in or from Switzerland is not permissible, the Notes will not be listed on SIX Swiss Exchange or on any other exchange or regulated trading facility in Switzerland and neither this document, nor any other offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to article 652a or article 1156 of the Swiss Code of Obligations or a listing prospectus pursuant to the listing rules of SIX Swiss Exchange or any other exchange or regulated trading facility in Switzerland or a simplified prospectus or a prospectus as such terms are defined in the CISA. In such cases neither the applicable Final Terms nor any other marketing material relating to the Notes may be distributed to non-Qualified Investors or otherwise made publicly available in Switzerland.

2.2 United States

The Notes and any guarantee thereof have not been and will not be registered under the Securities Act or under the securities law of any state or political sub-division of the United States, and trading in the Notes has not been approved by the CFTC under the CEA. No person has registered and no person will register as a "commodity pool operator" of any Issuer under the CEA and CFTC Rules, and no Issuer has been and no Issuer will be registered as an investment company under the Investment Company Act. The Notes are being offered and sold in reliance on an exemption from the registration requirements of the Securities Act pursuant to Regulation S.

Accordingly, the Notes may only be offered, sold, pledged or otherwise transferred in an "offshore transaction" (as defined under Regulation S) to or for the account or benefit of a Permitted Transferee. A "**Permitted Transferee**" means any person who:

- (a) is not a U.S. Person; and

3. SELLING RESTRICTIONS: JURISDICTIONS WITHIN THE EEA

The selling restrictions below may not be applicable in the context of a public offer, in which case appropriate modifications will be made in the applicable Final Terms.

3.1 Prohibition of Sales to EEA Retail Investors

Unless the Final Terms in respect of any Notes specifies "Prohibition of Sales to EEA Retail Investors" as "Not Applicable", each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by the Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the European Economic Area.

For the purposes of this provision:

- (a) the expression retail investor means a person who is one (or more) of the following:
 - (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or
 - (ii) a customer within the meaning of Directive 2002/92/EC (as amended, the **Insurance Mediation Directive**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
 - (iii) not a qualified investor as defined in Directive 2003/71/EC (as amended, the **Prospectus Directive**); and
- (b) the expression **an offer** includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes.

If the Final Terms in respect of any Notes specifies "Prohibition of Sales to EEA Retail Investors" as "Not Applicable", in relation to each Member State of the EEA (including, without limitation, Belgium, Finland, Norway and Spain) which has implemented the Prospectus Directive (each, a **Relevant Member State**), each Dealer has represented and agreed, and each further Dealer appointed under the Programme and each other Purchaser will be required to represent and agree, that it has not made and will not make an offer of Notes which are the subject of the offering contemplated by the Base Prospectus as completed by the applicable Final Terms in relation thereto to the public in a Member State of the European Economic Area (a Member State), except that it may make an offer of such Notes to the public in that Member State:

- (a) if the final terms in relation to the Notes specify that an offer of those Notes may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Member State (a **Non-exempt Offer**), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Member State or, where appropriate, approved in another Member State and notified to the competent authority in that Member State, provided that (i) the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer and (ii) any such prospectus has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable;
 - (b) at any time to any legal entity which is a qualified investor as defined under the Prospectus Directive;
 - (c) at any time to fewer than 150, natural or legal persons (other than qualified investors as defined in the Prospectus Directive) subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
 - (d) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,
- provided that no such offer of Notes referred to in (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression "**offer of Notes to the public**" in relation to any Notes in any Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State.

For the purposes of this provision, the expression "an offer of the Notes to the public" means the communication to the public in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes.

For the purposes of this provision, the expression "Alternative Financial Instruments" means stocks, bonds, shares in corporations and co-operatives, participation rights, silent partnerships and subordinated loans, whereas these financial instruments, except for bonds, shall not grant unconditional repayment, and, except for an offer of shares in co-operatives, shall not include an obligation to pay an additional contribution.

2. CREDIT RATINGS

SG Issuer and Société Générale Effekten GmbH are not rated.

At the date of this Base Prospectus, Société Générale is rated:

"A (high) by DBRS: The DBRS® long-term rating scale provides an opinion on the risk of default on a scale of 'AAA' to 'D'. 'AA' ratings denote superior credit quality. The capacity for payment of financial obligations is considered high. Credit quality differs from 'AAA' only to a small degree. Unlikely to be significantly vulnerable to future events. All rating categories other than 'AAA' and 'D' also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category.

"A" by Fitch Ratings: An Issuer Default Rating at Fitch Ratings provides an ordinal ranking of issuers, on a scale of 'AAA' to 'D', based on the agency's view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings. The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories.

"A1" by Moody's Investors Services: Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by financial institutions on a scale of 'Aaa' to 'C'. Obligations rated 'A' are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

"A" by Rating and Investment Information, Inc.: An Issuer Rating is R&I's opinion on an issuer's general capacity to fulfill its financial obligations and is, in principle, assigned to all issuers. Ratings are issued on a scale of 'AAA' to 'D', reflecting R&I's view on the creditworthiness of the Issuer. An issuer rated 'A' has a high creditworthiness supported by a few excellent factors.

"A" by Standard and Poor's: A Standard & Poor's issue credit rating is a forward-looking opinion on a scale of 'AAA' to 'D' about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program. The opinion reflects Standard & Poor's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default. An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

As at the date of this Base Prospectus, each of DBRS Ratings Limited, Moody's Investors Services, Fitch Ratings and Standard & Poor's is established in the European Union and is registered under the CRA Regulation and is included in the list of credit rating agencies registered in accordance with the CRA Regulation published on the European Securities and Markets Authority's website (www.esma.europa.eu/page/List-registered-and-certified-CRAs). Rating and Investment Information, Inc. is established in Japan. It has not been registered in accordance with the CRA Regulation.

A rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, change or withdrawal at any time by the assigning rating agency.
